Re: FCC ID: X32-RHKFO

To Whom It May Concern:

The following application is submitted on behalf of our client, iKeyless, LLC, for evaluation of their model 300-0271 for certification under FCC Part 15.231.

The 300-0271 is an aftermarket replacement remote for the keyless entry systems of automobiles. The remote features a plastic shell with a rubber insert, user buttons, a microcontroller with integrated transmitter, key blade, and a CR2032 battery. Under normal operation, when a user presses one of the buttons, a keyless entry signal is transmitted as an ASK modulation of a 315MHz carrier. The keyless entry signal consists of packets of data that may include serial numbers, function codes, checksums, and authentication codes.

The 300-0271 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads "R. Sam Wismer". The signature is written in a cursive style with a large initial 'R'.
