

Security Information

PERSONAL USE

Radios, including wireless phones may interfere with the function of medical devices such as hearing aids unprotected and pacemakers. Please check with the manufacturer of these devices or with your doctor before using.

In deposits of oil and chemical plants where explosive gases are stored or other products, the user must pay close attention to the restrictions of mobile phone use. Even if your phone is in sleep mode still transmit radio frequency signals. So turn it off when requested.

Consider traffic safety, when you are driving, please do not use mobile phones. Stop the side of the road when necessary use. Avoid making calls on his cell phone during a storm.

Safety information relating to children:

- Be careful that children ingest small parts such as the SIM card.
- Do not allow children to play with your cell phone. For example, throw, chew or dip under water should be avoided.
- Do not allow children under 14 years of age to hang the phone around the neck.

MOBILE PHONE USE

Please use only accessories or parts supplied by the manufacturer or by the manufacturer. The use of unauthorized accessories could influence the performance of the phone. Worse, the phone may be damaged or cause damage to its structure. You could even violate national regulations on telecommunication terminal products.

Do not use chemicals such as cleaning solvents or detergents to clean the phone. It is recommended that you use a slightly damp proof instead of static fabric that is easy to catch and dry static. Before cleaning, turn off the phone.

Your mobile phone produces magnetic fields. Do not place it near magnetic storage media such as computer disks, using your phone near other electrical appliances such as televisions, telephones, radios and personal computers can cause interference and thus influence the performance of your phone.

Do not expose your phone to intense sunlight, direct heat or liquids, this can cause damage.

Handling severe behaviors, such as throwing and hitting the phone may damage the internal circuitry integrated on the phone should be avoided.
Please do not connect to other equipment unnecessary.

Note: untrained personnel should not attempt to disassemble the phone.
Precautions Phone!

Use the phone's battery only for its intended purpose, and never use any charger that is damaged or worn.

When you disconnect the phone from the charger, grasp the plug, not the cord.

Do not use harsh chemicals, cleaning solvents or strong detergents to clean the phone. Wipe with a soft cloth dampened with a solution of mild soap and water.

Do not open the casing of the phone or the battery.

Always keep the SIM card out of the reach of children.
Your device applications are grouped into menus. Not all applications or different elements of options detailed in this manual.

Your team must be registered to a mobile service provider, but this does not guarantee that all features and applications that are on your device will work with all networks, since these depend on whether the provider provides its service. Also keep in mind that many of the functions that support your device may have been disabled by your provider, to that extent these features will not appear on the menu or not work as detailed in the user manual.

Important: Install and use applications and other software from trusted sites to ensure greater protection for your computer. Sites that do not guarantee the security of content, can provide corrupt software that can damage or alter the data content that is on your computer, causing it to lose its original configuration and eventually damage it.

Your team can bring favorite applications and links to third party web sites, you might access to third party sites. These sites are not connected, or sponsored by Avvio, Avvio therefore assumes no responsibility for these. To access these sites, take precautions for their safety and content.

Notice: When listening to music at a too high can produce hearing damage. Use your device's volume to a moderate level.
All features, functionality and other product specifications, as well as the information included in this guide are based on the latest information available, which is believed to

be accurate at the time of printing. Brightstar Corp. reserves the right to change or modify any information or specifications without notice or obligation.

Do not short the battery terminals. This is dangerous and can damage the battery, producing heat and can cause fire.

Do not dispose of batteries in a fire as they may cause an explosion. Return waste batteries to your dealer or an approved recycling center. Do not dispose as household waste.

Attention! If the battery case is broken, avoid contact with the contents. Wash contaminated skin with plenty of water and seek medical attention.

Battery Precautions!

Avoid dropping the cell phone. If this happens, especially on a hard surface, can potentially cause damage to the phone and battery. If you suspect damage to the phone or battery, take it to a service center for inspection.

Never use any charger or battery that is damaged in any way.

Use the battery only for its intended purpose.

If you use the phone near the network's base station, it uses less power; talk time and standby mode are greatly affected by the signal strength on the cellular network and the parameters set by the network operator.

The charging time depends on the remaining battery charge, the type of battery and charger used. The battery can be charged and discharged hundreds of times, but it will gradually wear. When the operation time (talk time and idle time) is noticeably shorter than normal, consider buying a new battery.

If left unused, a fully charged battery, it runs completely over time.

Extreme temperatures will affect the charging capacity of your battery: it may require cooling or warming first.

