Standard: FCC 15.231  
FCC ID: WVJ-CA00010521701  
Report #: 2009232

**Appendix G: Manual**

Please see the following page.

# User Manual

1. Position an object (e.g. chair) to hold door panel open.
2. Unlock & open door panel. Secure door panel in open position using object from step 1.
3. Locate battery tray at top of center strike plate in door jamb.
4. Using a small flat blade screwdriver, pry the top & bottom of the battery tray to remove. Take care to avoid scratching the door strike finish.
5. Remove discharged batteries (see battery disposal information).
6. Replace batteries with two fresh CR-1632 lithium coin cell batteries. Take care to properly position the “+” terminals of both batteries to correspond with the “+” marking on the battery tray.
7. Insert the battery tray back into the sensor through the opening in the center strike. The tray may encounter resistance during insertion prior to full seating. Continue until battery tray is flush with strike plate.
8. Close and lock door unit.
9. Verify that sensor is communicating with security control panel by unlocking window and checking security panel for door unlock message and then opening window and checking security panel for door open message.

Changes or modifications not expressly approved by Andersen Corporation could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
