

*AT&T Maestro™ 3*  
*User Guide*

*DOC20220115*

## *Getting started*

---

*The topics in this section will introduce you to your phone, help you get set up with service, provide an overview of the phone screen, and get you started with basic phone operations.*

# Introduction

The following topics describe the basics of using this guide and your new phone.

## About the user guide

Thank you for purchasing your new U626AA Smartphone. The following topics explain how best to use this guide to get the most out of your phone.

### Before using your phone

Read the *Safety Information Guide* that came with your device thoroughly for proper usage.

Accessible services may be limited by subscription contract conditions.

### Descriptions in the user guide

Note that most descriptions in this guide are based on your phone's setup at the time of purchase. Unless otherwise noted, instructions begin from the

phone's Home screen, which is displayed by pressing the Home button . Some operation descriptions may be simplified.

## Screenshots and key labels

Screenshots and other illustrations in this user guide may appear differently on your phone. Key labels are simplified for description purposes and differ from your phone's display.

## Other notations

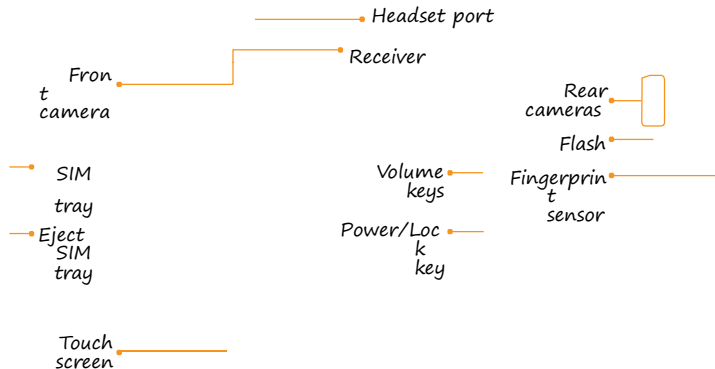

In the user guide, the phone may be referred to either as “phone,” “device,” or “handset.” A microSD™ or microSDHC™ card is referred to as an “SD card” or a “memory card.”

# Set up your phone

The following topics give you all the information you need to set up your phone and wireless service for the first time.

## Parts and functions

These topics illustrate your phone's primary parts and key functions.

Speaker

USB  
Type-C  
charging  
&  
accessory  
port

*Note: Your phone's screens and app layouts are subject to change. This user guide uses sample images only.*

Part	Description
Fingerprint sensor	Unlock your phone with a touch of your finger.
Flash	<ul style="list-style-type: none"> <li>• Brighten photos taken indoors or at night.</li> <li>• Use as a flashlight to see in dark areas.</li> </ul>
Front camera	Take pictures and record videos while facing the screen.
Headset port	Plug in a headset (sold separately) to listen to music or for convenient, hands-free
Microphone	Transmit your voice electronically for a call, voice recording, or Google Assistant.
Power key	<ul style="list-style-type: none"> <li>• Press to turn the screen on or off.</li> <li>• Press and hold to turn the phone on or off.</li> <li>• Press along with the Volume down key to</li> </ul>
Rear cameras	<ul style="list-style-type: none"> <li>• Take pictures and record videos with a 13+5+5 MP lens.</li> <li>• Use features such as the wide-angle lens,</li> </ul>

<i>Part</i>	<i>Description</i>
<i>Receiver</i>	<i>Hear the caller and automated prompts.</i>
<i>SIM tray</i>	<i>Insert your Nano SIM card and microSD for service and additional storage.</i>
<i>Speaker</i>	<i>Listen to calls, automated prompts, and music.</i>
<i>Touch screen</i>	<ul style="list-style-type: none"><li><i>• View information needed to operate your phone.</i></li><li><i>• Access your phone's features and applications.</i></li></ul>
<i>USB Type-C charging &amp; accessory port</i>	<i>Connect the USB cable (included) for charging, or connect other accessories.</i>
<i>Volume keys</i>	<i>Adjust the volume for ringtones, media, notifications, and system sounds.</i>

*CAUTION! Inserting an accessory into the incorrect jack may damage the phone.*

## Battery use

The following topics explain how to care for your phone's non-removable battery.

### Battery cautions

*Storage:* Avoid storing or leaving the phone with no charge remaining.

Saved information and settings may become lost or changed, or the battery may become unusable. Charge once every six months before storing or leaving unused for a long period of time.

## Charge the battery

Follow these instructions to charge your phone's battery using either the included AC adapter or via USB connection on your computer.

### Charge using the AC adapter

1. Connect one end of the data cable to the USB port located on the bottom of your phone.

2. *Connect the other end to the power adapter.*

3. Connect the power adapter to an electrical outlet to fully charge your phone.

- Use the power adapter that comes with your phone; using other adapters may damage your phone.
- Charging your phone with a USB cable connected to a laptop will take longer than with the power adapter.
- The phone will power off automatically when the battery is too low. Charge the battery if this happens. When the battery is critically low, the phone may need a few minutes to build a charge before turning back on. Playing games or performing other activities while charging may drain the battery and cause it to power off.
- The battery will gradually discharge if it is left unused for an extended period. Before using the battery again, you must recharge it in order to power on and use your phone normally.

## Install a SIM/SD card

### Insert a Nano SIM/microSD card

1. Insert the included SIM tray pin into the tray slot and remove the SIM tray.
2. Place the Nano SIM card and microSD card (not included) with metal contacts facing down into the tray.
3. Gently slide the SIM tray back into the slot.

## *First Time Setup after Inserting an SD Card*

*When you insert an optional SD card for the first time, it is recommended that you set up and format it on your phone.*

*Note: Formatting your SD card will erase all files on the card. Make sure to back up your files in another location before formatting.*

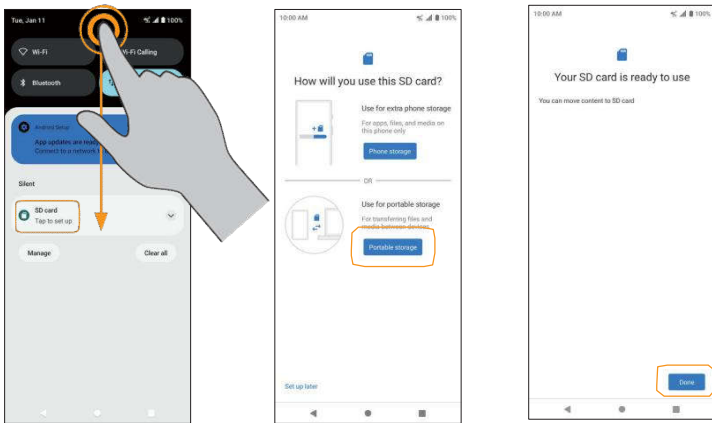

### *Set up an SD card*

- 1. Swipe down on the Status bar.*
- 2. Tap the SD card notification.*
- 3. Select Phone storage or Portable storage .*

*Note: Setting your SD card as portable storage will allow you to transfer files*

*(videos, music, and photos) from your device to another device.*

- 4. Tap Done.*

*Note: During the setup process, you may be prompted to format the SD card. Follow the prompts to finish the formatting. You can also setup and format your SD card via Settings menu, refer to the steps described below.*

### Format an SD card

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Storage .
3. Tap  > SD CARD > Menu .

4. Select Format, then tap **FORMAT SD CARD** to confirm.

All data on the SD card will be erased, and the card will be formatted for use on your phone.

## Turn your phone on and off

The instructions below explain how to turn your phone on and off.

### Turn your phone on

Press and hold the Power key until the device turns on.

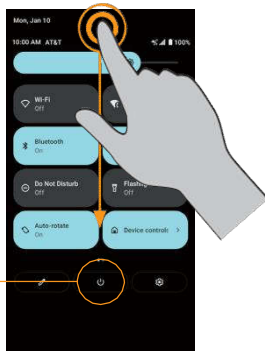

### Turn your phone off

There are two ways you can use to turn your phone off.

- Using Power key
  1. Press and hold the Power key.
  2. Tap Power off.
- Via Quick Settings Panel
  1. Swipe down on the Status bar twice to enter Quick Settings panel.
  2. Tap Power icon  > Power off.

Power icon

## Use the touch screen

Your phone's touch screen lets you control actions through a variety of touch gestures.

### Tap or touch

Tap or touch with your finger to type characters into the on-screen keyboard, select and open applications and settings, or press on-screen buttons.

### Touch and hold

Touch and hold an item to view available options (for example, a contact or link in a Web page), or to move icons or widgets.

### Swipe or slide

Quickly drag your finger vertically or horizontally across the screen to swipe or slide.

*Touch and hold your finger with slight pressure, then move your finger slowly across the screen to drag. While dragging, do not release your finger until you have reached the target position.*

## Rotate

Rotate the phone sideways to change the screen orientation from portrait to landscape automatically. When entering text, you can turn the phone sideways to bring up a bigger keyboard. See [“Touch screen keyboards” on page 40](#) for more details.

Note: To activate Auto-rotate mode, swipe up from Home screen to access Apps and tap Settings  > Display  > Advanced > Auto-rotate screen, and slide the switch to the On  position. You can also activate it by dragging the Status bar down twice and tapping Auto-rotate .

## Pinch and spread

Use your thumb and forefinger in a pinching motion on your screen to zoom out, or spread them to zoom in when viewing a picture or a web page. (Move fingers inward to zoom out and outward to zoom in.)

Complete the setup screens

Once your service has been activated, you will need to run Setup. The Setup Wizard will appear to guide you through the basic settings on your device. You will be prompted to select the language you want to use, set up your Wi-Fi connection, set a screen lock method, sign in to your Google™ Account, select location services, and more.

Follow the remaining instructions to finish your phone setup.

## *Basic operations*

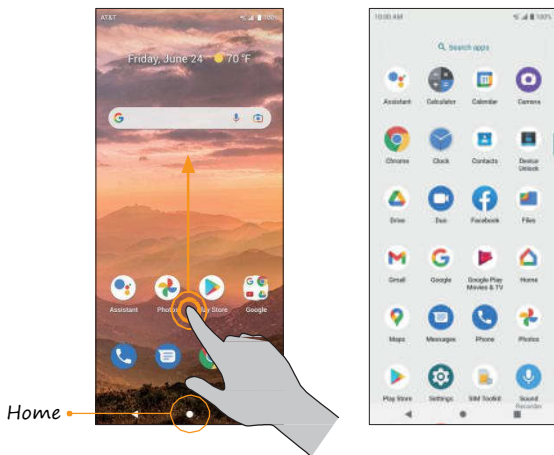

---

*The following topics outline basic features and operations of your phone.*

## Home screen and Apps list

Most of your phone's operations originate from the Home screen or the Apps (applications) list.

1. From any screen, press the Home button to display the Home screen.
2. From the Home screen, swipe up to access the Apps list.

For information about using the Home screen, see ["Home screen basics"](#) on [page 48](#).

## Select options and navigate screens

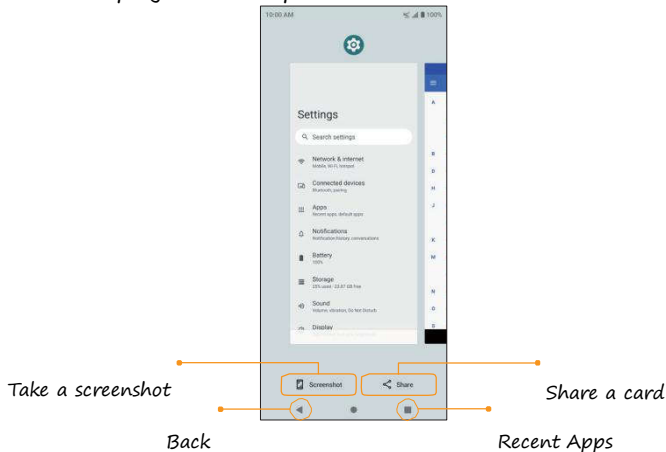

Tap icons, on-screen buttons, and other items to open or activate the assigned function.

- Tap the Back button  to return to the previous screen.

## Recent applications

View your recently used applications by tapping the Recent Apps button

. On recent applications screen, tap  Screenshot to take a screenshot of the current-displayed card, tap  Share to share the card.

## Switch between recently opened apps

You can easily switch between the apps you've recently opened.

Tap the Recent Apps button  to see your recently opened apps.

Tap to clear all apps

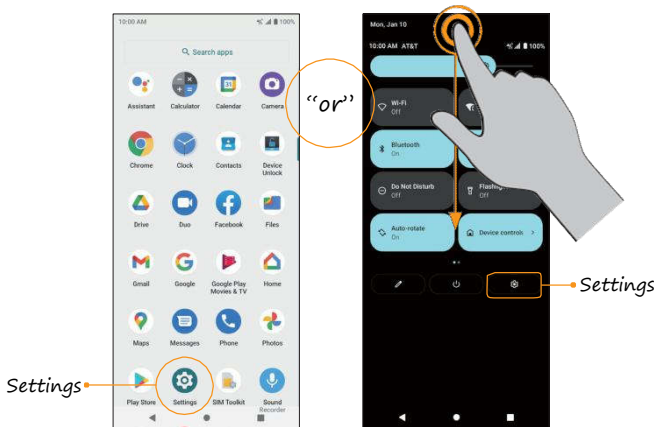

1. Swipe right or left through the cards to find an app and tap it.
2. To close an app, swipe up on it.
3. To close all of the apps and clear the list, slide to the far left of the list and tap CLEAR ALL .

You can tap the Recent Apps button  twice to switch between the two most recently used apps quickly.

## Phone settings menu

You can customize your phone's settings and options in the Settings menu. There are two ways to access the Settings menu:

- From the Home screen, swipe up to access Apps and tap Settings 
- From any screen, swipe the Status bar down twice to access Quick Settings Panel and tap Settings 

For more information, see ["Basic settings" on page 140](#).

## Portrait and landscape screen orientation

The default orientation for your phone's screen is portrait (vertical), but many apps will change to landscape orientation (horizontal or widescreen) when the phone is rotated sideways.

Note: Not all screens can be used in landscape orientation.

Turn screen rotation on or off

- Drag the Status bar down twice and tap Auto-rotate  to turn it on or off.

- You can also set the rotation option from the Settings menu. From the Home screen, swipe up to access Apps and tap Settings . Tap Display  > Advanced > Auto-rotate screen and slide the switch to the

On  or Off  position to activate or deactivate screen rotation.

## Capture screenshots

To capture a screenshot, press and hold the Power key and Volume down key at the same time to capture a screenshot of the current screen.

Your screenshots will be stored in the Screenshots folder in the Photos app. From the Home screen, tap Photos  > Screenshots.

## Applications

The following topics describe how to access the Apps list and launch applications on your phone.

### Launch apps

All installed apps can be accessed and launched from the Apps list.

1. From the Home screen, swipe up to access the Apps list.
2. Tap an app icon to launch the app.

## Work with apps

### Group app folders

1. From the Home screen, tap a group app folder to open and tap an app shortcut to launch the app.
2. To add more apps to the folder, drag each app over to the folder. See ["Add App folders to the Home screen"](#) on page 60.

Tap folder

## App shortcuts

Tap and hold an app icon on the Home screen or Apps list to display a shortcut menu that lets you quickly access common app functions.

Note: Not all apps support the App shortcuts feature.

## Control app permissions

The first time you open an app, you'll be asked to grant permissions to access certain data or features. This ensures that you have full control of which apps have authorized access.

