

March 10th, 2010

TO: Whom it may concern,

This is to confirm that WLAN AP 8120 sold in to US & Canada are limited to operation across channels 1 through 11 in the 2.4GHz band and channels 36 through 48 in the 5150-5250 MHz band with no access for the user to modify the operating range outside of these settings.

Best Regards,

A handwritten signature in black ink, appearing to read "Vipin Naik", is written over a horizontal line.
