

Date: **December 12, 2014**

**Ref: Justification for placing the FCC ID/ IC in the manual for model BRIE:**

**FCC ID: X26BRIE**

**IC: 6941C-BRIE**

We, **GN Hearing A/S**, *Lautrupbjerg 7, 2750 Ballerup, Denmark*, hereby state that there are two main reasons why device state above does not have FCC/IC marks:

- 1) The top and bottom housing can be removed and they are not permanent locations to place the regulatory labels.
- 2) The only permanent location is the battery door, but it is too small to have visible text (smaller than 4-6 points).

Therefore, FCC ID and the IC information is included in the user manual will be supplied together with the device.

Sincerely,

**GN Hearing A/S**  
Lautrupbjerg 7  
DK-2750 Ballerup  
Denmark