If you don't want to grant access to an app, choose DENY. If you choose DENY in a trusted app, you may not be able to use the app or access all the functions. To modify permission settings, follow the steps below:

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Apps  and tap the app you want to modify permissions for.
3. Tap Permissions to view the apps you've allowed or didn't allowed
4. Tap an app and select Allow or Don't allow to adjust the permission settings.

Note: These options may vary.

5. You can also access permission settings by touching and holding the app on the Home screen or Apps list, tapping App info  to access the app info screen, and then tapping Permissions .

## Set default apps

You can choose default apps for web browsing, text messaging, and more.

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Apps  > Default apps.
3. Choose your default web browser, phone app, messaging app, and more.

## Choose default apps

Some actions can be performed with more than one app. When performing an action for the first time, you may be prompted to choose an app. You can choose to use an app only this time by tapping **JUST ONCE**, or tap **ALWAYS** to set that app as the default.

You can change the default app at any time in the Settings menu.

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap Apps  > Default apps.

To change the default app for opening links, continue with the steps below:

1. Tap Apps  > Default apps > Opening links.

2. Tap the app you want to set and tap **Open supported links** to allow the listed verified web links to open in this app.

## Disable an app

You can disable some default apps which can't be uninstalled to avoid them running in the background and downloading data.

1. From the Home screen, swipe up to access Apps, and tap Settings 

2. Tap Apps  > See all apps.

3. Tap the app you want to disable to access App info screen.

4. Tap DISABLE .

Tip: You can also disable apps by touching and holding  the app on the Home screen or in the Apps list, tapping App info  to access the App 42

*info screen, and tapping DISABLE .*

## Apps list

The Apps list expands to include any apps you download and install on your phone. The following table outlines the primary apps that have been preinstalled on your phone.

App	Function/Service
 Assistant	Use voice assistant to trigger apps and devices, ask all kinds of questions, make plans, and
 Calculator	Perform basic and advanced mathematical calculations.
 Calendar	Create and manage events, meetings, and appointments, organize your time, and
 Camera	Take and share pictures and videos. Use Google Lens to search what you see, get
 Chrome	Surf the Internet with Google's easy-to-use web browser.
 Clock	Set alarms, view time zones around the world, set a timer, use a stopwatch, manage your

# Phone number

Follow the instructions below to view your phone number.

1. From the Home screen, swipe up to access Apps and tap Settings 

2. Tap About phone 

3. You will see the phone number listed under Phone number.

Phone number

## Airplane mode

Airplane mode turns off all functions that emit or receive signals while leaving your phone on so you can use apps that don't require a signal or data.

### To turn on Airplane mode

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Network & internet  > Airplane mode.
3. Slide the switch to the On  position to activate Airplane mode. You will see the Airplane mode icon in the Status bar.

### To turn off Airplane mode

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Network & internet  > Airplane mode.
3. Slide the switch to the Off  position to deactivate Airplane mode. Your phone's wireless connection features will be restored.

Tip: You can also access Airplane mode through the Quick Settings menu. Swipe the Status bar down twice to access the Quick Settings menu,

swipe to

the right to locate Airplane mode , and tap it to enable or disable data transmissions.

## Enter text

You can type on your phone using one of the available touch screen keyboards or Google Voice Typing.

### Touch screen keyboards

Your phone offers Google touch screen keyboards for entering text. The keyboard appears automatically on-screen when you tap a text entry field, and can be used in either portrait or landscape mode. You can also use Google Voice Typing to enter text using your voice (see [“Google Voice Typing” on page 41](#) for details).

Note: Keyboard layouts and options may change depending on the app currently in use. For example, if you're entering text into a web search, a Search icon may appear instead of an Enter icon.

## Google keyboard

The Google keyboard offers a traditional QWERTY keyboard setup for entering text by tapping keys (like on a computer), along with options that allow

you to enter text faster and more accurately, such as continuous key input, personalized usage dictionaries, and more.

## Access Google keyboard settings

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap System  > Languages & input > On-screen keyboard > Gboard.

## Google Voice Typing

Google Voice Typing uses Google Voice recognition to convert speech to text.

1. From Messages, tap  and speak.

## Tips for editing text

Your phone has many options to make entering text easier, including copying, cutting, and pasting text, using voice-to-text input, customizing the user dictionary, using predictive text, and more.

To edit text you have already entered

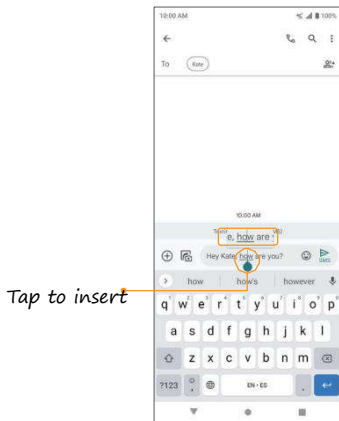

1. Touch and hold or double-tap the text you would like to edit.
2. Drag the tabs to adjust the highlighted selection.
3. The following options will appear: Cut, Copy, Paste (if you have text copied on the clipboard), Share, and Select all (if there is more than one word available to select).

Tap and hold  
or double-tap  
to select text

To insert new text

1. Touch where you want to type, the cursor and tab will appear. Drag the tab to move the cursor.
2. Tap the tab to view the pop-up menu, then tap Paste to insert any text you have previously copied.

## Google Account

You will need a Google Account to access several phone features, such as Gmail, Google Maps, Duo, and Google Play Store. Enter your Google Account information to access Google apps. These apps sync between your phone and your online Google Account.

### Create a Google Account

If you do not already have a Google Account, you can create one online or using your phone.

Note: You can also create and sign into your Google/Gmail account from the Settings menu.

### Create a Google Account online

1. Using a computer, visit [google.com](http://google.com).
2. On the main page, click Sign in > Create account > For myself.
3. Follow the prompts to set up your account:
  - a. Enter your first and last name, a desired username/Gmail address, and create and confirm a password.
  - b. Add a phone number or secondary email for security (optional).
  - c. Enter basic personal information.

4. Tap I agree to accept Google's Privacy and Terms and finish your Google Account setup.

## Create a Google Account using your phone

1. From the Home screen, swipe up to access Apps and tap Settings 

2. Tap Passwords & accounts  > Add account.

3. Tap Google and then tap Create account > For myself.

4. Follow the prompts to set up your account. Tap Next to proceed between steps, which may include:

- Enter your basic information such as first and last name.
- Enter a desired username/Gmail address.
- Create and confirm a password.

- d. Add a phone number for security or tap Skip .*
- e. Review your account info. Tap Next to confirm .*

5. Tap I agree to accept Google's Privacy and Terms and finish your Google Account setup.

## Sign in to your Google Account

If you have a Google Account but have not yet signed in with your phone, follow these instructions to sign in to your Google Account.

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Passwords & accounts  > Add account > Google.
3. Enter your email address or phone number and tap Next.
4. Enter your password and tap Next.
5. To sync your account information, tap your account. Select the apps you would like to sync with your phone and then tap Menu  > Sync now.

Tap to Sync

Important: AT&T policies often do not apply to third-party applications. Third-party applications may access your personal information or require us to disclose your customer information to the third-party application provider. To find out how a third-party application will collect, access, use, or disclose your personal information, check the application provider's policies, which can usually be found on their website. If you aren't comfortable with the third-party application's policies, do not use the application.

## Lock and unlock your screen

You can quickly turn your phone screen off when not in use, and unlock it when you need it.

Note: For information on how to adjust the time before the screen turns off, see ["Display" on page 173](#).

### Turn the screen off when not in use

To quickly turn the screen off, press the Power key. Pressing the Power key again or receiving an incoming call will turn on your phone screen and display the lock screen.

To save battery power, your phone screen will automatically turn off after being idle for a period of time. You will still be able to receive messages and calls while the phone's screen is off.

Turn the screen on and unlock it

1. To turn the screen on, press the Power key.
2. Swipe up from the bottom of the screen to unlock it.

If you have set up a screen lock, you will be prompted to unlock your phone. See [“Screen lock” on page 182](#) for details.

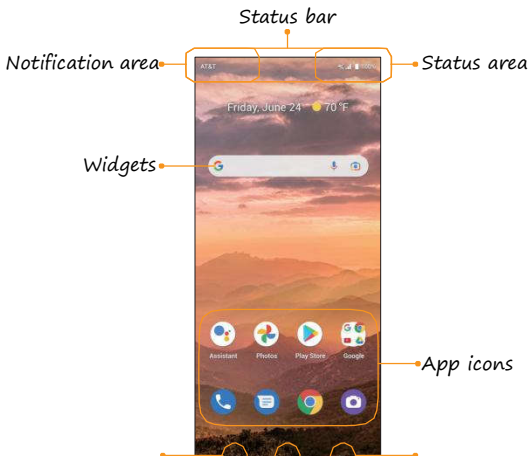

The following topics describe how to use and customize your phone's home screen, understand the Status bar, and use the Notification panel.

## Home screen basics

The Home screen is the starting point for your phone's applications, functions, and menus. You can customize your Home screen by adding application icons, shortcuts, folders, widgets, and more.

### Home screen layout

Your Home screen extends beyond the initial screen. Swipe right to display additional screens.

*Back button*

*Recent Apps button*

*Home button*

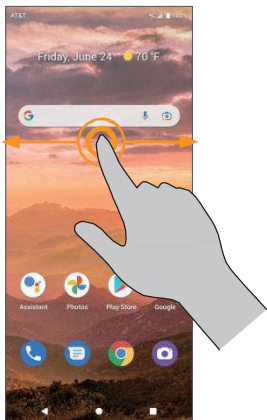

Item	Description
App icons	Add shortcuts to your favorite apps to the home screen.
Back button 	Tap to return to the previous screen.
Home button 	Tap to display the main Home screen.
Notification area	View notifications for incoming messages, missed calls, application updates, and more. Drag the Status bar down to display the
Recent Apps button 	<ul style="list-style-type: none"> <li>• Tap to display a list of recently used apps.</li> <li>• Double-tap to swap between your last</li> </ul>
Status area	View phone and service status information such as signal strength, battery status, Wi-Fi and data connectivity, ringer status, and
Status bar	Icons indicate your phone's status (on the right side) and notifications (on the left side).
Widgets	Add customizable quick access to app functions on your phone's Home

## Extended home screens

In addition to the main Home screen, your phone features extended Home screens to provide more space for adding icons, widgets, and more. Press

the Home button  to display the main Home screen, then swipe to the right to move from the main screen to an extended screen.

Tip: While on an extended screen, press the Home button  to return to the main Home screen.

## Status bar and Notification panel

Quickly view your phone's status and notifications at the top of the screen.

### Status bar

The Status bar at the top of the Home screen provides phone and service status information on the right side and notification alerts on the left. To view the Notification panel or access the Quick Settings menu, drag the Status bar down from the top of the screen.

### Main status icons (Right side)

Icon	Status
	4G LTE data service
	Airplane mode enabled
	Battery (charging)
	Battery (full charge)
	Bluetooth® connected
	GPS in use

	<i>Headphones</i>
--	-------------------

Icon	Status
	<i>Hotspot</i>
	<i>Mute on</i>
	<i>Network (full signal)</i>
	<i>No Network</i>
	<i>Mobile data unavailable</i>
	<i>Speakerphone enabled</i>
	<i>Vibrate on</i>
	<i>Wi-Fi® enabled</i>
	<i>Wi-Fi® Calling enabled</i>

## Main notification icons (Left side)

Icon	Notification
	Alarm
	Download
	Event
	Keyboard active
	Missed call
	New Gmail
	New text or MMS message
	New voicemail
	Software update available
	USB tethering
	Update successful
	Warning
	Wi-Fi <sup>®</sup> Calling
	Wi-Fi network available

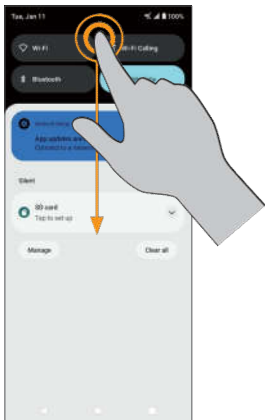

*Note: Additional notification icons may appear. All notifications may be accessed through the Notification panel.*

## *Notification panel*

*Your phone's notifications appear on the left side of the Status bar. Access the full Notification panel by dragging down the Status bar to check notifications, download updates, open messaging apps, access the Quick Settings menu, and more.*

### *Open the Notification panel*

*1. Swipe down on the Status bar.*

2. To check notifications, tap an item in the list.

## Close the Notification panel

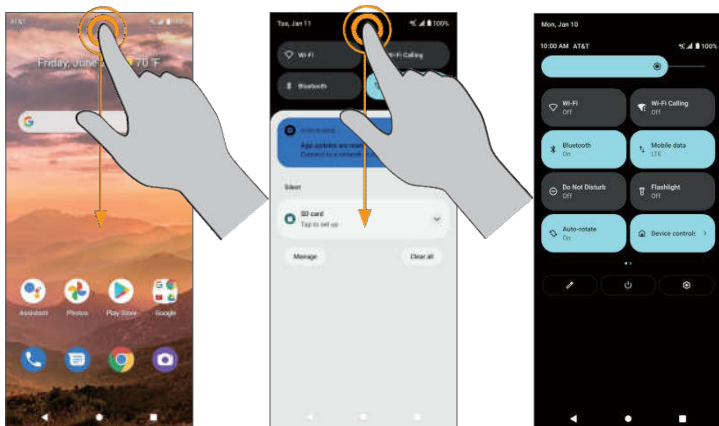

Swipe up to close the Notification panel or tap the Back button ◀.

## Notification panel layout

The Notification panel gives you access to both notifications and the Quick Settings menu.

To access the Quick Settings menu:

1. Swipe the Status bar down to display the Notification panel.
2. Swipe the Status bar down again to access the full Quick Settings menu.

## *Customize the Home screen*

*Learn how to set the wallpaper and add, move, or remove shortcuts, widgets, and folders from the Home screen.*

### *Operations for rearranging the Home screen*

*To move widgets and app shortcuts icons*

*From the Home screen, touch and hold an app or widget and drag it to the desired location.*

*To delete widgets and app shortcuts icons*

*From the Home screen, touch and hold an app or widget and drag it to  Remove at the top of the screen to delete from the Home screen.*

*To display the Home screen menu*

*From the Home screen, touch and hold an empty space to display the Home screen menu. Change wallpapers, add widgets, and adjust other Home screen settings from the Home screen menu.*

## Change the wallpaper

1. From the Home screen, touch and hold an empty space, then tap Wallpapers on the Home screen menu.

Tip: You can also access the Wallpapers menu from the Settings menu. From the Home screen, swipe up to access Apps and tap Settings  > Display > Wallpaper.

Touch and hold an empty space

Tap Wallpapers

Choose a wallpaper

Choose where to apply wallpaper

2. Choose to select the wallpaper from your photos or standard wallpapers on the phone.

3. Tap *Set wallpaper* at the top of the screen and choose to set the wallpaper on the Home screen, Lock screen, or both.

