Remove the screws of the battery cover with a screwdriver

Take out the dongle

Put in the supplied batteries as marked in the battery compartment

Close the battery cover

Start your computer and connect the dongle to a USB port

After automatic driver installation, the mouse can be used

Delivery

2,4GHz Wireless Mouse

1AAA Batteries

2,4GHz Dongle with USB-Connector

Quick Start Guide

Compatibility	All Operating Systems Supporting Standard USB Mouse
Temperature Range	Storage: -20° to +60° Operating: 0° to +50°
Dongle	
Interface	USB
Power Supply	5VDC
Dimensions	Appr. 19 x 15 x 6 mm
Mouse	
Mouse Protection	Silicon membrane, fully sealed IP68
Weight	Appr. 100g (without packaging & batteries)
Dimensions	Appr. 112 x 68 x 38 mm
Keys	2 Mouse Keys, Scroll Wheel Sensor
Key Travel	Appr. 1mm
Chemical Resistance	Suitable for most clinical cleaning agents and surface disinfectants
Approvals	CE, FCC

Possible Error	Remedy
Battery low	Insert new batteries
Connection between the mouse and dongle is not working	Repeat initial Start
Mouse isn't responding	Left click to get mouse out of standby

Wireless Mouse: HM805(FCC ID:XENHM805)

Wireless Mouse Dongle: WMD(FCC ID:XEN-WMD)

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