Do not leave the battery in hot or cold places, such as in a car in summer or winter, it will reduce the capacity and lifetime of the battery. Always try to keep the battery at room temperature. The phone with a hot or cold battery may not work temporarily, even when the battery is fully charged. The batteries are particularly affected by temperatures below 32 ° F.

Do not place the phone in areas that may get very hot, such as on or near a cooking surface, a cooking appliance, iron, or radiator.

Protect the phone or battery wet. Although dry and appears to function normally, the circuit can slowly corrode and pose a safety hazard.

Keep the battery out of the phone to come in contact with metal objects, such as coins, keys or jewelry.

ON THE ROAD AND HIGHWAY

Before making or receiving calls thoroughly familiar with applicable local laws and guidelines on the use of mobile radio and always comply with these laws.

Air bags, antilock brakes, cruise control and fuel injection systems are normally immune to radio transmissions, but if you encounter problems, please consult your car dealer.

Turn off your mobile phone when making refueling or when there are signs that restrict the use of equipment for two-way radio. Do not store or carry flammable or explosive materials in the same compartment as the phone because the internal sparks may cause ignition.

Safety comes first, and is the primary responsibility of the driver. Please:

Give full attention to driving, do it safely is your first responsibility.

Use a hands-free kit, if available.

If you have a free hand to make sure the numbers are preprogrammed when possible, make a few calls and brief.

If you do not have a hands-free kit, pull off the road and park before making or answering a call.

IN AIRCRAFT

Turn off your mobile phone before embarking on a flight. Mobile phone use is prohibited in aircraft because of possible interference with the telecommunications system. If the plane has not taken off yet, you should ask the flight crew for permission before using the phone.

Note: If you have set the phone to auto power on, please check the setup menu of the alarm clock and the Organizer menu to see the reminder time set as to ensure that the phone does not turn on automatically during flight.

ENVIRONMENTS AND BLASTING

Turn off the phone and remove the battery when in any area with a potentially explosive atmosphere and obey all signs and instructions. Must observe restrictions on the use of radio equipment in fuel depots, below deck on boats, storage and fuel transfer, areas where the air contains chemicals or particles such as grain, dust or metal powders, signals on areas where explosive atmospheres are ongoing demolitions, any other area where it is recommended to turn off your vehicle engine.

HEALTH RISK BY PHONE WIRELESS

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no evidence, however, that wireless phones are absolutely safe.

Mobile phones emit low levels of radio frequency energy (RF) in the microwave range in use. They also emit very low levels of RF when in idle mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level exposures to RF have not found any biological effects, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

1. Outlook Description

2. Power Button Usage

- **Turn On:** Press the power button and hold for 2 seconds.
- **Turn Off:** Press the power button and hold for 2 seconds
- **Turn on/off airplane mode:** Press the power button and hold for 2 seconds → **airplane mode**
- **Sleep Mode On/Off:** Press & release the power button quickly to turn sleep mode on and off.
- **Forced shutdown:** Press and hold the power button until it power off.

Note: If it is not necessary, please do not use forced shutdown.

3. Touch-Screen Navigation

The touch-screen allows for quick, easy and convenient navigation for all applications. Throughout the User Guide, you are instructed to use the following tap or touch navigation methods:

- **Tap:** quick tap & release on an item on the screen.
- **Finger slide:** touch & slide your finger across the screen and then release.
- **Touch & hold:** touch and hold in place approx 2 seconds, and then release to display an options window.

Note:

To avoid scratching or crushing, do not place objects on the touch screen surface.

4. Using microSD Card

- Insert your card into the microSD slot until it clicks into place. When ready for use, it's OK.
- Remove microSD Card
- Close all applications or documents which have been opened on the card. Press Settings → Storage → SD Card → Unmount Storage → OK.

Note:

Don't insert and remove the SD card repeatedly in a short time, as this may cause damage to the card.

5. Getting Started

5.1. Charge the device

Note:

You can use the device while the battery is charging, although the charging time is longer when operating and charging at the same time.

- Plug the power adapter into an electrical wall outlet, and then connect to the device to fully charge the battery before use (approx. 4hour).

5.2. Turn the device on

Press the power button and hold for 2 seconds.

5.3. Start Wi-Fi Network

- **Turn on Wi-Fi**

Since many features require a Wi-Fi connection, we recommend you set up your Wi-Fi network now.