## *Add shortcuts to the Home screen*

*Add shortcuts for quick access to favorite apps from the Home screen.*

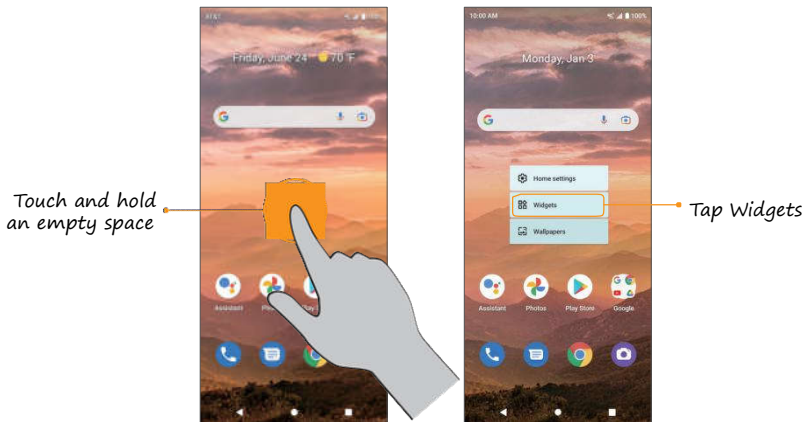

- 1. From the Home screen, swipe up to access Apps .*
- 2. Touch and hold an app icon, then drag to move it.*
- 3. Drag the icon to an empty location on one of the Home screens.*

*The shortcut will be added to the Home screen.*

## *Add widgets to the Home screen*

*Widgets are self-contained apps on the Home screen. Unlike a shortcut, which will open an app, widgets can perform certain functions without navigating away from the Home screen. You can create widgets for a specific contact, for bookmarks to web pages, your calendar, email, and more.*

1. From the Home screen, touch and hold an empty space, and then tap *Widgets* in the Home screen menu.

2. Touch and hold a widget, then drag it to an empty location on one of the Home screens. The widget will be added to the Home screen.

## Add App folders to the Home screen

You can group Home screen shortcuts into folders for convenient access.

1. Drag an app icon and release it over another app icon on the Home screen to create a folder.

Drag an icon over another icon

Tap to edit folder name

Enter folder name

2. Type a name for the folder, and then tap .
3. To add more app shortcuts to the folder, touch and hold an app icon

*and drag it on top of the new folder.*

## Change folder names

Once you have added folders, you can change the name easily from the folder display.

1. Tap the folder to open it.
2. Tap the folder name, type a new name, and then tap .

## Remove folder

1. Touch and hold a folder and drag it to  Remove at the top of the screen.

## Remove apps from a folder

1. Tap a folder to open it.
2. Touch and hold an app in the folder and drag it to the Home screen or to   
Remove at the top of the screen.

## Making connections

The topics in this section will explain how to help you make connections, from phone calls and maintaining contacts, to text messages, email,

*Internet, and international services.*

# Phone

## Make a call

From the Home screen, tap Phone .

- If the keypad does not appear on the screen, tap  to open it.
- Enter a phone number in the keypad to make a call. Tap  to make a Voice Call.
- To view recent calls, tap the Recents  tab.
- During a call, you can tap  at the bottom of the screen to hang up.

- Calls can also be made from other apps that contain your contact information. Simply tap the phone number to make a call.

## Make a call with Wi-Fi Calling

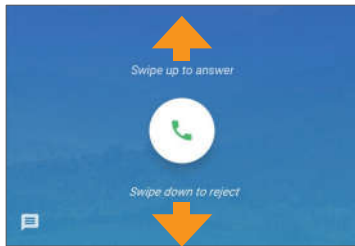

1. From the Home screen, tap Phone .
2. If the keypad does not appear on the screen, tap  to open it. Enter a phone number in the keypad to make a call.
3. Tap  to make the call.
4. During a call, you can tap  at the bottom of the screen to hang up.

Note: You must have an active Wi-Fi connection to send or receive calls and messages with Wi-Fi Calling. Wi-Fi Calling service must be activated on the device before it can be used (see [“Wi-Fi Calling” on page 145](#)).

## Receive a call

The Incoming Call screen is displayed when a call is received, along with the caller's numbers and other information you've entered for that contact. When you receive a phone call from someone who is not stored in Contacts, only the default caller ID icon and phone number appear on the Incoming Call screen.

- To answer a call, swipe  up.
- To reject a call, swipe  down.

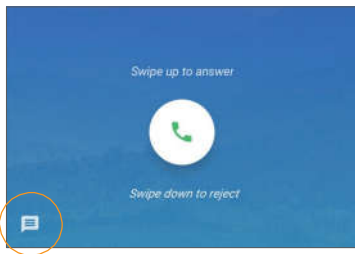

- Press any side key to mute the ringer.
- Any missed calls are logged in Recents  .

## Reject a call and send a text message

You can reject an incoming call and automatically send a quick response text message to the caller.

1. When a call arrives, swipe  up from the bottom left corner of the screen. The ringtone or vibration will stop, and you will see a list of quick preset responses.

Tap one of the messages or write your own to send to the caller.

You can edit the preset quick responses from the Call Settings menu.

From the Phone app, tap Menu  > Settings > Quick responses and edit the quick responses.

## In-call screen layout and operations

While you're on a call, you will see a number of on-screen options.

### In-call screen layout

Tap the on-screen options to activate them during a call.

On-screen options

## On-screen options

	Item	Description
	Overflow Menu	Tap and select Switch to RTT to send the caller a Real-time text during a call
	Speaker	Tap to turn the speakerphone on or off. Warning: Because of higher volume levels, do not place the phone near your ear
	Mute	Mute the microphone during an active call. Tap again to unmute the microphone.
	Keypad	Tap to show the on-screen keypad. Use the keypad to enter additional numbers, for
	Hold	Tap to hold the current call.
	Add call	Tap to initiate a 3-way conference call.
	End call	End the current call.
	Merge	Join two currently active calls (conference).

	<p>Swap</p>	<p>Swap the calls.</p>

Tap it again to route the call back to the connected Bluetooth headset.</li> </ul> <p>When Bluetooth or the Bluetooth headset is</p>
	<p>Hang up all</p>	<p>Hang up all active calls.</p>
	<p>Hang up holding</p>	<p>Hang up on hold calls.</p>

## Place a call from Contacts

You can place phone calls directly from your Contacts list.

1. From the Home screen, tap Phone .
2. Tap Contacts  to display the Contacts list.

3. Tap a contact.
4. Tap a contact's number to call to place a call.
5. To end the call, tap .

## Call from Recents

The Recents list allows you to view recently received, placed, or missed calls.

1. From the Home screen, tap Phone .
2. Tap Recents  to display the Call Log.
3. Tap  to place a call.

Tap to return call

- You can tap a contact in the Call Log to display more options.
  - Create new contact: Create a new contact from an unknown number.
  - Add to a contact: Add an unknown number to an existing contact.
  - Send a message: Send a text message to the contact/number.
  - Block number: Block the contact/number.
  - Call details: View detailed call information.

Tap a contact to display options

## Call settings

Configure your voicemail options and a number of other settings for your calls.

### Call settings options

1. From the Home screen, tap Phone  .
2. Tap Menu  > Settings .
3. Configure your phone settings.

## Call settings options

Setting	Description
Display options	Choose how to sort and display your contacts.
Sounds and vibration	Adjust call and ringtone volume, change your alert tones, activate Do Not Disturb, and more.
Quick responses	Edit or create quick response text messages. See <a href="#"><u>“Reject a call and send a text message”</u></a> on page 66 for more information.
Calls	Set call forwarding, call barring, and more.
Blocked numbers	Manage numbers and contacts you have blocked.
Voicemail	Set up voicemail, manage notifications, and more.
Accessibility	Configure RTT settings, enable or disable hearing aid compatibility, and enable or disable noise reduction.
About	View more information about your phone.

# Contacts

## Add a contact

You can add contacts from the Contacts app. Enter details such as name, phone numbers, email addresses, mailing address, and more.

1. From the Home screen, swipe up and tap Contacts

2. Tap  to add a contact.

3. If you have multiple accounts on your phone, select where you want to save the contact.

- *Select Phone contact to save your contact on your phone only; they will not be synced with your Google Account.*

- Select an account such as Google to save the contact to that account. These will be synced automatically with your account.
- Select your SIM card or SD card name to save the contact to your SIM card or SD card. Your contact will be available on any phone your SIM card or SD card is mounted in.

Tap to add photo

Add contact information

4. Use the keyboard to enter information.

Note: To select a type (label) for a phone number, email address or postal address (such as Mobile, Home, Work, etc), tap the arrow and select the appropriate type.

5. When you are finished, tap SAVE.

## Save a phone number

You can save a phone number to Contacts directly from the phone keypad.

1. From the Home screen, tap Phone  > Keypad .
2. Enter a phone number and tap Create new contact to add a new contact or tap Add to a contact to add the number to an existing contact.

3. To add the number to an existing contact, tap the contact you want

*to update and add the number to the desired field. To add a new contact, enter the name and any additional information.*

4. Tap *SAVE*.

## View contacts

View a contact's details.

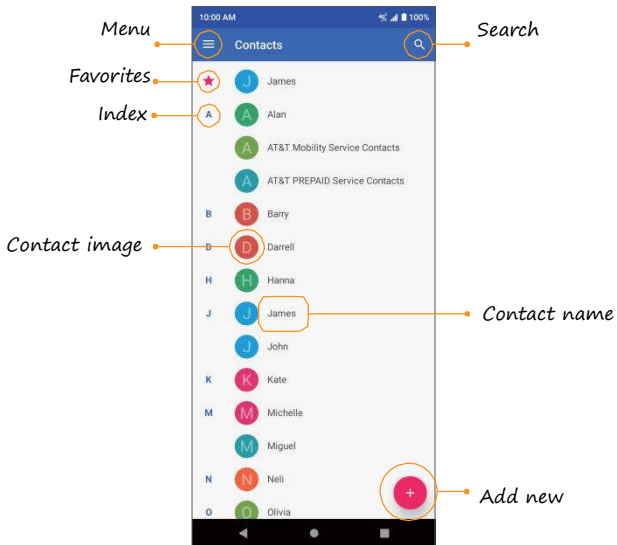

1. From the Home screen, swipe up and tap **Contacts**

2. Tap a contact to view their details.

## Contacts screen layout

## Contacts screen options

Item	Description
<i>Add new</i>	<i>Add a new contact.</i>
<i>Contact</i>	<i>Tap to show a contact's details, place a call, send a message, and more.</i>
<i>Favorites</i>	<i>Add a contact as a favorite. You can view your favorite contacts in the Phone app.</i>
<i>Index</i>	<i>Browse contacts alphabetically.</i>
<i>Menu</i>	<i>View your contacts by labels or accounts, and adjust settings.</i>
<i>Search</i>	<i>Search contacts.</i>

## Edit a contact

Add or edit a contact's information, assign a photo, customize with a unique ringtone, and more.

1. From the Home screen, swipe up and tap **Contacts** .

2. Tap a contact to view their details

3. Tap **Edit**  .

4. Tap the field you want to change or add.

5. Add or edit the information, and then tap **SAVE** .

*Note: To select a category for a phone number, email address, or postal address (such as Mobile, Home, Work, etc.), tap the arrow near the field.*

## Delete a contact

You can delete a contact from the contacts details page

1. From the Home screen, swipe up and tap **Contacts**

2. Tap a contact to view its details.

3. Tap Menu  > Delete.

4. Tap **DELETE**.

## Share a contact

You can quickly share contacts using Bluetooth, Gmail, or text messages.

1. From the Home screen, swipe up and tap Contacts .
2. Tap a contact and tap Menu  > Share.
3. Select how you'd like to share the contact information card (vCard).

- **NEARBY:** Send the vCard to a nearby device. See ["Nearby Share" on page 157](#) for more information about nearby share.
- **Messages:** Send the vCard in a text message. You can send the information in an existing conversation thread or create a message for a new conversation thread. See ["Send a multimedia message"](#)

(MMS)” on page 85 for more information about sending messages.

- Gmail: Send the vCard as a Gmail attachment. See “Create and send an email message” on page 90 for more information on sending emails.

- *Bluetooth: Send the vCard via Bluetooth. See [“Bluetooth” on page 10](#)  for information on pairing and sending via Bluetooth.*
- *Drive: Save the vCard to your Google Drive.*

## Messaging

*Message anyone from anywhere with the reliability of texting and the richness of chat. Stay in touch with friends and family, send group texts, and share your favorite pictures, GIFs, emoji, stickers, videos and audio messages.*

### Text and multimedia messages

- *With text messages (SMS), you can send and receive instant text messages.*
- *Multimedia messages (MMS) can contain text, photos, audio and video files, contact information cards (vCard), and more.*

*Note: See your service plan for applicable charges for messaging.*

### Send a text message (SMS)

1. From the Home screen, tap Messages .

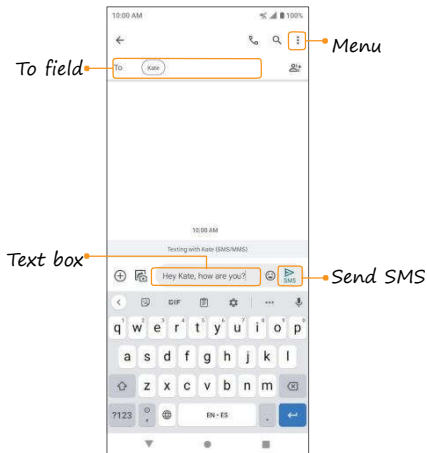

2. Tap .

3. Enter a contact name or mobile number in the To field.

- Enter phone numbers, contact names, or email addresses directly in the To field. As you enter information, any matching phone numbers from your contacts list are displayed. Tap the matching contact to add them as a recipient.
- Scroll to find and select the contacts to whom you want to send the message. You can also create contact groups as recipients.

4. Tap the text box and compose your message.

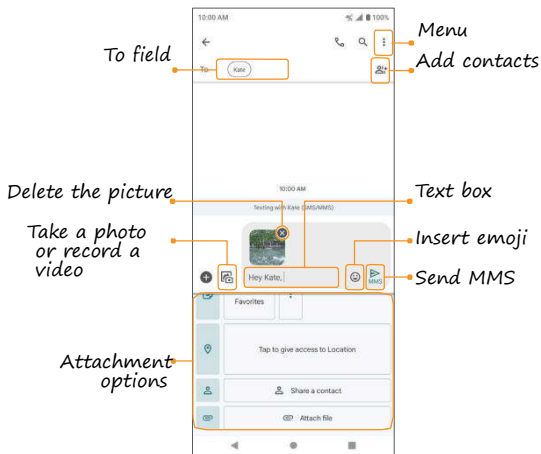

Note: Messages exceeding a limited amount of characters will be delivered as one message but may incur additional charges. A counter appears above Send  to tell you how many characters you have entered and how many characters are left.

5. When done, tap Send  to send the text message.

Note: Your text message automatically becomes a multimedia message if you enter an email address as the recipient, attach an item, or compose a very long message.

## Send a multimedia message (MMS)

1. From the Home screen, tap Messages .
2. Tap .
3. Fill in one or more recipients. See [“Send a text message \(SMS\)”](#) on page [83](#) for more information on entering recipients.
4. Tap the text box to compose your message.
5. Tap Add  to the left side of the text box to attach files.

Note: Attachment options may vary.

6. After adding an attachment, you can tap to view it, and tap  to delete the attachment.

## Attachment options

Item	Description
	Take a photo or record a video to send, or select a saved photo or video files from Photos to send.
	Insert emoji.
	Add GIFs.
	Add stickers.
	Share your location.
	Share vCards.
	Select one or more files from Files to send.

