

# CIRCULAR POLARIZED RFID ANTENNA

## SR900RCP

The Skyetek SR900RCP antenna is a high performance, high efficiency RFID antenna designed to work with the Skyetek SR100. It features a rugged aluminum case with ABS plastic radome, which houses a Right Hand Circularly Polarized antenna for use in the 902-928MHz spectrum. The antenna has excellent VSWR across the band and small axial ratio to maximize performance with any tag orientation. The antenna is offered with a bulkhead SMA connector.

### Specification

<b>Part Number</b>	SR900RCP
--------------------	----------

<b>Operating Frequency</b>	902-928 MHz
----------------------------	-------------

<b>Gain</b>	5.35 dBi
-------------	----------

<b>2:1 VSWR Bandwidth</b>	40MHz
---------------------------	-------

<b>Front to back ratio</b>	37.77
----------------------------	-------

<b>Polarization</b>	RHCP
---------------------	------

<b>Axial ratio</b>	0.14 dB
--------------------	---------

<b>Size</b>	7" x 7"
-------------	---------

<b>Operating Temperature</b>	-25° to 70°C
------------------------------	--------------
