

Module Approval Request Letter

Subject: Modular Approval

Date: 2014-05-15

FCC ID: X6W-3N16E

We, Power-One Italy S.p.A. authorize UL Verification Service to have our model: WIFI LOGGER CARD, identified with FCC ID: X6W-3N16E approved under module approval authorization. The requirements regulated in Public Notice DA00-1407 have been fulfilled and clearly explained below.

1. The requirement of RF shielding: The radio portion is shielded and WIFI LOGGER CARD meets the FCC requirements without any further operation.
2. The requirement of buffered inputs: Buffered data inputs stage has been integrated in the microprocessor of the main board.
3. The requirement of power supply regulation: The part number of the power regulator is detailed in the attached file. The data logger has on-board power supply regulation and is therefore not reliant on any PSU regulation from the host equipment.
4. The requirements of section 15.203 and 15.204(C): The requirements of antenna connector and spurious emission have been fulfilled. Please refer to exhibition Test Report released by Prima Ricerca & Sviluppo S.r.l.
5. The requirement of stand-alone test configuration: please refer to exhibition Test Configuration Photo being part of file "TSupPhotos_131623".
6. The requirement of labelling: The instruction on the labelling rule of the end product has been stated in the Users manual of this module. Please also see the exhibition Label Sample.
7. The requirement of compliance on specific rule or operating requirements: The required FCC rule has been fulfilled and all the instructions for maintaining compliance has been clearly stated in the Users Manual.
8. The requirement of RF exposure: Please refer exhibition RF Exposure Test Report MPETR_131623 for the compliance of MPE RF exposure rule.
