Re: RF exposure information for BO13 - FCC ID X26BO13

**To Whom It May Concern:**

The requirements for determination of compliance and the preparation of an Environmental Assessment regarding human exposure to levels of radiofrequency radiation is regulated in CFR 47 1.1307(b). Such a study is necessary only for facilities, operations and transmitters that fall into the categories listed in table 1 of 1.1307 or those specified in paragraph (b)(2) of the same section.

BO13 does not fall into any of the categories listed in 1.1307(b)(2).

Consequently BO13 is categorically excluded from making a determination of compliance with the exposure limits in 1.1310 or 1.1093 and preparing eventually an Environmental Assessment.

With reference to "447498 D01 Mobile Portable RF Exposure", BO13 is classified as a Portable device and does not allow simultaneous transmission. The average output power of BO13 is 1 mW, which is below  $60/f_{(GHz)}$  mW.

Therefore BO13 is considered compliant with the rules for RF exposure without further test or analysis.

Sincerely,

---
