

RF Exposure

FCC ID.: X8NOM2000A

Model OM 2000A+

RF exposure for the OM 2000A+ power amplifier is handled at the time of licensing. The product is for use with an Amateur band transceiver installed and operated under license. Amateur radio operators are expected to perform an rf exposure evaluation on their radio sites and report to the FCC. Guidance is given in OET Bulletin 65, Supplement B for evaluation of Amateur Radio installations.

There is an expectation that guidance be given by the equipment manufacturer in user documentation. Following is the guidance provided by the manufacturer in the user guide.

WARNING! The installation of this device must be compliant with CFR 47, 1.1310 of the Federal Communications Commission rules. Refer to guidance in OET Bulletin 65, Supplement B for more information on evaluation of the installation.
