Dear Sirs

This is a letter of authorization for the FCC to use information on file for Model WLM200NX mini-PCI Radio module FCC number TK4-09-WLM200NX (Compex Networks Grant holder) and to allow a new FCC ID number be issued to EION for the radio module. This will enable EION Inc to obtain a multiple listing certification from the FCC for the product model SP1110, which uses the radio module as its sole transmitter source.

It is understood that the multiple listing of a modular approved is required when a manufacturer or distributor wishes to list under its name and unique model number, certified modular equipment of an original equipment manufacturer

We also declare that the radio module WLM200NX used by EION is identical to the product that has been certified by Compex with the FCC. To the best of our knowledge the modules are being utilized by EION without any modification to module hardware or firmware residing in the module as released by Compex through its distributors. Instructions for the use of the module have also been given to EION who agree to comply with them. The EION product uses our radio module (miniPCI form factor) which with a Compex single board computer, Linux based custom OS -SW by EION, Compex enclosure, integrated MIMO antennas and POE system.

If there is any further information required concerning this letter of approval please contact Remy Liaw of Compex Systems Pte Ltd, remy_liaw@compex.com.sg

Sincerely

A handwritten signature in black ink, appearing to read "K. Ang".

Katherine Ang
Director, Sales & Marketing
