How to pair the CK series Bluetooth Keyboard with PC

1. Go to "Setting " in the Windows and select "Bluetooth and other device", select "add Bluetooth or other devices"
2. In the prompt out window, select "Bluetooth"
3. Pressing "Fn + ⅄ " to switch the keyboard into Bluetooth pairing mode, indicator LED will flash.
4. On the PC side, in the prompt out window, the PC should be able to find a device called " CKxxx", please select the " CKxxx".
5. A window will prompt out for showing a pairing code , please type exactly the provided code on the keyboard as shown in the window and then press the "Enter" on the keyboard to confirm the pairing.
6. After the Step 5, indicator LED will stop flashing, the keyboard should be able to show up in the "Mouse, keyboard, & pen" category, now the keyboard is connected to the target PC and ready to use.
