P.O. Box 370  
Newberry, Florida 32669

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for Approval of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This is a Portable approval of the TASER® AXON Tactical Computer with Com Hub & Head Cam (MN: 70000 / 70001 / 70009, FCC ID: X4GT00300ATC), which is a DSSS 802.15.4 ZigBee Low-Rate Wireless Personal Area Network (LR-WPAN). The AXON was tested as a stand alone device with an internal 900 MHz Ceramic Chip Antenna continuously transmitting.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Candelas".

Johnny Candelas
