

# Statement and explanations

5G Wi Fi 6 Residential gateway (FCC ID: XIA-CFW4222A) is an indoor CPE product with WLAN and WWAN functions. The prototype has passed FCC certification (Model No.: CFW-4222 (original FCC ID of the prototype: XIA-CFW4222, awarded on January 19, 2023).

This time, a software upgrade has been carried out for the N41/77/78 UL MIMO section, with the power of the three frequency bands increased to PC1.5, while the remaining parts have not been modified. Considering the impact of the power increase on the three frequency bands, we have retested the N41/77/78 UL MIMO three frequency bands, and the remaining parts will continue to use the original data.

Standard	Test Plan	Original Reference Report
Part 15C	Data reuse	SEWM2210000221RG03 SEWM2210000221RG04 SEWM2210000221RG05
Part 15E	Data reuse	SEWM2210000221RG06 SEWM2210000221RG08
Part 22/24/27/90/96	Retest N41/77/78 UL MIMO, Other reuse	SEWM2210000221RG01 SEWM2210000221RG02 KSCR221100232701
Part 2.1901	Reassessment	NA

The specific specifications of the prototype are as follows:

WLAN 2.4G/5G/BT

LTE :B2/B4/B5/B7/B12/B13/B14/B17/B25/B26/B30/B66/B71/B38/B41/B48