7. Tap  to send the MMS message.

# Chat features

With Chat features, you can send and receive messages over Wi-Fi or your data network, see when friends are typing or when they have read your message, share images and videos in high quality, and more.

Note: To use Chat features, you and the recipients must have a service plan that supports Chat and have Chat capable devices with chat features turned on.

To enable Chat features on your phone, follow the steps below:

1. From the Home screen, tap Messages .
2. Tap Menu  > Settings > Chat features.
3. Slide the Enable chat features switch to the On  position to enable it.

1:1 Chat

Group Chat

View read receipts

Share large files

*Typing indicator*

## Messages settings

1. From the Home screen, tap Messages .

2. Tap Menu  > Settings.

### Chat features

- Enable chat features: Slide the switch to the On  position to enable chat features.
- Send read receipts: Slide the switch to the On  position to let others to know when you have read their message.
- Show typing indicators: Slide the switch to the On  position to show your typing status to others.
- Auto-download files you receive over mobile data: Choose the maximum file size that can be automatically downloaded.
- Learn more about chat features: Get more information about chat features.

### Notifications

Enable or disable notification icons when messages are received.

### Bubbles

Enable or disable message bubbles by selecting All conversations can bubble, Selected conversations can bubble, or Nothing can bubble.

### Hear outgoing message sounds

Slide the switch to the On  or Off  position to enable or disable sounds when sending messages.

## Your current country

Display your current country.

## Automatic previews

Enable or disable automatic preview cards for links, places, and other content that the Messages app is able to recognize over time.

## Spam protection

Enable or disable spam detection function and report to Google.

## Advanced

- **Group messaging:** Enable or disable the ability to send MMS messages to multiple recipients in a group.
- **Auto-download MMS:** Enable or disable the ability to automatically retrieve and download incoming MMS messages.
- **Use simple characters:** Slide the switch to the On  position to convert the text's special characters into a simple message.
- **Get SMS delivery reports:** Slide the switch to the On  position to get a report when an SMS message is delivered.
- **Wireless emergency alerts:** View alert messages you've received.
- **SIM card messages:** View messages saved on your SIM card.

- *Google Fi settings: Sign in to your Google Fi account to sync texts, calls & voicemail across screens.*
- *Phone number: View your phone number.*

### *About, terms & privacy*

*View more information about Message's current version, privacy policy, and terms of service.*

# Gmail

Use Gmail to send, receive, and manage your email messages. Before using Gmail, you must sign into your Google Account on your phone. See [“Google Account”](#) on page 44 for details on signing in or creating an account.

Note: You can use the Gmail app to manage email for other accounts, such as Yahoo!, Hotmail, Outlook, and more.

## Create and send an email message

1. From the Home Screen, open the Google folder, tap Gmail

Tip: You can also access Gmail by swiping up on the Home screen.

Manage meetings

Compose new mail

Recipient

Subject

Message

Send email

Menu

Attach File

Add Cc/Bcc

2. From the inbox, tap  **Compose** to compose a new email message.
3. Enter the message recipient(s), subject, and message, and then tap **Send** .

## Email composition options

- **Add Cc/Bcc recipients:** In the mail composition window, tap  in the To bar to add Cc/Bcc recipients.
- **Attach photos or videos:** In the mail composition window, tap  > Attach file . Tap the file you want to attach.
- **Save as a draft (Send later):** While composing your message, tap Menu  > Save draft or press the Back button  to save as a draft.
- **Delete mail being composed:** While composing your message, tap Menu  > Discard .

Note: View your drafts and sent mail from the inbox by tapping  >  Drafts  
or  > Sent .

## Open an email message from a notification

When a new email is received, you will see  in the Status bar.

1. Swipe the Status bar down to display the Notification panel.
2. Tap the new message from the Notification panel.

If you have two or more new email messages, tapping the notification will open the Gmail app.

## Email settings

You can access settings for the Gmail app and for your individual email accounts from the Gmail Settings menu.

1. From the Home Screen, open the Google folder, tap Gmail 

2. Tap Menu  > Settings.

3. Tap *General settings* to access settings for all accounts, or tap an account name to configure settings for a specific email account.

*Note: Available settings are subject to change.*

# Internet and social networking

The following topics describe how to connect to and use the Internet on your phone and how to access popular social networking sites such as Facebook Lite, Duo, and more.

## Chrome browser

From the Home screen, tap Chrome  to browse the Internet, search for information, and bookmark your favorite web pages for convenient access.

### Browsing web pages

1. Tap the address field.
2. Enter a web address or a keyword to browse for web pages.

### Adding a bookmark

1. Open the web page you want to bookmark.
2. Tap Menu  > .

### Opening a bookmark

1. From the Chrome browser screen, tap Menu  > Bookmarks .

2. Select the bookmark of the website you want to view.

### Customizing browser settings

1. From the Chrome browser screen, tap Menu  > Settings .
2. In the Settings list, you can select options to customize the browser.

Tip: For more information, visit:

[google.com/intl/en/chrome/browser/mobile/](https://google.com/intl/en/chrome/browser/mobile/).

## Facebook

Post updates, see what your friends are up to, upload pictures and check-ins, and more with on-the-go Facebook access.

Sign in to your Facebook account or create a new account

1. From the Home screen, swipe up to access Apps and tap Facebook  .
2. Enter your mobile number or email and password and tap Log In, or tap Create New Facebook Account to join Facebook.
3. Once completed, your Facebook account will be added to your phone.

## Use Facebook

Once you've either created an account or signed in, you can post and view updates, upload pictures, tag locations, and more, all from your phone.

1. From the Home screen, swipe up to access Apps and tap Facebook  .
2. Tap What's on your mind? to type an update. You can also share photos and videos, start a live video, scroll through your Facebook feed, and more.

# Connectivity

The following topics address your phone's connectivity options, including USB file transfer, Wi-Fi, Bluetooth, and more.

## Transfer files between your phone and a computer

You can use the USB cable to connect your phone directly to your computer and transfer music, photos, and other content files.

For example, if you have a music album stored on your computer that you want to transfer to your phone, you can connect your phone to the computer and copy the files to the music folder.

### File transfer tips

If you want to save data to an SD card on your phone, make sure the SD card is installed and active. For more information, see [“Slide the Storage manager switch to the On position to enable the storage manager.” on page 169.](#)

Important: Avoid removing the battery or SD card while transferring data. Data exchange may use the methods outlined in the following table:

<i>Method</i>	<i>Description</i>
<i>File Transfer</i>	<i>Transfer files between your phone and PC such as photos, videos, and music.</i>
<i>PTP</i>	<i>Transfer photo and video files between your phone and PC.</i>

## *Transfer files between the phone and a computer*

*1. Connect your phone to your computer using the USB charging cable.*

- Insert the end of the cable to the charger/accessory jack at the bottom of the phone.*
- Insert the USB end of the cable into an available USB port on your computer. You may need to remove the USB cable from the AC adapter to access it.*

*2. Drag the Status bar down to display the Notification panel. You will see Charging this device via USB.*

3. To transfer files from your phone to your computer:

- From the Home screen, swipe up to access Apps and tap Settings .
- Tap Connected devices  > USB.
- Tap File Transfer. You can also select other options available.

4. On your computer, navigate to the detected device (such as through the My Computer menu) and open it.

5. If available, select a drive (Internal shared storage or SD card).

6. Select a folder and copy files from your computer to your phone or from your phone to your computer.

7. When done, disconnect your phone from your computer.

## Wi-Fi

Wi-Fi provides wireless Internet access over distances of up to 300 feet. To use your phone's Wi-Fi, you need access to a wireless access point or hotspot.

Turn Wi-Fi on and connect to a wireless network

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Network & internet  > Wi-Fi.
3. Slide the Wi-Fi switch to the On  position.
4. Wi-Fi is enabled. Tap Wi-Fi to see the names and security settings of in-range Wi-Fi networks.
5. To disable Wi-Fi, slide the Wi-Fi switch to the Off  position.
6. Tap a Wi-Fi network to connect, enter the password (if applicable), and then tap CONNECT.

Your phone will be connected to the Wi-Fi network. You will see  in the status bar. For more information on Wi-Fi see [“Wi-Fi” on page 142](#).

## Bluetooth

Bluetooth is a short-range communications technology that allows you to connect wirelessly to a number of Bluetooth devices, such as headsets and hands-free car kits, Bluetooth-enabled handhelds, computers, printers, and wireless phones. The communication range for Bluetooth is approximately 30 feet.

The following table describes different options and functions available with certain Bluetooth accessories.

Function	Description
Audio output	Wirelessly listen to music, podcasts, etc.
Hands-free calls	Call hands-free, using Bluetooth-capable hands-free devices and
Data exchange	Exchange data with Bluetooth devices.

## Enable Bluetooth

To enable Bluetooth

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Connected devices  > Connection preferences > Bluetooth.
3. Slide the Bluetooth switch to the On  position.
  - You can also access Bluetooth from Quick Settings panel. Slide the Status bar down twice.
  - To disable Bluetooth, slide the Bluetooth switch to the Off  position.

Note: Turning on Airplane mode disables all network features including calling, messaging, mobile data, Wi-Fi, and Bluetooth. To

*continue to use Wi-Fi and Bluetooth, turn them on in Settings or in the notification panel.*

*Tip: Turn off Bluetooth when not in use to conserve battery power.*

## Pair Bluetooth devices

### To pair Bluetooth devices

1. From the Home screen, swipe up to access Apps and tap Settings  .

2. Tap Connected devices  > Pair new device .

- Nearby devices will appear under Available devices.
- If a target device is not detected, ensure that the device is powered on and is discoverable, then refresh to search again.

3. Tap a device under Available devices and follow the on-screen instructions to pair with the device.

- *Methods to accept a Bluetooth connection differ depending on the devices being used.*

## To forget a paired device

1. From the Home screen, swipe up to access Apps and tap Settings 

2. Tap Connected devices 

3. Tap Settings  next to the device you wish to forget.

4. Tap FORGET > FORGET DEVICE .

- The device will be unpaired from your phone. To reconnect with the device, you will need to pair again.

## Connect to a paired Bluetooth device

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap Connected devices .

3. Tap a paired device to connect.

When the device is connected to your phone, the Bluetooth Paired icon  will be displayed in the Status bar. You can then use the headset or car kit to listen to music or make and receive phone calls.

Note: Noise may be experienced with wireless calls and hands-free calls. Due to different specifications and features of other Bluetooth-compatible

*devices, display and operations may be different, and functions such as transfer or exchange may not be possible with all Bluetooth-compatible devices.*

## Send information via Bluetooth

You can use Bluetooth to transfer files between your phone and another Bluetooth-enabled device, such as a phone or computer. Send photos, videos, calendar events, contacts, and more.

See [“Share pictures and videos” on page 118](#) and [“Share a contact” on page 82](#).

## Receive information via Bluetooth

1. When another device attempts to send a file to your phone via Bluetooth, you will see a request to accept the file.

2. Tap **ACCEPT** to receive the file.

- When your phone receives a file, you will see a notification. To download the file immediately, drag the Status bar down to display the Notification panel, and then tap the notification. Select the file you wish to open from the Inbound transfers menu.
- Media files and documents are usually opened directly in a compatible app. For example, if you received and opened a photo, it will open in the Photos  app.

- For a Calendar file, select the calendar where you want to save the event, and then tap Import . The Calendar is added to your Calendar events. For more information on using the Calendar, see “Calendar” on page 119.
- For a vCard contact file, if there are multiple vCard files on your storage card, you can choose to import one, several, or all of those contacts to your contacts list.

Tip: For more information on Bluetooth, see “Bluetooth” on page 153.

## *Apps and entertainment*

---

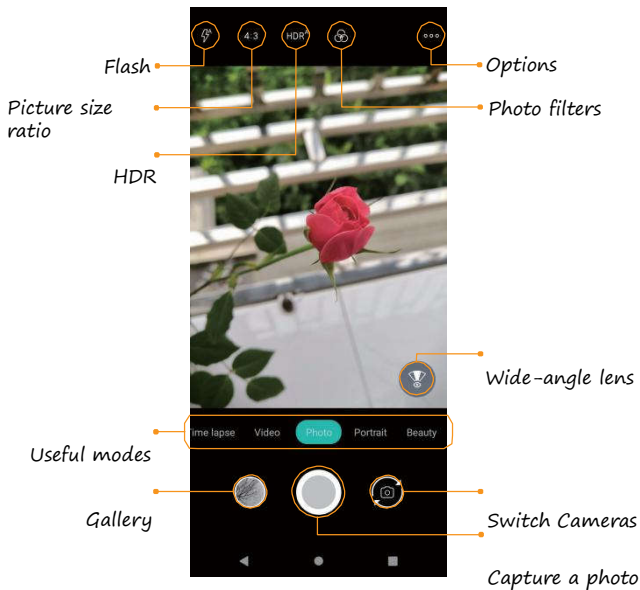

*The topics in this section will explore the features that make your phone so much more than a phone, from the camera and productivity apps to music, entertainment, and more.*

### *Camera*

*You can use the Camera to take portraits, photos and videos, and translate texts.*

## Camera overview

The camera's viewfinder screen lets you view your subject and access camera controls and options.

Icon	Function/Service	
	Options	Select camera modes and settings options.
	Flash	Activate or deactivate the camera flash.
	HDR enhance	Activate or deactivate High Dynamic Range enhance mode for clearer, more vivid
	Photo filters	Choose from a variety of photo color filters.
	Picture size ratio	Set the photo quality and aspect ratio.
	Wide-angle lens	Capture more detail in landscape photos.
	Gallery	View the last photo or video taken.
	Capture	Capture a photo.
	Switch cameras	Switch between the front and back cameras.

<i>Useful mode</i>	<i>Function/Service</i>
<i>Professional</i>	<i>Take photos in a more professional mode, where you can adjust the shutter speed, ISO, White balance, manual focus, etc.</i>
<i>Time lapse</i>	<i>Record long videos in time-lapse.</i>
<i>Video</i>	<i>Record videos and access video settings.</i>
<i>Photo</i>	<i>Capture photos and access camera settings.</i>
<i>Portrait</i>	<i>Blur the background around the subject for a professional look.</i>
<i>Beauty</i>	<i>Blur imperfections for flawless photos.</i>
<i>Night</i>	<i>Optimize photos in low-light conditions.</i>

*Note: Camera options vary based on mode, camera in use, etc.*

## Camera cautions

If the lens is dirty: Fingerprints and smudges on the camera lens may result in blurry photos or videos. If this happens, wipe the lens with a soft, dry cloth.

Avoid exposure to direct sunlight: Do not expose the lens to direct sunlight for long periods, as this can affect the color filter and distort the color of photos and videos.

## Take a photo

Note: If you have an SD card installed, set up, and formatted, photos and videos will automatically be saved to the SD card. See [“First Time Setup after Inserting an SD Card”](#) on page 18 for more details. If no card is installed, photos and videos will be saved to your phone’s memory.

1. From the Home screen, tap Camera . You can also access the Camera with one of the following methods:
  - From the Home screen, swipe up to access Apps and tap Camera .
  - Press the Power key twice quickly.
  - From the Lock screen, swipe up from the bottom right corner of the screen.
2. Tap Photo to switch to Photo mode.

