Subject:Acknowledgment of FCC Modular approval requirementsApplicant:XPLORERProduct:XPWSA2FCC ID:XFJWSA2

To Whom It May Concern:

This application is the XPWSA2 range is a headphone part of a wireless metal detector. All XPWSA2 models are identical except for external enclozure size :

- ➢ WSA2 : small size
- ➢ WSA2XL : big size

| Modular Approval Requirement  | Yes | No |
|---|-----|----|
| (i) The radio elements of the modular transmitter must have their own     |     | х  |
| shielding. The physical crystal and tuning capacitors may be located      |     |    |
| external to the shielded radio elements.                                  |     |    |
| (ii) The modular transmitter must have buffered modulation/data inputs    | х   |    |
| (if such inputs are provided) to ensure that the module will comply with  |     |    |
| part 15 requirements under conditions of excessive data rates or over-    |     |    |
| modulation.   |     |    |
| (iii) The modular transmitter must have its own power supply regulation.  | х   |    |
| (iv) The modular transmitter must comply with the antenna and             | х   |    |
| transmission system requirements of §§ 15.203, 15.204(b) and              |     |    |
| 15.204(c). The antenna must either be permanently attached or employ      |     |    |
| a "unique" antenna coupler (at all connections between the module         |     |    |
| and the antenna, including the cable). The "professional installation"    |     |    |
| provision of § 15.203 is not applicable to modules but can apply to       |     |    |
| limited modular approvals under paragraph (b) of this section.            |     |    |
| (v) The modular transmitter must be tested in a stand-alone               |     | х  |
| configuration   |     |    |
| (vi) The modular transmitter must be equipped with either a               | х   |    |
| permanently affixed label or must be capable of electronically displaying |     |    |
| its FCC identification number.  |     |    |

| (vii) The modular transmitter must comply with any specific rules or<br>operating requirements that ordinarily apply to a complete transmitter<br>and the manufacturer must provide adequate instructions along with<br>the module to explain any such requirements. A copy of these<br>instructions must be included in the application for equipment<br>authorization. | x |  |
|--|---|--|
| (viii) The modular transmitter must comply with any applicable RF  | x |  |
| exposure requirements in its final configuration.  |   |  |

The module is only integrated in XPLORER equipment. It is systematically tested in the host equipment.

Regards,

Alain Loubet August 4<sup>th</sup>, 2021 e e