- **Settings** → **Wi-Fi**

Check Wi-Fi to turn on.

- **Connect to Wi-Fi**

The device automatically scans and lists all local Wi-Fi Network found. A  indicates that the secure networks require login name/password to connect.

1. Tap the desired network to which you want to connect, → enter the Network Password if applicable, → tap Connect.
2. Tap back key to return to the Home screen.

Note:

If your Wi-Fi network is set as hidden, it won't be found by the auto scan. Tap "+" on the top of the screen and follow the prompts to add your network

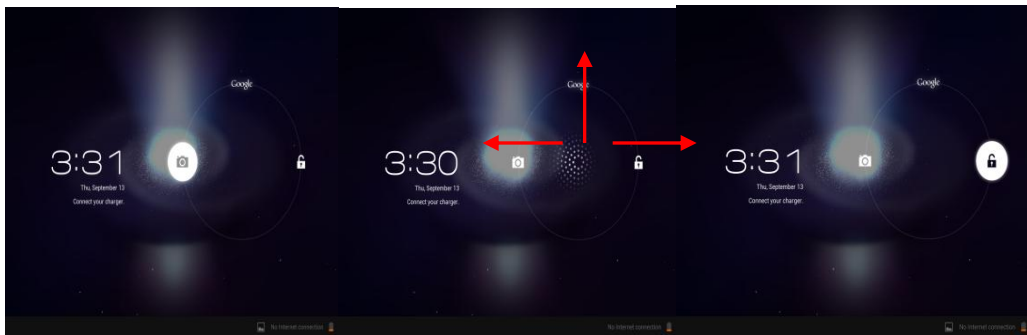

6. Launcher

- ① Backspace
- ② Home
- ③ Display the program is running

7. Screen Lock

Can be set to automatically lock screen or quickly press the power button to manually lock screen. Lock screen displays the following:
You can drag the lock to three direction (left, right, up) to unlock your device.

- Pressing  and drag to right side , then releasing it. You will go to the home screen, or the interface that you did not close last time.

- Pressing  and drag to up side , hen releasing it. You will go to the Google searching interface directly.
 - Pressing  and drag to left side , hen releasing it. You will open the camera.
-

8. Application Management

8.1. Install Android Applications

Purchased or free Android applications that you have downloaded to your computer can be installed quickly & easily on your Tablet using the  **Apk Installer** application.

1. Copy the **.apk** files that you want to install onto a SD card or USB device, → insert or connect to your Device.
2. Tap the  **ApkInstaller** application icon.
3. Tap **Install** and locate the folder (**Internal Memory** or **TF Card**) in which the **.apk** application files were saved.
4. Tap on a **.apk** file → **Install**.
The application is installed and the application icon is added to the **Applications** screen.
5. Tap **Open** to launch the application now, or tap **Done** to return to the **ApkInstaller** screen.

8.2. Download Android Applications direct from a Website

You can download Android applications directly from websites, and then quickly and easily install them on your device.

1. Tap the  **Browser** application icon to launch the internet browser.
2. Enter the desired website URL, and tap the **download** link for the application you want to install on your device.
3. After the download is complete, touch & hold on the download file (in the **Download history** screen), → tap **Open** → **Install**.

8.3. Download Android Applications direct from Play Store

Please refer to the Chapter of “**Play store**”

8.4. Uninstalling Android Applications

You can also quickly and easily uninstall the Android applications that you have installed.

1. Press **Settings** → **Applications**
2. Tap the application you want to uninstall, → **Uninstall**.
3. Tap **OK** to confirm the Uninstall.