3. Aim the camera at your subject and tap  or press the Volume key to take the photo.

## Record a video

1. From the Home screen, tap Camera .
2. Tap Video to switch to Video mode.
3. Aim the camera at your subject and tap  or press the Volume key to start recording a video.
4. Tap  to hold the recording and tap  to resume. Tap  to stop recording and save your video. To take a picture during the recording, tap .

Hold recording

Capture a photo

Stop recording

## Camera settings

You can adjust your camera's settings using the icons on the main camera screen and the full camera settings menu.

1. From the Home screen, tap Camera .
2. Tap Settings .

Icon		Function/Service
	Touch shot	Enable or disable the ability to capture photos by tapping on the camera screen.
	Self timer	Set a countdown timer.
	Shutter sound	Activate or deactivate the shutter sound when taking a photo.
	Framing lines	Show grid lines to help take professionally- composed photos.
	Geo tagging	Add location information to your photo.
	Picture size	Adjust photo size and ratio.

# Photos

Using the Photos  app, you can view photos and watch videos that you've taken, downloaded, or copied onto your storage card or phone memory. For pictures that are on your storage card or phone memory, you can do basic editing such as rotating and cropping. You can also easily assign a photo as your contact photo or wallpaper and share photos with your friends.

## View photos and videos

1. From the Home screen, tap Photos  .

Tip: You can also access the Photos  by swiping up on the Home screen to access Apps and tapping Photos .

2. Tap an image or a video to view.

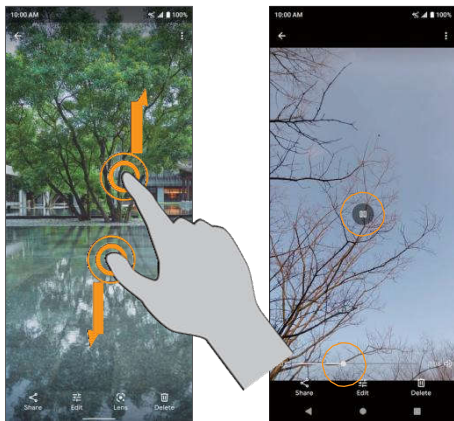

## Options while reviewing photos or videos

### Zoom in or out on a photo or video

Tap the screen twice or pinch the screen to zoom in or out on a photo or video.

### Viewing videos

Use the on-screen controls to play, pause, or stop the video playback.

# Edit photos

## Rotate and save a photo

1. From the Home screen, tap Photos .
2. Tap the photo you want to rotate.
3. Tap Edit  to access the Edit screen.
4. Tap Crop and adjust the slider to rotate the photo.
5. Tap Save copy to save a copy of your photo.

## Crop a picture

1. From the Home screen, tap Photos .
2. Tap the photo you want to crop.
3. Tap Edit  to access the Edit screen.
4. Tap Crop. A crop box appears on the photo.
5. To adjust the crop box size, drag the corners inward or outward to resize the crop box.
6. Tap Save copy to apply the changes to the photo and save.

The cropped photo is saved in the album as a copy. The original photo will remain unedited.

## Share pictures and videos

The Photos app allows you to send photos and videos using email or MMS messages. You can share photos and videos on your social networks, or send them to another phone or your computer via Bluetooth.

1. From the Home screen, tap Photos .

2. Tap the photos or videos you want to share.

Tip: To select multiple items, touch and hold an image to turn on Multi-select mode. Tap to select the items you want to share.

3. Tap Share , then select to share using Bluetooth, Gmail, Duo, Messages, and more. Follow the on-screen prompts to send the photo or video.

# Productivity

Use your phone to stay productive and organized with calendar, navigation, alarm, office, and more productivity apps.

## Calendar

Use the Calendar to create and manage events, meetings, and appointments. Your Calendar helps organize your time and reminds you of important events.

In order to sync with your Google calendar, you must sign in to a Google Account on your phone. See ["Google Account" on page 44](#) for more information on signing in or creating a Google Account.

### Calendar view

1. From the Home screen, swipe up to access Apps and tap Calendar  .

2. Tap Menu .

3. Select from one of the following calendar views:

- *Schedule: Display all events.*
- *Day: Display today's schedule by hour. Slide the screen to the left and right to display the previous and the next day, respectively.*
- *3 days: Display the previous day, today, and the next day. Slide the screen to the left and right to view the previous and next three days.*
- *Week: Display the current week. Slide the screen to the left and right to view the previous and next week, respectively.*
- *Month: Display the current month. Slide the screen to the left and right to view the previous and next month, respectively.*

## Schedule View

## Day View

## 3 Day View

## Week View

## Month View

## Add an event

1. From the Home screen, swipe up to access Apps and tap Calendar .
2. Tap Add  to add an event.
3. Enter event details, and then tap Save.

## View calendar events

1. From the Home screen, swipe up to access Apps and tap Calendar .
2. Tap a date and an event to view the details.

## Edit an event

1. From the Home screen, swipe up to access Apps and tap Calendar .
2. Tap a date and an event to view the details.
3. Tap Edit  to edit the event.

4. When you are done editing, tap Save .

## Delete an event

1. From the Home screen, swipe up to access Apps and tap Calendar

2. Tap a date and an event to view the details.

3. Tap Options  > Delete to delete the event.

## Calendar settings

1. From the Home screen, swipe up to access Apps and tap Calendar

2. Tap Menu  > Settings > General.

3. Tap an option to adjust Calendar settings.

## Google Maps

Use the Google Maps app to determine your location, get directions, browse local businesses and attractions, rate and review places, and more.

Enable location services on your phone

Before using Google Maps, you must enable your phone's location feature. For information about setting your phone's location options, see ["Location" on page 190](#).

Search for destinations

Use Google Maps to locate and map a specific address or destination

1. From the Home screen, swipe up to access Apps and tap Maps .

You

can also access Maps from the Google folder on the Home screen.

If prompted, follow the on-screen instructions to accept terms of use.

Enter destination

Tap to use voice recognition

Select map type

Tap to view current location

Check route to destination

2. Tap Search here.

3. Enter an address, city, facility name, etc., then choose a search result.  
You will see your location on the map.

### Google Maps operations

- View current location: Tap  to find your current location on the map.
- Explore nearby venue categories: Browse nearby venues by selecting a category such as restaurants, parks, hotels, and more.

- *Select map types for different views: Tap MAP TYPE  and choose your map view, or select to view map details such as traffic, street view, etc.*

- Find a route to your destination: Tap Go , enter your desired start location and destination, and tap a method of transportation (car, public transit, or on foot) for a list of step-by-step directions to your destination.

## Google Search

Search for information saved on the phone, in apps, and on the Internet.

### Use Google Search

1. From the Home screen, tap the Google Search widget. You can also access Google Search by swiping up on the Home screen to access Apps and tapping Google .
2. Type your search keywords and tap Search . To search by voice, tap Google Voice Search  in the search bar and say your search terms.

## Use Google Voice Search

Tip: To quickly access Google Voice Search from any screen, press and hold Home

1. From the Home screen, swipe up to access Apps and tap Google
2. Tap Google Voice Search
3. Say your search terms and search results will appear.

# Calculator

Your phone's convenient built-in calculator lets you perform basic mathematical equations.

1. From the Home screen, swipe up to access Apps and tap Calculator .

2. Enter the first number.

3. Tap a mathematical function key, then enter the second number.

4. Tap  to view the result.

5. Tap to clear the results.

## View calculator history

1. From the Home screen, swipe up to access Apps and tap Calculator .
2. Tap Menu  > History, or drag down on the History  bar to view the calculator history.
3. To clear the calculator history, tap Menu  > Clear.
4. To return to the calculator, drag the History  bar back up or tap the Back button .

# Clock

The Clock app allows you to set alarms, view different world times, use a stopwatch, set a timer, and use your phone as a desk clock.

## Set the date and time manually

Your phone uses the wireless network to receive the current date and time automatically. You can also set the date and time manually.

1. From the Home screen, swipe up to access Apps and tap Clock

2. Tap Menu  > Settings > Change date & time > Set time

automatically >  
Off.

3. Set the date and time manually.

## Create a new alarm

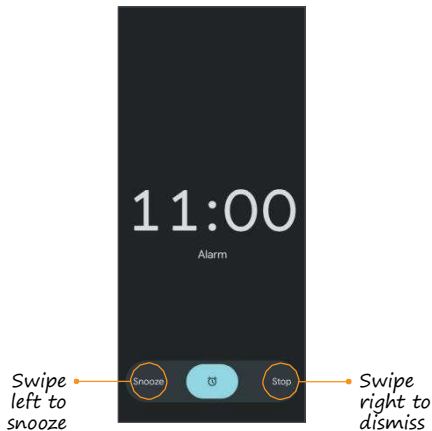

1. From the Home screen, swipe up to access Apps and tap Clock .
2. Tap Alarm .
3. Tap .
4. Set the time for the alarm and tap OK. You can also tap  to enter the time directly.
5. Set more alarm details, if desired.

<i>Feature</i>	<i>Description</i>
<i>Add label</i>	<i>Enter a name for the alarm.</i>
<i>Repeat</i>	<i>Select the days to repeat the alarm.</i>
<i>Alarm sound</i>	<i>Select a sound to play for the alarm.</i>
<i>Vibrate</i>	<i>Activate alarm vibration.</i>
<i>Google Assistant Routine</i>	<i>Add the current alarm to your Google Assistant</i>
<i>Delete</i>	<i>Delete the current alarm.</i>

## Turn an alarm off

1. To turn an alarm off, drag the Alarm Clock  to Stop.
2. To snooze the alarm for 10 minutes, drag the Alarm Clock  to Snooze.

## Delete an alarm

1. From the Home screen, swipe up to access Apps and tap Clock .
2. Tap the alarm you want to delete from the alarm list.
3. Tap Delete.

## World clock

The World clock lets you keep track of the current time in multiple cities around the globe.

1. From the Home screen, swipe up to access Apps and tap Clock .
2. Tap Clock  if not already selected. Tap  to access the World clock screen.
3. Type to enter a city name and select the city you want to add from the list.
  - To remove a city, swipe the city to the left side and tap .

## Timer

1. From the Home screen, swipe up to access Apps and tap Clock 

2. Tap Timer  to access the Timer screen.

3. Enter the amount of time into the Timer.

4. Tap  to begin timing.

5. Tap  to pause timing.

- Tap  again to resume timing.

- Tap Reset to reset the timer back to zero.

- Tap  to delete the timer.

- Tap  to add another timer. Swipe up and down to view other active timers.

## Stopwatch

1. From the Home screen, swipe up to access Apps and tap Clock .

2. Tap Stopwatch  to access the Stopwatch screen.

3. Tap  to begin the stopwatch.

4. Tap  to stop the stopwatch.

- Tap  again to resume timing.
- Tap  to reset the stopwatch to zero.
- Tap  to add lap splits.

## Bedtime

1. From the Home screen, swipe up to access Apps, and tap Clock 

2. Tap Bedtime  to access the Bedtime screen.

3. Set your sleep time and wake-up time.

Your phone will enter Bedtime mode during the sleep time. In Bedtime mode, phone notifications for calls, texts, and other interruptions will be turned off. And the phone's display color will be turned into black and white to reduce the chance of you staying up and using your phone.

A wake up alarm will be set automatically to wake you up at the wake-up time you've set.

There are the following options for you to manage your sleep:

- See recent bedtime activity

Keep track of your screen time and see estimates of time spent in bed. This is based on when your phone remained motionless in a dark room.

- Listen to sleep sounds

You can play soothing music to help you fall asleep. Sleep sounds don't play automatically.

- See your upcoming events

*To make sure your alarm is set before any events, allow Clock to access your calendar.*

*Note: You can add Bedtime mode to the Quick Settings Panel to enable or disable this mode quickly and easily.*

# Entertainment and activities

The following topics provide an overview of your phone's entertainment apps.

## YouTube

View videos uploaded to YouTube and upload your own videos.

### View YouTube videos

Note: You can use the YouTube app to view videos on YouTube even if you aren't signed in to a YouTube account.

1. From the Home screen, swipe up to access Apps and tap YouTube .

Note: You can also access YouTube from the Google folder on the Home screen.

- *If you are prompted to provide confirmation to use the site, follow the on-screen instructions to continue.*

2. Browse YouTube channels and tap a video to view.
3. The video will play on your phone screen. Tap the screen to pause or resume play while watching.

## Post a video to YouTube

You can post videos to your YouTube account from your phone. Before posting, you must set up a YouTube account and sign in on your phone.

1. From the Home screen, swipe up to access Apps and tap YouTube .
2. Tap Record/Post Video  > Upload a video.

Note: You may be prompted to allow access to your photos, camera, and microphone. Tap ALLOW ACCESS to continue.

3. Select a video to upload, record a new video to upload, or stream a live video. Enter a title, description, and tags, and select a privacy setting.

*Record/  
Post video*

# Settings

---

*The topics in this section will cover your phone's settings and options.*

# Basic settings

From the Home screen, swipe up to access Apps and tap Settings  to access your phone's Settings menu. You can also access the Settings menu from the Status bar. Swipe the Status bar down twice and tap Settings .

The table below outlines the Settings categories.

Category	Description
 Network & internet	Set Wi-Fi, mobile network, Airplane mode, Hotspot, VPN, Data Saver, etc.
 Connected devices	Manage the settings on devices connected by Bluetooth, Cast, USB, etc.
 Apps	View your recently opened apps, adjust the settings on default apps, permissions,
 Notifications	Manage the settings on notifications.
 Battery	Monitor your phone's battery usage.
 Storage	Manage internal storage on your phone and provide menu choices for an optional SD
 Sound	Set ringtone, operation tones, etc.

*Display*

*Set brightness, font size, etc.*

*Wallpaper*

*Set wallpapers for home screen and lock screen.*

Category	Description
 Accessibility	Set accessibility options such as screen magnification, audio adjustment, etc.
 Security	Set a screen lock method, manage fingerprints, etc.
 Privacy	Manage apps permissions, set your account activity and personal data, etc.
 Location	View and manage apps using your location.
 Safety & emergency	Add your medical information and emergency contacts, enable Emergency SOS
Passwords & Accounts	Manage all your email, social networking, and picture and video sharing accounts.
Digital Wellbeing & parental controls	Statistics screen usage time, app timers, bedtime schedules, manage notifications, etc.
 Google	Check and set Google service options.
 System	Set language and time, manage reset options, enable backup, and view more
 About phone	View information about your device.

*Software Update*

*Manage software updates for your phone.*

# Network & internet

Manage network and connectivity settings.

## Wi-Fi

Connect your device to a Wi-Fi network

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap Network & internet .

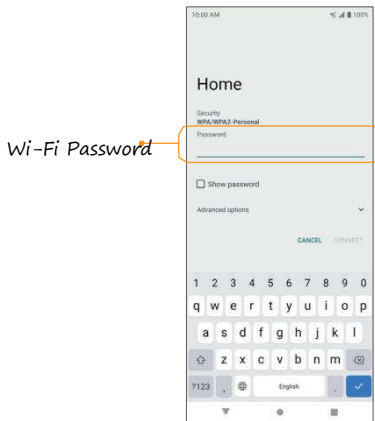

3. Slide the Wi-Fi switch to the On  position to turn it on.

Your phone will automatically search for available networks and you will be able to see the names and security settings of in-range Wi-Fi networks.

