

INSTRUCTION

SPIN DRIFTER 360

KEEP THIS PACKAGE FOR REFERENCE AS IT CONTAINS IMPORTANT INFORMATION.

BATTERY INSTALLATION

The car requires 6 "AA" 1.5V batteries (not included). The controller requires one 9V battery (included). When changing batteries, adult supervision is required. Use alkaline batteries for the best performance.

- Carefully remove items from the package.
- Locate the battery door on the bottom of the car. Using a Phillips screwdriver, remove the screw.
- Pull the latch on the door to the left and lift up to access the battery compartment. Insert 6 "AA" batteries while observing the correct polarity (Fig.2).
- Replace the battery compartment door.
- Slide the battery door on the back of the controller down to open.
- Insert one 9V battery while observing the correct polarity (Fig.3).
- Replace the battery compartment door.
- Switch both the car and controller power switches to the "ON" position.

WARNING: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