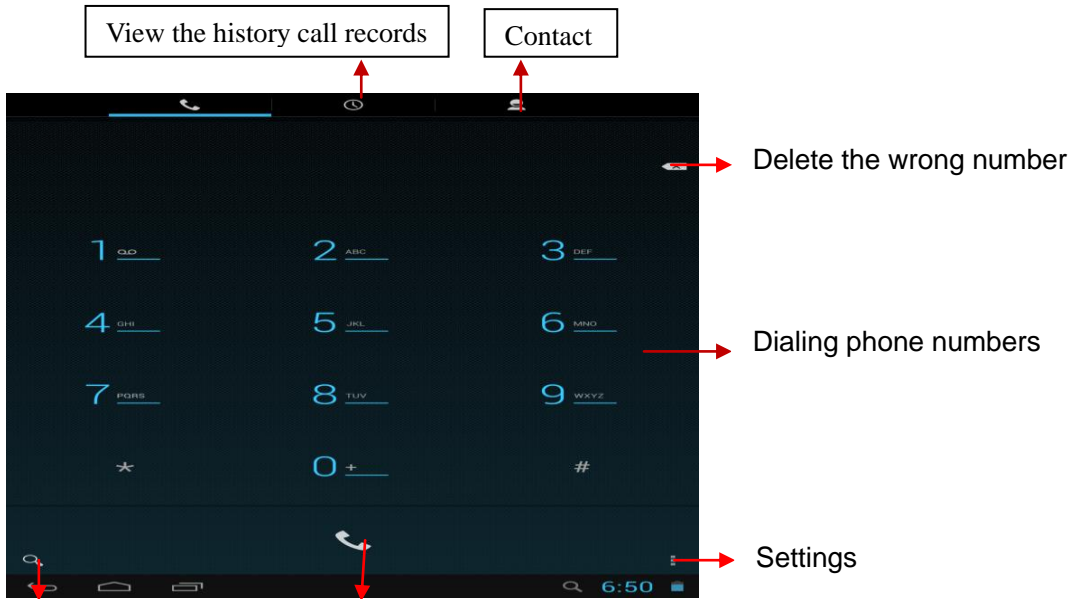

You can also use **ApkInstaller** to uninstall the Android applications

1. Tap the  **ApkInstaller** application icon.
2. Tap **Manage**
3. Tap one **.apk** from the application list and tap **Uninstall**
4. Tap **OK** to confirm to uninstall the **.apk**

9. Phone

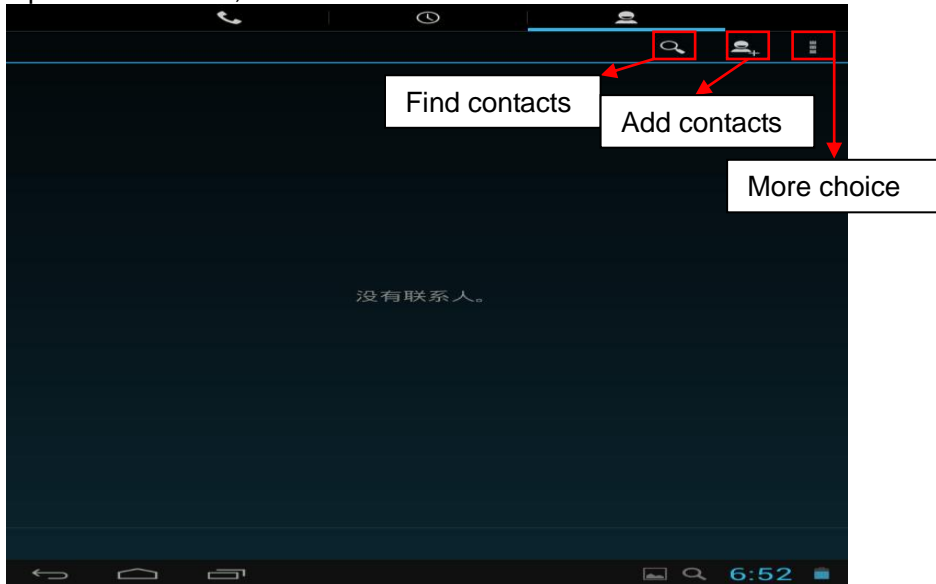

Press the phone icon 

Find contacts

Make the phone call

Open the contacts,see as follows:

More choice

- **Contacts to display** Show all contacts or customize
- **Import/export** Import from storage / Export to storage /Share visible contacts
- **Accounts** Choose Auto-sync app data or not
- **Settings** Set the ringtone and other settings

10. Message

10.1.Open message

1. Press the message icon on the screen.
2. Create new message or open the chat which is ongoing.

10.2. Send message

1. Pressing “New message” at the top of the screen to compose new message.
2. Touch **To** to input the phone numbers that you want to send the message to.
 - *Input the phone number directly using the virtual keyboard*
 - *You can also enter already entities of the mobile phone number the contact's name.*
3. Touch **Type message** to start editing your message.
 - *You can input some text information to make a SMS.*
 - *You can add subject or insert pictures or video to make a MMS.*
4. Touch the arrow icon to send the message.