- To disable Wi-Fi, slide the Wi-Fi switch to the  Off position.

4. Tap the Wi-Fi network you want to connect to, enter the password (if applicable), and tap **CONNECT**. Your phone will be connected to the selected Wi-Fi network.

- The password for a household wireless LAN router is sometimes found on a sticker on the router (WEP, WPA, KEY, etc.) or QR code. Contact the router manufacturer for information. For the password for a public wireless LAN, check with user's service provider.
- Entering a password is not required if an access point is not security

*protected.*

## Manually connect to a Wi-Fi network

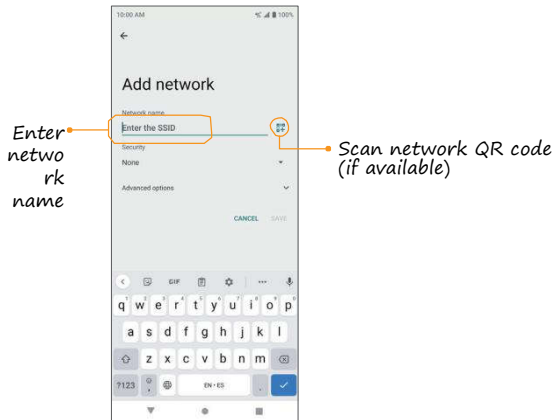

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap Network & internet  > Wi-Fi.

3. Slide the Use Wi-Fi switch to the On  position to turn it on.

4. Tap  Add network.

5. Enter the required information and tap SAVE to continue.

- Network name: Enter the network name.

- *Security: Select a security option and enter your password.*
- *Advanced options: Show advanced options, such as IP settings and Proxy settings.*

## Wi-Fi preferences

Create and manage wireless access points.

- Turn on Wi-Fi automatically: Wi-Fi will be turned on automatically when you are near high-quality saved networks, like your home network.
- Notify for public networks: Receive notifications about open networks when Wi-Fi is turned on.
- Passpoint: Enable or disable the function of seamlessly connecting to Passpoint™ enabled Wi-Fi access points without needing a password.
- Install certificates: Allow authentication to access files.
- Wi-Fi Direct: Connect to devices with Wi-Fi Direct.

## Saved networks

Tap to view your saved Wi-Fi networks.

## Wi-Fi data usage

Tap to view the Wi-Fi data used by each app.

## Wi-Fi Calling

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap Network & internet  > Wi-Fi Calling .

3. Slide the switch to the On  position to enable Wi-Fi Calling .

Note: To use Wi-Fi Calling, you will need to set up an Emergency Address. When the Emergency Address is successfully set, you will see the Wi-Fi Calling icon in the Status bar.

- About Wi-Fi Calling: Tap to view more information about Wi-Fi Calling.

- *Network preference:* Select the preferred network.
- *Emergency Address:* Tap to update your emergency address to help emergency services find you if you call 911.

*Note:* You must have an active Wi-Fi connection to send or receive calls and messages with Wi-Fi Calling.

## Mobile network

1. From the Home screen, swipe up to access Apps and tap Settings 

2. Tap Network & internet  > Mobile network.

- *Mobile Data:* Slide the switch to the On  position to enable data access on your mobile network.
- *International Data Roaming:* Slide the switch to the On  position to enable international data roaming.
- *App data usage:* View the mobile data usage of each app.
- *Data warning & limit:* View the following data management options:
  - *Mobile data usage cycle:* Set the date the data usage cycle resets.
  - *Set data warning:* Slide the switch to the On  position to enable alerts when your mobile data usage reaches the amount set.
  - *Data warning:* Set the data usage amount. Your phone will notify you when it reaches the amount set. Data usage measured by your phone is an approximate amount, and it may differ from the actual amount.
  - *Set data limit:* Slide the switch to the On  position to enable data limits.

- *Data limit: Set a data limit. Your phone will turn off mobile data when it reaches the limit set.*

- *Advanced:*
  - *Mobile Network Diagnostics:* Slide the switch to the On  position to enable sending diagnostic data automatically to the provider to improve service.
  - *Automatically select network:* Slide the switch to the On  position to enable network selection automatically.
  - *Choose network:* Select network manually.
  - *Access Point Names:* Select or add APNs.

## Airplane mode

Disable all network communication.

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Network & internet  > Airplane mode.
3. Slide the switch to the On  position to activate Airplane mode.

## SIM cards

Manage SIM card settings.

## Hotspot & tethering

Share your phone's internet connection with other devices.

*Note: Using your phone as a mobile hotspot increases battery consumption and data usage.*

## *Mobile hotspot*

*Use your phone as a Mobile hotspot.*

*1. From the Home screen, swipe up to access Apps and tap Settings*  .

2. Tap Network & internet  > Hotspot & tethering > Mobile Hotspot .

3. Slide the switch to the On  position to activate the mobile hotspot.

- Hotspot name: Set the hotspot name.
- Security: Turn hotspot security on or off.
- Hotspot password: Tap to set a hotspot password.
- Turn off hotspot automatically: Slide the switch to the On  position to turn off the hotspot automatically if no devices are connected.
- Extend compatibility: Slide the switch to the On  position to help other devices find this hotspot and reduce hotspot connection speed.
- Mobile Hotspot turn off timer: Set a timer for the hotspot to automatically turn off.
- Maximum connections: Tap to set the maximum number of users allowed to connect to the hotspot.
- Connected users: View your connected users.
- Blocked users: View your blocked users.

## USB tethering

Share your phone's internet connection via USB.

1. Connect your phone to the device that you want to share your internet with using a Type-C USB cable before continuing to the next step.

2. From the Home screen, swipe up to access Apps and tap Settings  .
3. Tap Network & internet  > Hotspot & tethering > USB tethering .
4. Slide the USB tethering switch to the **On** position to enable USB tethering.

## Bluetooth tethering

Share your phone's internet connection via Bluetooth.

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Network & internet > Hotspot & tethering > Bluetooth tethering .
3. Slide the Bluetooth tethering switch to the On  position to enable Bluetooth tethering.

## Data Saver

To help reduce data usage, Data Saver prevents some apps from sending or receiving data in the background.

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Network & internet  > Data Saver .
  - Use Data Saver: Slide the Use Data Saver switch to the On  position to enable the data saving feature.
  - Unrestricted data: Set apps to be allowed to use restricted data when  
Data saver is on.

## VPN (Virtual Private Networks)

*Note: You need to set a screen lock PIN or password before you can use a VPN.*

## *Add a VPN profile*

- 1. From the Home screen, swipe up to access Apps and tap Settings .*
- 2. Tap Network & internet  > VPN.*
- 3. Tap Add VPN  on the top right corner of the VPN screen to add a VPN*

profile.

4. Follow the prompts to set up a VPN.

### Edit and delete a VPN

1. From the Home screen, swipe up to access Apps and tap Settings 

2. Tap Network & internet  > VPN.

3. Tap  next to a VPN.

4. Edit the VPN and tap SAVE, or tap FORGET to delete the VPN.

### Connect to a VPN

1. From the Home screen, swipe up to access Apps and tap Settings 

2. Tap Network & internet  > VPN.

3. Tap a VPN, enter your login information, and tap CONNECT.

- To disconnect, tap the VPN, and tap DISCONNECT.

### Private DNS

1. From the Home screen, swipe up to access Apps and tap Settings 

2. Tap Network & internet  > Private DNS.

3. *Select your Private DNS mode.*

# Wireless Emergency Alerts

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Network & internet  > Wireless Emergency Alerts .
  - Allow alerts: Slide the switch to the On  position to receive wireless emergency alert notifications.
  - National alerts: Slide the switch to the On  position to receive national warning messages.
  - Extreme threats: Extreme threats to life and property. Slide the switch to the On  position to receive extreme threat alerts.
  - Severe threats: Severe threats to life and property. Slide the switch to the On  position to receive severe threat alerts.
  - AMBER alerts: Child abduction emergency bulletins. Slide the switch to the On  position to receive AMBER alerts.
  - Public safety messages: Recommended actions that can save lives and property. Slide the switch to the On position to receive public safety messages.
  - State and local tests: Slide the switch to the On  position to receive test messages from state and local authorities.
  - Emergency alert history: View all the alerts you've received before.
  - Vibration: Slide the switch to the On  position to enable vibration when receiving an alert.

- *Alert reminder: Tap to set alert reminder.*
- *Spanish: Slide the switch to the On  position to receive emergency alerts in Spanish when possible.*

# Connected devices

Manage settings for connected devices.

## USB

Connect your phone to a computer using a USB cable to transfer data, share network connectivity, or charge your phone.

1. From the Home screen, swipe up to access Apps and tap Settings 

2. Tap Connected devices  > USB.

• USB controlled by:

- *Connected device: Set the connected device to control the USB.*
- *This device: Set your phone to control the USB.*

- Use USB for:
  - File Transfer: Select to transfer files between your phone and your computer.
  - USB tethering: Select to set the USB tethering mode.
  - MIDI: Select to set this device as MIDI.
  - PTP: Select to transfer PTP photos.
  - No data transfer: Select to set No data transfer mode.

## Connection preferences

Manage various connection preferences.

## Bluetooth

Wirelessly hear calls, connect speakers, transfer data, and more.

### Activate Bluetooth

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Connected devices  > Connection preferences > Bluetooth.
3. Slide the Bluetooth switch to the On  position to turn it on.

### Rename this device

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap *Connected devices*  > *Connection preferences* > *Bluetooth*.
3. Tap *Device name*.
4. Enter a new name and tap *RENAME* to save.

## Pair a Bluetooth device

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Connected devices  > Connection preferences > Bluetooth.
3. Tap  Pair new device.
4. Select the device you want to connect to within the Available devices list and follow the prompts to connect.
  - Make sure the device you want to connect with is discoverable via Bluetooth.
  - Depending on the device, you may be required to enter or accept a passkey.

## Rename a paired device

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Connected devices .
3. Under Previously connected devices, tap Settings  next to a paired device name.
4. Tap Edit , enter a new name, and tap RENAME to save.

## Disconnect from a paired device

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Connected devices  > Tap Settings  next to a paired device name, and tap FORGET.

## Search for other devices

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Connected devices  > Connection preferences > Bluetooth >  Pair new device .

## Receive data via Bluetooth

When a device attempts to send a file to your phone using Bluetooth, you will be prompted to accept or decline the request.

1. Tap ACCEPT .
2. To view the file received, swipe the Status bar down and tap Bluetooth share: Received files, or locate the file from Bluetooth settings menu .

## Open received files

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Connected devices  > Connection preferences .
3. Tap Files received via Bluetooth .
4. Tap an item to open it .

## Cast

Scan for nearby devices to connect to and set them up. A notification

will appear when there are available devices to connect to.

1. From the Home screen, swipe up to access Apps and tap Settings  .

2. Tap Connected devices  > Connection preferences > Cast .

3. Tap Menu  > Enable wireless display .

4. Tap a device to connect.

## Printing

Connect your device to a printer on the same Wi-Fi network.

### Add printer

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Connected devices  > Connection preferences > Printing .
3. Tap Add service .
4. Tap an option to add a printer by IP address or by Wi-Fi Direct.

## Files received via Bluetooth

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Connected devices  > Connection preferences > Files received via Bluetooth .
3. Tap an item to open it.

## Chromebook

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Connected devices  > Connection preferences > Chromebook .
3. Tap to manage connections with your Chromebook.

## Nearby Share

Nearby Share allows the rapid short-range exchange of images, videos, text, contact info, directions, YouTube videos, and other data via Bluetooth.

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Connected devices  > Connection preferences > Nearby Share.
3. Slide the switch to the On  position to enable this function. You can directly enable or disable Nearby Share feature via Quick Settings Panel.

## Device name

Rename your device. Enter a new name and tap RENAME to save.

## Device visibility

Set your device's visibility. You can make yourself visible to Everyone or some people from Contacts, or Hidden.

## Data

Set data usage method. You can choose Data, Wi-Fi Only, or Without internet (Files shared offline).

## Show notification

Slide the switch to the On  position to show notification when devices are sharing nearby.

Note: Nearby Share requires both sender and recipient devices' Bluetooth and Location to be turned on, both devices are unlocked, and close together.

If the content can be sent, a bottom sheet will appear with a list of available contacts to share with.

## Android Auto

Use Android Auto app to control your phone's maps, media and messaging functions, with the Google Assistant while you drive.

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Connected devices  > Connection preferences > Android Auto.
3. Download and install the Android Auto app from the Google Play Store to your phone.
4. Tap  to view connection details.
5. Plug your phone into this car's Android Auto-compatible USB port.
6. When connected, supported apps will be mirrored from your phone to your car's display.

Note: Hands-free operation through voice commands is encouraged to minimize driving distraction.

## Apps

View current running applications, manage permissions, and more.

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap Apps .

## Recently opened apps

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Apps  > See all apps.
3. Tap an app to view detailed information. Tap OPEN to access this app, tap DISABLE to disable this app, or tap FORCE STOP to stop this app.

## Default apps

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Apps  > Default apps.
3. Tap to set the default app for the browser, phone, messaging, etc. You can also set default apps for opening links.

## Screen time

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Apps  > Screen time.
  - You can tap  on the right side of most apps to set daily timers. When the app timer ends, the app is paused for the rest of the day.

## Unused apps

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Apps  > Unused apps.
3. Tap to view apps that you did not use for a long time. You can uninstall them to free up some space.

## Special app access

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Apps  > Special app access .
3. Tap to view app access for special functions, such as battery optimization, display over other apps, unrestricted data, usage access, etc.

# Notifications

Manage the settings on notifications.

1. From the Home screen, swipe up to access Apps and tap Settings 

2. Tap Notifications 

## App settings

Control notifications from individual apps.

1. From the Home screen, swipe up to access Apps and tap Settings 

2. Tap Notifications  > App settings .

3. Apps were categorized into four types: MOST RECENT, MOST

*FREQUENT, ALL APPS, TURNED OFF. Select a category from the drop-down list, and choose the app you want to adjust the notification settings for.*

## Notification history

View your recent and snoozed notifications.

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Notifications  > Notification history .
3. Slide the switch to the On  position to turn it on.
4. Your recent and snoozed notifications will appear.

## Conversations

View priority and modified conversations.

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Notifications  > Conversations .
3. Your priority and modified conversations are displayed. To change conversation settings, follow the below steps:
  1. Swipe the Status bar down to display the Notification panel.
  2. Touch and hold a conversation.

## Bubbles

Enable message conversations display as bubbles, floating on top of other apps.

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Notifications  > Bubbles.
3. Slide the switch to the On  position to allow apps to show bubbles.

## Device & app notification

Control which apps and devices can read notifications.

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Notifications  > Device & app notifications.
3. You can see the devices and apps that allowed and not allowed to access notifications.

## Notifications on lock screen

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Notifications  > Notifications on lock screen.
3. Select how you want notifications to be displayed on the lock screen.

## Do Not Disturb

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Notifications  > Do Not Disturb.
3. Tap **TURN ON NOW** to enable Do Not Disturb mode.
4. You can set Do Not Disturb behavior, exceptions, schedule, etc.

## Wireless emergency alerts

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Notifications  > Wireless emergency alerts.

3. Slide the Allow alerts switch to the On  position to allow alerts.
4. There are different kinds of alerts, and you can slide corresponding switches to turn them on or off.

