Re: RF exposure information for SY312e with FCC ID X26SY312e

**To Whom It May Concern:**

The requirements for determination of compliance and the preparation of an Environmental Assessment regarding human exposure to levels of radiofrequency radiation is regulated in CFR 47 1.1307(b). Such a study is necessary only for facilities, operations and transmitters that fall into the categories listed in table 1 of 1.1307 or those specified in paragraph (b)(2) of the same section.

SY312e does not fall into any of the categories listed in 1.1307(b)(2).

Consequently SY312e is categorically excluded from making a determination of compliance with the exposure limits in 1.1310 or 2.1093 and preparing eventually an Environmental Assessment.

With reference to "447498 D01 Mobile Portable RF Exposure", SY312e is classified as a Portable device and does not allow simultaneous transmission. The average output power of SY312e is below 94 dB $\mu$ V/m (0.75 mW EIRP), which is below 60/f<sub>(GHz)</sub> mW.

Therefore SY312e is considered compliant with the rules for RF exposure without further test or analysis.

Sincerely,

  
STEWART POLLEY on behalf of

Lars Hagander  
Vice President Corporate Quality
