Inquiry on 12/18/2014 :
Inquiry:
Sir and Madam?
Our product is USB dongle ?because the product is very small ?FCC ID is hardly to be print on the enclosure of the product ?is it ok if no label on the product but we print FCC ID number in usermanual ?

FCC response on 12/18/2014

2.2 Certification

Yes, if the device is subject to Certification: (1) Section 2.925 contains information on identification of the equipment; (2) include a label bearing an FCC Identifier (FCC ID) (Section 2.926) and (3) include the appropriate compliance statement in Section 15.19(a). If the labelling area is considered too small and therefore it is impractical (smaller than the palm of the hand) to display the compliance statement, then the statement may be placed in the user manual or product packaging. However, the device must still be labelled with the FCC ID. If the device is unquestionably too small for the FCC ID to be readable (smaller than 4-6 points), the FCC ID may be placed in the user manual. However, it must be determined that the device itself is too small - the label area allocated to the FCC ID may not be reduced because of over crowded identification of other product and regulatory information. Justification for placing the FCC ID in the manual must be submitted with the initial application for certification for review and approval.

Electronic display of the FCC ID may be used for Certification for devices that have an integrated display screen in lieu

of a physical label or nameplate. See attachment 784748 D02 e labeling for e-labelling guidance.
