

Lighting

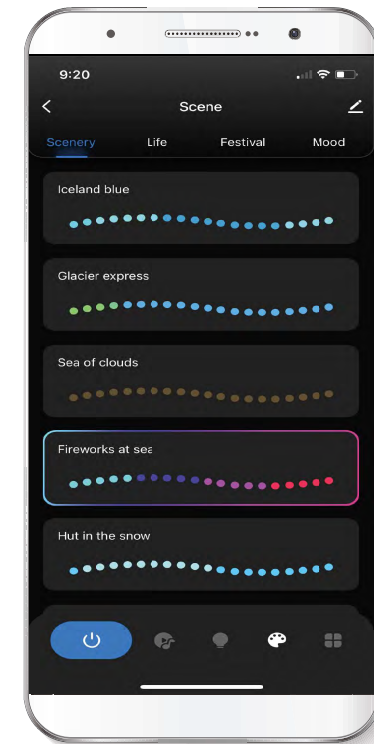

In Lighting (🏠), you can set up the properties of your light strip and use it just to illuminate your room.

- Click on **Color** and **Color card** to choose a single light tone for your light.
- Click on **Combination** to choose a mix of colors for your light.

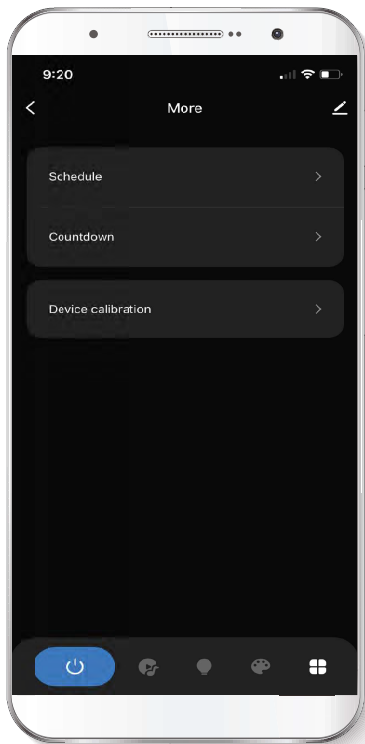

Color palette

This menu option will give you a series of scenes, which are sequences of colors to light up your room with a playful touch. Explore them and have fun!

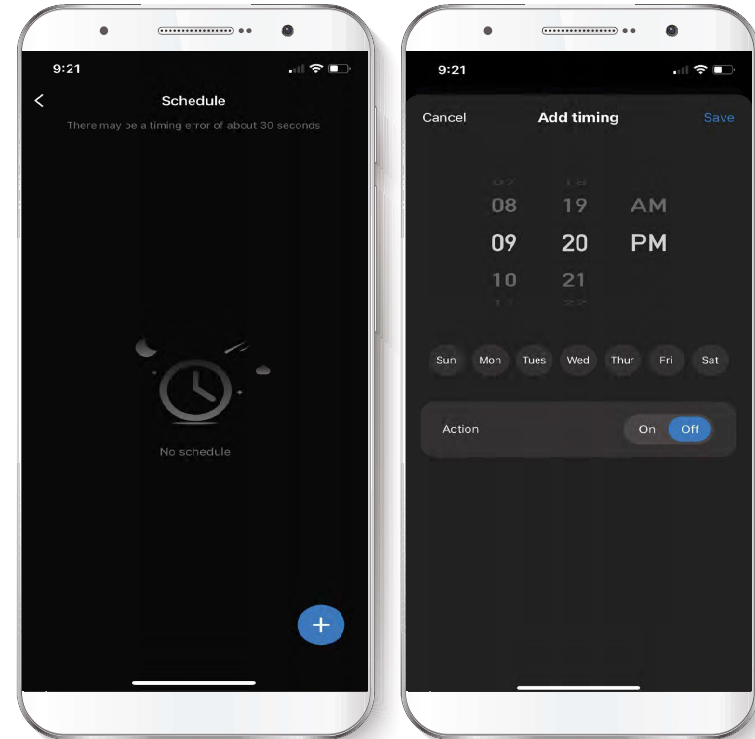

Time and re-calibration

This menu option (⌘) will allow you to create a schedule or countdown for your lights. If needs be, you can calibrate again your device.

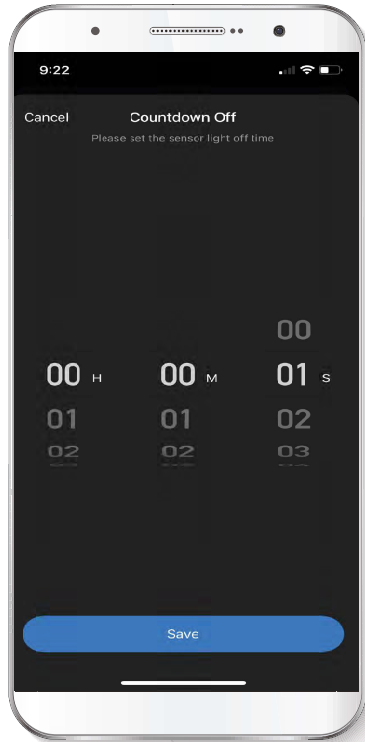

24

- **Schedule:** By clicking on this function, you can choose a time of the day for the lights to go on or off. Remember, you have to create a schedule to turn the lights on and another one to turn them off.

25

- **Countdown:** Use this function to set up the time remaining before the lights turn off.
- **Device Calibration:** As you saw on page 14 of this manual, you'll calibrate this light strip as soon as you add it to your Nexxt Home application. However, if you need to reinstall this device, you can go and recalibrate it using this option.

Settings

You'll find additional settings by clicking on the pencil icon on the upper right-hand corner of the screen. Here's a list of the functions under Settings:

Device information: Displays detailed information related to the TV backlight.

Device name: Changes the device's icon and name and also allows the user to assign it a different location in the house.

Tap-To-Run and Automation: Links the TV backlight with other smart products to automatically control them through a customized command.

Third-party control: Enables the voice recognition feature through Alexa, Siri and Google Assistant.

Share device: Allows sharing the TV backlight with family and friends.

Create group: Makes management of devices easier by selecting and arranging multiple components under a single group.

Location information: Allows access to the device's location, which is used for action or scene segmentation within the home.

Feedback: Click here to let us know if you have any issues setting up or using the product.

Add home screen: Creates a shortcut of the device to the main screen on your phone.

Device update: Here we'll inform you of new features or technical updates on your TV backlight.

Remove device: Allows you to unlink the device from the Nexxt Home account.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body. Use only the supplied antenna.
