

- Lights up at night when you walk by; automatically triggers the other lights
- No wiring; add extra lights to your staircase and hallways
- Perfect for dark staircases, hallways, basements, attics, campers, workshops and boats

Where do I locate my Pathlights?

How do I mount my Pathlights to the wall?

- 1 Unscrew the mounting plates from the back of each unit. Fix the mounting plate to the wall using either the enclosed screws or the attached mounting tape. Make sure that the plate is level by referencing the "LEVEL LINE."

- 2 Insert 3 "AA" batteries into unit as indicated in battery compartment.

- 3 Match the unit to the mounting plate's guide. Rotate the unit clockwise. Your Pathlights are ready for use.

FCC Statement

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation. Note: The manufacturer is not responsible for ANY interference, for example RADIO or TV interference, caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

Note

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.
