## **RF EXPOSURE STATEMENT**

According to KDB616217, systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy level in excess of the Commission's guidelines.

According to TCB Exclusions list, no SAR required if power is lower than the flowing threshold:

	Frequency Range		Contor Fraquanay	60/f SAR limitation
Lo	w Frequency	High Frequency	Center Frequency (MHz)	(mW)
	(MHz)	(MHz)		
	2412	2462	2437	24.62

Note: F=2.437 GHz

Maximum average measured transmitter power of this device is:

Maximum possible average output power(dBm)/(mW)	Max possible Antenna Gain(dBi)	Maximum EIRP(mW)
11.5 dBm	2	22.39 mW

Threshold at which no SAR required is 24.62 mW.

Maximum Tx power is 22.39mW EIRP.

**Conclusion:** No SAR is required.