## Hide silent notifications in status bar

1. From the Home screen, swipe up to access Apps and tap Settings 
2. Tap Notifications  > Hide silent notifications in status bar.
3. Slide the switch to the On  position to hide silent notifications in status bar.

## Allow notification snoozing

1. From the Home screen, swipe up to access Apps and tap Settings 
2. Tap Notifications  > Allow notification snoozing.
3. Slide the switch to the On  position to allow temporarily snoozing certain notifications.

## Notification dot on app icon

1. From the Home screen, swipe up to access Apps and tap Settings 
2. Tap Notifications  > Notification dot on app icon.
3. Slide the switch to the On  position to allow the display of notification dots on an app icon.

## Enhanced notifications

1. From the Home screen, swipe up to access Apps and tap Settings 
2. Tap Notifications  > Enhanced notifications.
3. Slide the switch to the On  position to automatically show suggested actions and replies.

# Battery

Monitor your phone's battery usage through the Battery settings menu. Check the battery consumption and percentage.

1. From the Home screen, swipe up to access Apps and tap Settings 
2. Tap Battery 

## Battery usage

View battery usage from last full charge.

1. From the Home screen, swipe up to access Apps and tap Settings 
2. Tap Battery  > Battery usage.

3. You can view the battery percentage that each apps used.

# Battery Saver

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap Battery  > Battery Saver.

- Slide the Use Battery Saver switch to the On  position to turn the battery saver mode on. The Battery Saver will automatically turn off when the phone is plugged in.

- Set a schedule: Tap Based on percentage and drag the slider to the percentage you need. The Battery Saver will turn on automatically when your phone reaches that battery percentage.

## Battery Manager

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Battery  > Battery Manager.
3. Slide the Use Battery Manager switch to the On  position to enable the battery manager.
4. Monitor the amount of battery being used by apps. If battery usage increases too much, your phone will suggest actions you can take.

## Battery percentage

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap Battery  > Battery percentage .
3. Slide the switch to the On  position to show the battery percentage in the Status bar.

# Storage

The Storage settings menu allows you to manage internal storage on your phone and provides menu choices for an optional SD card (not included).

1. From the Home screen, swipe up to access Apps and tap Settings  .

2. Tap Storage  .

3. Tap **THIS DEVICE** > **THIS DEVICE**, then tap a category to view the storage amount used by each app.

4. Delete backed up files by tapping Free up space .

## *Storage manager*

*Storage manager removes backed up photos and videos from your device.*

- Slide the Storage manager switch to the On  position to enable the storage manager.

## SD card

From the Storage page, tap  > SD CARD to view files stored on your SD card.

Tap Menu  to access the following options:

- Rename: change the SD card name.
- Eject: eject the SD card to allow for safe removal.
- Format: format the SD card.

# Sound

The Sound settings menu lets you control your phone's audio, from ringtones and alerts to tap tones and notifications.

1. From the Home screen, swipe up to access Apps and tap Settings 

2. Tap Sound 

## Media volume

Drag the slider to adjust the media and alert notification volume.

## *Call volume*

*Drag the slider to adjust the call volume.*

## Notification volume

Drag the slider to adjust the notification volume.

## Ring volume

Drag the slider to adjust the ring volume.

## Alarm volume

Drag the slider to adjust the alarm volume.

## Do Not Disturb

- Accessibility button: Manage the settings on accessibility button  , such as location, size, etc.
- Shortcut from lock screen: Allow feature shortcut to turn on from the lock screen.

## Text-to-speech output

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Accessibility  > Text-to-speech output.
  - Preferred engine: Tap to set the text-to-speech engine (Google is default). Tap  to manage text-to-speech settings.

- *Language: Tap to set the language for using this function.*
- *Speech rate: Drag the slider to adjust speech rate.*
- *Pitch: Drag the slider to adjust pitch.*
- *Tap PLAY to play the example.*
- *Tap RESET to reset all Text-to-speech settings to the default settings.*

# Security

The Security settings will help you to secure your device, protect your data, and keep your privacy.

1. From the Home screen, swipe up to access Apps and tap Settings 

2. Tap Security 

## Google Play Protect

Google will regularly check your device and prevent/warn you of potential harm. Only apps from Play Store will be checked.

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Security  > Google Play Protect .

- Tap *Scan* to start scanning your device for harmful apps.
  - Tap *Settings*  to view Play Protect settings:
    - Slide the *Scan apps with Play Protect* switch to the *On*  position to enable regular scanning for harmful apps on your device.
    - Slide the *Improve harmful app detection* switch to the *On*  position to enable sending unknown apps to Google for better detection.

## Security update

Check for new software updates for your device.

1. From the Home screen, swipe up to access Apps and tap *Settings* .
2. Tap *Security*  > *Security update*.
3. Tap *Check for update* to check for updates.

## Google Play system update

Check if a Google Play system update is available.

1. From the Home screen, swipe up to access Apps and tap *Settings* .

2. Tap Security  > Google Play system update.
3. Follow any steps on the screen.

## Find My Device

Find My Device helps you locate your device remotely, keeping your data safe if your phone is lost.

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap Security  > Find My Device .

3. Slide the switch to the On  position to activate Find My Device.

- There are several ways available to locate your device.

## Screen lock

1. From the Home screen, swipe up to access Apps and tap Settings  .

2. Tap Security  > Screen lock .

- None: Disable any screen lock.
- Swipe: Tap to set swipe to unlock.
- Pattern: Tap to set an unlock pattern. Follow the prompts to finish the settings.

- *PIN: Tap to set a PIN code as the screen unlock method.*

- *Password: Tap to set a password as the screen unlock method.*

*Important: To protect your phone and data from unauthorized access, it is recommended that you use the highest security level available (Password protection). It is also recommended you frequently change your password to ensure the safety of your phone and personal data. If you failed to enter the correct pattern, PIN, or password, after five attempts, you will be prompted to wait for 30 seconds before you can try again.*

3. Tap  next to Screen lock to adjust some settings on screen lock.

- *Make pattern visible: Slide the switch to the On  position to make the pattern visible.*
- *Lock after screen timeout: Tap to set an automatic lock timer.*
- *Power button instantly locks: Slide the switch to the On  position to activate instant lock with the power button.*

*Note: “Make pattern visible” is only available when the pattern screen lock is set.*

## *Fingerprint*

*In addition to unlocking your phone, you can also use your*

*fingerprint to authorize purchases and app access.*

- 1. From the Home screen, swipe up to access Apps and tap Settings .*
- 2. Tap Security  > Fingerprint .*

## Add a fingerprint

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap Security  > Fingerprint.
3. Enter your pattern, PIN, or password.

Note: To add a fingerprint, you must set your backup screen lock method first.

4. Tap Next. Put your finger on the sensor on the back of your phone and lift after you feel a vibration. Keep pressing and lifting your finger to add the different parts of your fingerprint.

5. Tap the  to delete a saved fingerprint.

6. Tap  Add fingerprint to add another fingerprint.

## Smart Lock

Unlock your device automatically in certain conditions.

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap Security  > Smart Lock .
  - On-body detection: Tap and slide the switch to the On  position to activate. Your device will now be kept unlocked while it is on you.
  - Trusted places: Tap to add a trusted location where the device can remain unlocked.

2. Tap System  > Backup.
3. Slide the Backup by Google One switch to the On  or Off  position to enable or disable automatic backup to your Google One.

## Backup details

You can check what data and which apps are included in your backup.

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap System  > Backup > Backup details .

### Advanced settings

- Back up using mobile data: Slide the switch to the On  or Off  position to enable or disable backup using mobile data.

## Reset options

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap System  > Reset options.

- **Reset Wi-Fi, mobile & Bluetooth:** Reset all network settings, including Wi-Fi, Mobile data, and Bluetooth. Tap RESET SETTINGS to reset.
- **Reset app preferences:** Reset all app preferences, including disabled apps, disabled app notifications, default apps, background data restrictions, etc. Tap RESET APPS to reset.
- **Erase downloaded SIMs:** Erase all data on your downloaded SIMs.
- **Erase all data (factory reset):** Completely erase all data from your phone's internal storage and reset the device to factory settings. Tap Erase all data to reset.

*Note: Performing a factory reset will also erase any data on an installed SD card. Unmount the card to avoid losing any data you may have stored on it.*

## Multiple users

You can share this device with other people by creating additional users. Each user has their own space, which they can customize with apps, wallpaper, and so on. Users can also adjust device settings like Wi-Fi that affect everyone.

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap System  > Multiple users.

Edit your profile info

1. From the Home screen, swipe up to access Apps and tap Settings  .
2. Tap System  > Multiple users > You (Owner) .
3. Enter a name.

4. Tap  to add a photo.

5. Tap OK to confirm.

## Add a new user

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap System  > Multiple users.

3. Tap  Add user > OK to set up a new user.

## Switch users

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap System  > Multiple users.

3. Tap the name of the user you want to switch to.

4. Restart the phone to switch back to the Owner/Admin profile.

## Delete users

1. From the Home screen, swipe up to access Apps and tap Settings .

2. Tap System  > Multiple users.

3. Tap the user you want to delete.

4. Tap Delete user > DELETE to remove the user.

- Other users can delete their own profiles by tapping Menu  >

Delete  
[name of user] from this device >  
DELETE.

*Note: All apps and data stored on the user's profile will also be deleted.*

## Add user from lock screen

Not only can you switch between profiles from the lock screen, but you can also add users directly from it.

1. From the Home screen, swipe up to access Apps and tap Settings .
2. Tap System  > Multiple users.
3. Slide the Add users from lock screen switch to the On  position to enable it.
4. From lock screen, drag the status bar down to display the quick settings panel.
5. Tap  to access the User settings screen.
6. Tap Add guest or Add user to add users.

# About phone

Access important phone information, search for and apply updates, and view legal and safety information.

1. From the Home screen, swipe up to access Apps and tap Settings 

2. Tap About phone 

- **Device name:** Tap to edit your phone's display name.
- **Phone number:** Display your phone number.
- **Legal information:** View your device's legal information, including third-party licenses, Google legal, system web view licenses, etc.

- *SIM status: View your SIM status information, such as the Network, Phone*

*number on SIM, Mobile network state,  
etc.*

- *Model & hardware: View your device model and hardware information.*
- *IMEI: View your IMEI.*
- *Android version: View your device's current Android version and other relevant information.*

# For assistance

## Troubleshooting

Check below for solutions to common problems you may experience.

**Problem:** The phone freezes or operations are unstable.

**Solution:** Restart the device. Press and hold the Power key, then tap Restart .

**Note:** Data that was being edited will be erased when the device is restarted.

**Problem:** The device starts freezing after installing a new app.

**Solution:** The newly-installed app may be causing the device to freeze. Uninstall the app in Safe mode. To enable Safe mode:

- Press and hold the Power key, then touch and hold Power off. Read the disclaimer for Safe mode, and then tap OK .
  - After turning the phone on in Safe mode, “Safe mode” will appear at the bottom left corner.
  - After restarting in Safe mode, your phone can be powered on as usual.
  - Before enabling Safe mode, it is recommended that you back up important data.
- To exit Safe mode, restart the device. Press and hold the Power key, then tap Restart . The phone will reboot in normal mode.

*Problem: The phone will not make calls, send messages, check email, or connect to the Internet.*

- Solution 1: The network signal may be too weak or you may be out of the service area. Return to an area with a strong network signal.*
- Solution 2: Restart the device. Press and hold the Power key, then tap Restart.*
- Solution 3: Make sure Airplane mode is not active. From the Home screen, swipe up to access Apps and tap Settings  > Network & internet  > Airplane mode and ensure the switch is in the Off  position.*
- Solution 4: Make sure mobile data is enabled. From the Home screen, swipe up to access Apps and tap Settings  > Network & internet  > Mobile network and ensure the switch is in the On  position.*

*Problem: The battery drains too quickly.*

*Solution: Making calls or connecting to a mobile network outside of your service area will drain the battery. Certain apps and functions can also drain the battery.*

*Tip: You can enable the Battery Manager to help identify which apps are draining the battery. From the Home screen, swipe up to access Apps and and*

tap Settings  > Battery  > Battery Manager and slide the switch to the On position.

*Problem: An app will not download or install.*

- Solution 1: Make sure the device has enough space for the app. Apps may not be installed with minimal free space on the phone or SD card. To check free storage space, see ["Privacy" on page 187.](#)*
- Solution 2: The app is not supported by your phone. Make sure your software version is up to date and download any updates.*

*Problem: The phone will not unlock.*

- Solution 1: Make sure you entered your pattern/PIN/password correctly.*
- Solution 2: Restart the device. Press and hold the Power key, then tap Restart .*

*Note: Data that was being edited will be erased when the device is restarted.*

# Specifications

The following tables list your phone's and battery's specifications.

## Phone specifications

Specification	Description
Weight	Approx. 177 g
Continuous talk time	Up to 15 hours
Continuous standby time	Up to 890 hours
Charging time	Approx. 3 hours
Dimensions (L x W x H)	Approx. 167.08 x 76.91 x 8.39 mm
Display	6.5", 20:9 HD+V IPS, 1600 x 720
Processor	2.0 GHz 4-core, MediaTek MT6761WB
Cameras	Rear: 13 MP, Front: 5 MP
Memory	3 GB RAM / 32 GB ROM
Communication speed	4G LTE: B2, 4, 5, 12, 14, 30
Android version	Android 12

## Battery specifications

Item	Description
Voltage	4.40 V
Type	Lithium-ion
Capacity	Typical capacity: 3900 mA Rated capacity:

# *Safety and use*

---

*The topics in this section will introduce how to use your mobile device safely.*

## Please read before proceeding

THE DEVICE IS NOT FULLY CHARGED WHEN YOU TAKE IT OUT OF THE BOX . DO NOT ATTEMPT TO REMOVE THE BATTERY PACK . YOUR WARRANTY IS INVALIDATED IF YOU DISASSEMBLE OR ATTEMPT TO DISASSEMBLE THE DEVICE .

### Important health information and safety precautions

When using this product, the safety precautions below must be taken to avoid possible legal liabilities and damages. Retain and follow all product safety and operating instructions. Observe all warnings in the operating instructions on the product.

To reduce the risk of bodily injury, electric shock, fire, and damage to the equipment, observe the following precautions.

#### Electrical safety

This product is intended for use when supplied with power from the designated battery or power supply unit. Other usages may be dangerous and will invalidate any approval given to this product.

#### Safety precautions for proper grounding installation

*Warning: Connecting to an improperly grounded equipment can result in an electric shock to your device .*

*This product is equipped with a USB Cable for connecting with desktop or notebook computers. Be sure your computer is properly grounded (earthed) before connecting this product to the computer. The power supply cord of a desktop or notebook computer has an equipment grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet which is properly installed and grounded in accordance with all local codes and ordinances.*

## Safety precautions for power supply unit

### Use the correct external power source

A product should be operated only from the type of power source indicated on the electrical ratings label. If you are not sure of the type of power source required, consult your authorized service provider or local power company. For a product that operates from battery power or other sources, refer to the operating instructions that are included with the product.

This product should be operated only with the following designated power supply unit(s).

Travel charge: Input: 100-240V, 50/60Hz, 0.35A. Output: 5V, 2000mA.

