Re: RF exposure information for:
Product name: SAS-3 with FCC ID X26SAS-3

To Whom It May Concern:

SAS-3 is a portable device intended for use within 20 cm of humans and must demonstrate compliance to the either relevant SAR limits or demonstrate a maximum conducted output power less than the SAR exclusion thresholds pursuant to "KDB 447498 D01 General RF Exposure Guidance v05" at the specified distance to user and frequency range.

The properties of SAS-3 are as follows:

- Maximum average conducted output power: 8.9 mW
- Distance to user: 5 mm
- Frequency range: 2404 to 2478 MHz

Average power threshold according to KDB 447498 §4.3.1. is: 9.5 mW

The power threshold for SAR exclusion is respected; hence SAS-3 is compliant.

Sincerely,

Lars Hagander
