

ExcelStor wireless storage and media server user's manual

Thank you for selecting an ExcelStor wireless storage and media server. This user's manual will guide you through the use of your server.

Note: Printed capacity on the product label is Decimal.

(Decimal: 1GB=1,000,000,000 Bytes)

Computer's hardware & software recognize the HDD capacity with Binary.

(Binary: 1GB=1,073,741,824 Bytes)

Accessable capacity may very depending on operating environment and formatting.

Package content

1	Wireless storage and media server	1
2	USB cable	1
3	AC power adapter	1
4	Travel pouch	1
5	User's manual	1
6	Quick start guide	1

1 : Product Specification

- **Build-in hard drive**

- 1.8" IDE interface

- 60GB / 120GB

- **Media file formats supported for RSP streaming**

- Music - MP3, WMA, AAC

- Photo - JPEG, PNG

- Video - MPEG2, MPEG4, H.264, H.263, AMR, WMV

- **File system supported**

- FAT32

- **Wireless security**

- WPA2, WPA-PSK, WEP64, WEP128

- **Battery**

- LithiumPolymer 2000mAh, 3.7V, user-replaceable

- Standby: 48 hours

- Operating: 3 hours

- Charging cycles (minimum): 500

- **System requirements**

- PC with Windows 2000/XP/Vista, Linux 2.6.x or later

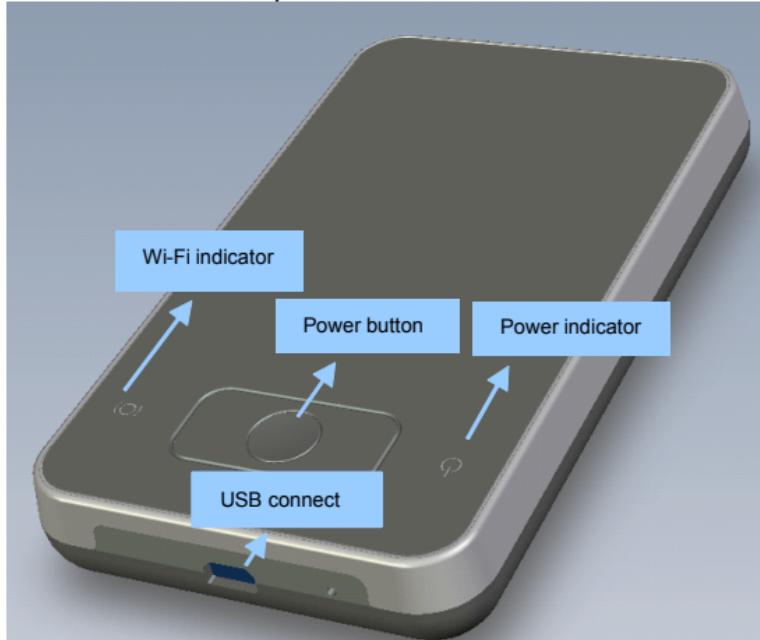

- MAC OS X 10.3.x or later

- PC, network router, mobile phone, game console or handheld with 802.11 b/g Wi-Fi wireless capability

6: Frequently asked question

1. Q: Why when I input correct IP address, web browser reminded "Internet Explorer cannot display the webpage"?

A: Before you accessing the WSD, you should connect WSD to your PC correctly. Please read the "Quick Start Guide" for detailed description.

2. Q: Why My PC cannot recognize WSD when it connect to USB port ?

A: you didn't turn on the USB Mass Storage of WSD, please access the WSD via wireless connection. Turn on the USB Mass Storage in web browser interface.(refer to chapter 4: go to USB mass storage).

Or you can connect to USB port after power off the WSD. it will automatically power on. Then you unplug it and plug it again. Then WSD should be recognized by PC.

Warranty limitation

Warranty is void if returned product exhibits a defect attributable to:

- Abuse, unreasonable use, mistreatment, or neglect
- Damage caused by the equipment or system with which the product is used
- Damage caused by modification or repair not made or authorized by ExcelStor
- Products whose ExcelStor Serial Number and/or Material Number label have been removed, torn or defaced
- Damage caused by use of non-ExcelStor packaging
- Damage caused by improper or improperly used packaging
- Damage caused by lack of ESD protection
- Products that are determined to be stolen

The product is warranted against workmanship and material defects and conforms to ExcelStor's specification for the particular product. The warranty period commences from the manufacturer's original shipping date. If the product is deemed defective due to workmanship or material defect, you may return it to the retailer where you bought the hard disk. For more detailed information, you may reach us at:

For a Class B digital device or peripheral, the instructions furnished the user shall include the following or similar statement, placed in a prominent location in the text of the manual:

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: RF exposure from the user's distance is 20cm.
