**TO:** Whom it may concern

**Subject:** Avaya WLAN AP 8120 With External Antenna Radio operation in 2.4 GHz & 5 GHz bands

**Dear Sir/Madam,**

The band of operation for the radios is software controlled and cannot be changed by the user. Software allows only one radio to operate in the 5GHz band and one radio to operate in the 2.4GHz band. Even though both radios can operate in the 2.4GHz and 5 GHz band, software does not allow it i.e. both radios can never operate in the same band. There is no option for the user to change software setting.

If you have further question or concern, please let us know.

Best Regards,
