**Subject:** OET KnowledgeBase Inquiry Confirmation, Tracking Number 578277

Your inquiry has been received by the FCC and it's been assigned tracking number is **578277**.

**Subject:** C2PC for non-DFS Bands for device approved in DFS bands

We Are reviewing an application for a C2PC to FCC ID X7CAP8120. The device is currently certified to operate in the 2.4/5.8GHz DTS bands and 5150-5250/5250-5350/5470-5725 NII bands. The application converts the currently approved, integrated antenna to a configuration where the antenna is external and detachable and adds a new antenna type, also detachable. The application is limited to the DTS bands and the 5150-5250 NII band. The applicant has clearly stated the this new

**Question:** system configuration (detachable antenna) does not operate in the DFS bands and the end user cannot configure it operate in the DFS bands. When we issue the NII grants, do we keep all the existing bands in the Form 731 or do we limit the C2PC grant to just the 5150-5250 band? The applicant will be filing with the FCC to add the DFS bands at some time in the future and the original configuration will continue to be marketed, capable of operating in the DFS bands. Regards  
Mark