### Handle battery packs carefully

This product contains a Lithium-ion battery. There is a risk of fire and burns if the battery pack is handled improperly. Do not attempt to open or service the battery pack. Do not disassemble, crush, puncture, short circuit the external contacts or circuits, dispose of in fire or water, or expose a battery pack to temperatures higher than 140°F (60°C). The operating temperature for the phone is 14°F (-10°C) to 113°F (45°C). The charging temperature

for the phone is 32°F (0°C) to 113°F (45°C).

*Warning: Battery is nonremovable . Do not attempt to remove the battery for danger of explosion .*

*To reduce the risk of fire or burns, do not disassemble, crush, puncture, short circuit the external contacts, expose to temperature above 113°F (45°C),*

*or dispose of in fire or water. Do not attempt to replace the non-removable battery. The phone and battery as a unibody device must be disposed of*

*in accordance with locally applicable environmental regulations or guides supplied with your product.*

### *Take extra precautions*

- Do not disassemble or open, crush, bend or deform, puncture, or shred.*
- Do not short circuit a battery or allow metallic conductive objects to contact the battery terminals.*
- Only use the USB cable provided with the phone or that bear the USB-IF logo or have completed the USB-IF compliance program.*
- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion, or other hazards.*
- Device usage by children should be supervised.*
- Only use the battery with a charging system that has been qualified with the system per CTIA Certification Requirement for Battery System Compliance to IEEE1725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or*

*other hazards.*

- *Avoid dropping the phone. If the phone is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.*
- *Improper battery use may result in a fire, explosion, or other hazards.*

- If the battery leaks:
  - Do not allow the leaking fluid to come in contact with skin or clothing. If already in contact, flush the affected area immediately with clean water and seek medical advice.
  - Do not allow the leaking fluid to come in contact with eyes. If already in contact, DO NOT rub; rinse with clean water immediately and seek medical advice.
  - Take extra precautions to keep a leaking battery away from fire as there is a danger of ignition or explosion.

### Safety precautions for direct sunlight

Keep this product away from excessive moisture and extreme temperatures. Do not leave the product inside a vehicle or in places where the temperature may exceed 113°F (45°C), such as on a car dashboard, window sill, or behind a glass that is exposed to direct sunlight or strong ultraviolet light for extended periods of time. This may damage or overheat the product, or pose a risk to the vehicle.

### Prevention of hearing loss

Permanent hearing loss may occur if earphones or headphones are used at a high volume for prolonged periods of time.

### Safety in aircraft

*Due to the possible interference caused by this product to an aircraft's navigation system and its communications network, using this device's phone function on board an airplane is against the law in most countries. If you want to use this device while on board an aircraft, remember to turn off your RF on your phone by switching to Airplane mode.*

## *Environment restrictions*

*Do not use this product in gas stations, fuel depots, chemical plants or where blasting operations are in progress, or in potentially explosive atmospheres such as fueling areas, fuel storehouses, below deck on boats, chemical plants, fuel or chemical transfer or storage facilities, and areas where the air contains chemicals or particles, such as grain, dust, or metal powders. Please be aware that sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.*

## *Explosive atmospheres*

*When in any area with a potentially explosive atmosphere or where flammable materials exist, the product should be turned off and the user should obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Users are advised*

*not to use the equipment at refueling points, such as service or gas stations, and are reminded of the need to observe restrictions on the use of radio equipment in fuel depots, chemical plants, or where blasting operations*

*are in progress. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. These include fueling areas, below deck on boats, fuel or chemical transfer or storage facilities, and areas where*

the air contains chemicals or particles, such as grain, dust, or metal powders.

### Road safety

Full attention must be given to driving at all times in order to reduce the risk of an accident. Using a phone while driving (even with a hands-free kit) causes distraction and can lead to an accident. You must comply with local laws and regulations restricting the use of wireless devices while driving.

## *Safety precautions for RF exposure*

- *Avoid using your phone near metal structures (for example, the steel frame of a building).*
- *Avoid using your phone near strong electromagnetic sources, such as microwave ovens, sound speakers, TV, and radio.*
- *Use only original manufacturer-approved accessories or accessories that do not contain any metal.*
- *Use of non-original manufacturer-approved accessories may violate your local RF exposure guidelines and should be avoided.*

## *Interference with medical equipment functions*

*This product may cause medical equipment to malfunction. The use of this device is forbidden in most hospitals and medical clinics.*

*If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your healthcare provider may be able to assist you in obtaining this information.*

*Turn your phone OFF in healthcare facilities when any regulations posted in these areas instruct you to do so. Hospitals or healthcare facilities may be using equipment that could be sensitive to external RF energy.*

## *Non-ionizing radiation*

*Your device has an internal antenna. This product should be operated in its normal-use position to ensure the radioactive performance and safety of the interference. As with other mobile radio transmitting equipment, users are advised that for satisfactory operation of the equipment and for the safety of personnel, it is recommended that no part of the human body be allowed to come too close to the antenna during operation of the equipment.*

Use only the supplied integral antenna. Use of unauthorized or modified antennas may impair call quality and damage the phone, causing loss of performance and SAR levels exceeding the recommended limits as well as result in noncompliance with the local regulatory requirements in your country.

To assure optimal phone performance and ensure human exposure to RF energy is within the guidelines set forth in the relevant standards, always use your device only in its normal-use position. Contact with the antenna area may impair call quality and cause your device to operate at a higher power level than needed.

Avoiding contact with the antenna area when the phone is IN USE optimizes the antenna performance and the battery life.

## Electrical safety

### Accessories

- Use only approved accessories.
- Do not connect with incompatible products or accessories.
- Take care not to touch or allow metal objects, such as coins or key rings, to contact or short circuit the battery terminals.

### *Connection to a car*

*Seek professional advice when connecting a phone interface to the vehicle electrical system.*

### *Faulty and damaged products*

- Do not attempt to disassemble the phone or its accessory.*
- Only qualified personnel may service or repair the phone or its accessories.*

## *General precautions*

*You alone are responsible for how you use your phone and any consequences of its use. You must always switch off your phone wherever the use of a phone is prohibited. The use of your phone is subject to safety measures designed to protect users and their environment.*

## *Avoid applying excessive pressure to the device*

*Do not apply excessive pressure on the screen or the device to prevent damage. Remove the device from your pants' pocket before sitting down.*

*It*

*is also recommended that you store the device in a protective case and only use the device stylus or your finger when interacting with the touch screen. Cracked display screens due to improper handling are not covered by the warranty.*

## *Device getting warm after prolonged use*

*When using your device for prolonged periods of time, such as when you're talking on the phone, charging the battery, or browsing the Web, the device may become warm. In most cases, this condition is normal and therefore should not be interpreted as a problem with the device.*

## Heed service markings

Except as explained elsewhere in the Operating or Service documentation, do not service any product yourself. Service needed on components inside the device should be done by an authorized service technician or provider.

## Protect your phone

- Always treat your phone and its accessories with care and keep them in a clean and dust-free environment.

- Do not expose your phone or its accessories to open flames or lit tobacco products.
- Do not expose your phone or its accessories to liquid, moisture, or high humidity.
- Do not drop, throw or try to bend your phone, or its accessories.
- Do not use harsh chemicals, cleaning solvents, or aerosols to clean the device or its accessories.
- Do not paint your phone or its accessories.
- Do not attempt to disassemble your phone or its accessories, only authorized personnel must do so.
- Do not expose your phone or its accessories to extreme temperatures, minimum 14°F (-10°C) and maximum 113°F (45°C).
- Please check local regulations for disposal of electronic products.
- Do not carry your phone in your back pocket as it can break when you sit down.

### *Damage requiring service*

*Unplug the product from the electrical outlet and refer servicing to an authorized service technician or provider under the following*

*conditions:*

- *Liquid has been spilled into or an object has fallen onto the product.*
- *The product has been exposed to rain or water.*
- *The product has been dropped or damaged.*
- *There are noticeable signs of overheating.*
- *The product does not operate normally when you follow the operating instructions.*

### *Avoid hot areas*

*The product should be placed away from heat sources such as radiators, heat registers, stoves, or any device producing heat.*

### *Avoid wet areas*

*Never use the product in a wet location.*

### *Avoid using your device after a dramatic change in*

*temperature. When you move your device between environments with very different temperature and/or humidity ranges, condensation may form on or within*

*the device. To avoid damaging the device, allow sufficient time for the moisture to evaporate before using the device.*

*NOTICE: When taking the device from low temperature conditions into a warmer environment or from high-temperature conditions into a cooler environment, allow the device to acclimate to room temperature before turning on the power.*

### *Avoid pushing objects into the product*

*Never push objects of any kind into cabinet slots or other openings in the product. Slots and openings are provided for ventilation. These openings must not be blocked or covered.*

## *Airbags*

*Do not place a phone in the area over an airbag or in the airbag deployment area. Store the phone safely before driving your vehicle.*

## *Mounting accessories*

*Do not use the product on an unstable table, cart, stand, tripod, or bracket. Any mounting of the product should follow the manufacturer's instructions*

*and should use a mounting accessory recommended by the manufacturer.*

### *Avoid unstable mounting*

*Do not place the product with an unstable base.*

### *Use product with approved equipment*

*This product should be used only with personal computers and options identified as suitable for use with your equipment.*

### *Adjust the volume*

*Turn down the volume before using headphones or other audio devices.*

### *Cleaning*

*Unplug the product from the wall outlet before cleaning.*

*Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning, but NEVER use water to clean the LCD screen.*

### *Small children*

*Do not leave your phone and its accessories within the reach of small children or allow them to play with it. They could hurt themselves, or others, or could accidentally damage the phone. Your phone contains small parts with sharp edges that may cause an injury, or which could*

*become detached and create a choking hazard.*

### *Repetitive motion injuries*

*To minimize the risk of RSI, when texting or playing games with your phone:*

- Do not grip the phone too tightly.*
- Press the buttons lightly.*

- *Make use of the special features in the handset which minimize the number of buttons which have to be pressed, such as message templates and predictive text.*
- *Take lots of breaks to stretch and relax.*

### *Operating machinery*

*Full attention must be given to operating the machinery in order to reduce the risk of an accident.*

### *Loud noise*

*This phone is capable of producing loud noises which may damage your hearing.*

### *Emergency calls*

*This phone, like any wireless phone, operates using radio signals, which cannot guarantee connection in all conditions. Therefore, you must never rely solely on any wireless phone for emergency communications.*

# Regulatory agency identifications

## FCC Regulations

*This mobile phone complies with Part 15 of the FCC Rules.*

*Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.*

*This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in*

*a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.*

*However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:*

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## RF Exposure Information (SAR)

This mobile phone meets the government's requirements for exposure to radio waves. This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands.

Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the power output.

The highest SAR value for the model phone as reported to the FCC when tested for use at the ear is 1.19 W/kg, in hot spot mode is 1.12 W/kg, and when worn on the body, as described in this user guide, is 0.83 W/kg (Body-worn measurements differ among phone models,

depending upon available accessories and FCC requirements).

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of [www.fcc.gov/oet/ea/fccid](http://www.fcc.gov/oet/ea/fccid) after searching on FCC ID: XD6U626AA.

For body-worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

If you do not use a body-worn accessory and are not holding the phone at the ear, position the handset a minimum of 1.5 cm from your body when the phone is switched on.

## Hearing Aid Compatibility

### (HAC) for Wireless Telecommunication Devices

This phone has a HAC rating of

M4/T4 . What is hearing aid

compatibility?

The Federal Communications Commission has implemented rules and a rating system designed to enable people who wear hearing aids to more effectively use these wireless telecommunications devices. The standard for compatibility of digital wireless phones with hearing aids is set forth in American National Standard Institute (ANSI) standard C63.19. There are

two sets of ANSI standards with ratings from one to four (four being the best rating): an “M” rating for reduced interference making it easier to hear conversations on the phone when using the hearing aid microphone, and a “T” rating that enables the phone to be used with hearing aids operating in the telecoil mode thus reducing unwanted background noise.

How will i know which wireless phones are hearing aid compatible?

The Hearing Aid Compatibility rating is displayed on the wireless phone box. A phone is considered Hearing Aid Compatible for acoustic coupling (microphone mode) if it has an “M3” or “M4” rating. A digital wireless phone is considered Hearing Aid Compatible for inductive coupling (telecoil mode) if it has a “T3” or “T4” rating.

# Warranty

With this manufacturer's warranty (hereinafter: the "Warranty"), Emblem Solutions (hereinafter: the "Manufacturer") guarantees this product against any material, design and manufacturing defects. The duration of this Warranty is specified in article 1 below.

This Warranty does not affect your statutory rights, which cannot be excluded or limited, in particular in relation to the applicable legislation on defective products.

## Warranty duration:

The product may consist of several parts, which may have separate warranty periods, to the extent permitted by local laws. The "Warranty Period" (as defined in the table below) takes effect on the date of purchase of the product (as indicated on the proof of purchase).

### 1. Warranty period (see table below)

Phone	24 Months
USB Cable and Charger	12 Months
Other Accessories (if included in the box)	12 Months

### 2. Warranty period for repaired or replaced parts:

Subject to special provisions of local laws in force, the repair or

replacement of a product does not, under any circumstances whatsoever, extend the original warranty period of the product concerned. However, the repaired or replaced parts are guaranteed in the same manner and for the same defect for a period of ninety days after delivery of the repaired product, even if their initial warranty period has expired. Proof of purchase required.

## Implementation of the Warranty

If your product is faulty under normal conditions of use and maintenance, in order to benefit from the present warranty, please contact the Returns Center at 1(800) 801-1101 for assistance. The customer support center will then provide you with instructions on how to return the product for support under warranty. For more information, please visit [att.com/warranty](http://att.com/warranty).

## Warranty exclusions

Manufacturer guarantees its products against material, design and manufacturing defects. The Warranty does not apply in the following cases:

1. Normal wear and tear of the product (including on camera lenses, batteries and screens) requiring periodic repair and replacement.
2. Defects and damages due to negligence, to the product being used other than in a normal and customary manner, to the non-compliance with the recommendations of this User Manual, to an accident, regardless of the cause. Instructions for use and maintenance of the product can be found in your product's User Manual.
3. The opening, unauthorized disassembly, modification being carried out

or repair of the product by the end user or by persons or by service providers not approved by Manufacturer and/or with spare parts not approved by Manufacturer.

4. Use of the product with accessories, peripherals and other products whose type, condition and/or standards do not meet Manufacturer's standards.
5. Defects associated with the use or connection of the product to equipment or software not approved by Manufacturer. Some defects may be caused by viruses due to unauthorized access by yourself or by a third party service, computer systems, other accounts or networks. This unauthorized access may take place through hacking, misappropriation of passwords or various other means.

6. Defects and damage due to the exposure of the product to humidity, extreme temperatures, corrosion, oxidation, or to any spillage of food or liquids, chemicals and generally any substance likely to alter the product.
7. Any failure of embedded services and applications that have not been developed by Manufacturer and whose functioning is the exclusive responsibility of their designers.
8. Installation and use of the product in a manner that does not comply with the technical or security standards of regulations in force in the country where it's installed or used.
9. Modification, alteration, degradation or illegibility of the IMEI number, serial number or EAN of the product.
10. Absence of proof of purchase.

Upon expiration of the warranty period or upon an exclusion of warranty, Manufacturer may, at its discretion, provide a quote for the repair and offer to provide support for the product, at your cost.

The Manufacturer contact and after-sales service details are subject to change. These Warranty terms may vary substantially according to your country of residence.

*DOC20220115*