11. Play Store

The App Play Store has many applications that you can quickly and easily download to your MID. Before using **APP Play Store**, you have to make sure you device have a internet connection (Please refer to the **Chapter of Wi-Fi**)

11.1. Download Applications

1. Tap the  **App Play Store** application icon and tap **Accept** on the bottom of the screen.

Note:

- The first time, you are prompted for your App Market login information. If you have not yet registered an account, tap **New**.
Otherwise, tap **Existing** and enter your login information and then tap **Done**
- The first you enter your account, you are required to set your credit card, like follows:

Tap **set up credit card** button to open the following window, you can edit your

information according to the introductions

If you wouldn't set the credit card, tap **Not now** button to enter the play store directly.

2. You can select applications from the default **Featured** group, or tab **Apps/Games** on bottom of the screen on the left to choose from the application list by categories, or you can also search applications by name by tapping the icon .
3. Tap any application you want to download, → **Download** → **Accept & download**.
When download process started, the icon  will be displayed on the status bar.
When the icon  is displayed on the status bar, the app is downloaded successfully.
4. Slide down the status bar and tap the "**Successfully installed**" → tap **Open** to launch it now or tap **Uninstall**.
5. Press Back key to return to the Play Store screen to download other applications

11.2. App Market Function Menu

Press Menu key to display the App Market **Function Menu**.

11.2.1 Search

Tap to enter the keys of the application you want to search.

11.2.2 My Apps

This page displays the apps installed on your device that can be also found in the APP Market

Uninstall apps (With **Installed** displayed on right of the item)

1. Tap the app you want to uninstall.
2. Tap **Uninstall**.
3. Tap "OK" when display a dialog.

Update apps (For **FREE** displayed on right of the item)

1. Tap the app you want to update

2. Tap **Download** → **Accept &Download**

11.2.3 Settings

You can see some settings, such as: **Filtering level** and **Notifications settings**.

Filtering level Set the filtering rules as desired

Notifications Set whether a notification prompt when application is downloaded.

11.2.4 Help

If you have some doubts, please refer to this part.

12. Browser and Chrome

Using Browser to surf the web .

12.1. Opening Browser

Tap the browser icon on the Home screen , and then you can open the Web browser.

You can browse the web by Wi-Fi or Ethernet.

12.2. Browser options

You can tap the button (make up of three dots) to make more choice:

Options	
Refresh/stop (Browser)	Refresh the current page/stop opening the current page
New Tab (Browser Chrome)	Enter the latest added tab.
New incognito tab (Browser, Chrome)	Enter the incognito tab
Share page (Browser)	Share your favorite pages with your friends
Find on page (Browser, Chrome)	Looking for something in the current page.

Request desktop site (Browse,)	You can select or unselect the options
Save for offline reading (Browser)	Save the current content for offline reading
Page info (Browser)	Display the current web page information
Settings (Browser, Chrome)	For some other Settings
Book marks (Chrome)	Books let you revisit your favorite web pages with one touch
Other devices (Chrome)	Sign in to Chrome to contact with other devices
Help (Chrome)	Useful tips that you can refer to

13. Camera

Tap the  Camera application icon.

13.1. Take Pictures

1. In **Camera**, tap  into photos mode, tap  to change from front and rear camera; tap  to take the picture.
2. The picture will be saved automatically.
3. Tap the picture thumbnail on the up right corner  to enter **Gallery** to scan the picture.
4. Press **Back** to the **Camera**.
5. Press **Back** to exit the **Camera** and back to the **Home screen**.

13.2. Take Videos

1. Tap  switch to video, and you can take videos.
2. Tap  to begin and tap  to stop.
3. The video will be saved.
4. Tap the video thumbnail  to play the video.

5. Press **Back** to the **Camera**.
6. Tap  switch back to camera.
7. Press **Back** to exit the **Camera** and back to the **Home screen**.

13.3. Panorama Photography

1. Tap  switch to panorama photography.
2. Tap  to begin and tap  to stop.
3. The picture will be saved.
4. Move your machine slowly to receive panorama.  shows filming schedule ,if you move too fast ,there will be a red block.
5. Tap  switch back to camera.
6. Press **Back** to exit the **Camera** and back to the **Home screen**.

13.4. Photo options

On the preview of the camera, tap  you can see some icons on the right of the preview, such as , , , touch it you can open the settings.

