The information contained herein is company confidential and is property of Selex ES S.p.A. and is supplied without liability for errors or omissions. No part may be reproduced, disclosed or used except as authorised by contract or other written permission. The copyright and the foregoing restriction on reproduction and use extend to all media in which the information may be embodied. Where this document is furnished in association with a quotation, tender or contract, the specifications, features, performance and availability dates which are relevant to such quotation, tender or contract shall be those specified in the schedule(s), specification(s), statement(s) of compliance or other documents specifically prepared for such purpose and shall not be assumed to be those stated or implied within this document.

Tune Up Information

This document applies to devices referred as follows.

FCC ID: X5YBSNODE-470

Product Name: BS Node-470

No tune up procedure is required by technician or user after the equipment has left the factory to match its specifications on the working frequency.

The BS Node-470 has no manual trimmers or adjustments that can be manually done on it acting directly on the BS Node itself.