14. Wi-Fi

14.1. Connecting to Wi-Fi networks

1. Press **Settings -> Wi-Fi**
2. Check **Wi-Fi** item on the top of the screen to turn it on
3. Touch a network to connect to it

Note:

- *If the network is open, you are prompted to confirm that you want to connect to that network by touching **Connect**.*
- *If the network is secured, you're prompted to enter a password or other credentials. (Ask your network administrator for details.)*

14.2. Receive notifications when open networks are in range

By default, when Wi-Fi is on, you receive notifications in the Status bar when your device detects an open Wi-Fi network.

1. Turn on Wi-Fi, if it's not already on
2. In the Wi-Fi settings screen, check Network notification.
You can uncheck this option to stop receiving notification.

14.3. Add a Wi-Fi network

1. Turn on Wi-Fi, if it's not already on.
If you're adding a Wi-Fi network when first setting up your device, Wi-Fi is turned on automatically.
2. In the Wi-Fi settings screen, touch **Add network** (at the top of your screen).
3. Enter the SSID (name) of the network. If the network is secured, touch the Security menu and then touch the type of security deployed on the network.
4. Enter any required security credentials.
5. Touch **Save**.
The device connects to the wireless network. Any credentials that you entered are saved, so you are connected automatically the next time you come within range of this network.

14.4. Forget a Wi-Fi network

You can make the device forget about the details of a Wi-Fi network that you added—for example, if you don't want the device to connect to it automatically or if it is a network that you no longer use.

1. Turn on Wi-Fi, if it's not already on.
2. In the Wi-Fi settings screen, touch & hold the name of the network.
3. Touch **Forget** in the dialog that opens.

14.5. Wi-Fi Settings screen

In addition to the settings described in this section, you can press **Menu** and Advanced Wi-Fi settings as described in “**Advanced Wi-Fi**”

- **Wi-Fi**
Check to turn on Wi-Fi so you can connect to Wi-Fi networks. When connected to a network, displays the network’s name.
- **Wi-Fi networks**
Displays a list of Wi-Fi networks you’ve previously configured and those detected when the device last scanned for Wi-Fi networks.
- **Add Wi-Fi network**
Opens a dialog where you can add a Wi-Fi network by entering its SSID (the name it broadcasts) and security type.

14.6. Advanced Wi-Fi settings screen

- **Network notification**
Check to receive a notification when an open Wi-Fi network becomes available.
- **Keep Wi-Fi on during sleep**
Opens a dialog where you can set whether and when the Wi-Fi radio disconnects. Disabling sleep uses more battery power.
- **MAC address**
The Media Access Control (MAC) address of your device when connecting to Wi-Fi networks.
- **IP address**
The Internet Protocol (IP) address assigned to the device by the Wi-Fi network you are connected to (unless you used the IP settings to assign it a static IP address).

15. Accounts

15.1. Adding and removing accounts

- **Add an account**
 1. Open the Accounts & Sync Settings screen:
Press **Settings -> Accounts**
 2. Touch + **Add account** .
 3. Touch the kind of account you want to add
 4. Follow the steps displayed on the screen to enter the required and optional information about the account.

- **Remove an account**
 1. Open the Accounts & Sync Settings screen:
Press **Settings -> Accounts**
 2. Touch the account to delete
 3. Touch Settings on the top of the screen and then touch **Remove account** on the dropdown menu.
 4. Confirm that you want to remove the account

15.2. Configuring account sync and display options

- **Sync information manually**
 1. Open the Accounts Settings screen:
Press **Settings -> Accounts**
 2. Touch the account whose data you want to sync.
 3. Touch **Menu** on the top of the screen and touch **Sync now** on the dropdown menu.

- **Change an account's sync settings**
 1. Open the Accounts Settings screen:
Press **Settings -> Accounts**

2. Touch the account whose sync settings you want to change
3. Check or uncheck the kinds of information you want to sync to the device.

16. Regulador

Brightstar Corp. declara que esta unidad está conforme con las relevantes Provisiones de la Directiva de Bajo Voltaje 73/23/EEC y la directiva EMC 89 / 336 / EEC.

Brightstar Corp. declara que esta unidad está conforme a los requisitos esenciales y otras provisiones pertinentes de la Directiva 1999/5/EEC.

La certificación FCC solo aplica para el modelo Avvio PAD

FCC warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- ◆ Reorient or relocate the receiving antenna.
- ◆ Increase the separation between the equipment and receiver.
- ◆ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ◆ Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party

responsible for compliance could void the user's authority to operate this equipment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Radiation Exposure Statement:

This device meets the government's requirements for exposure to radio waves.

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless device employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands.
