Ref: Modular Transmitter Approval for 200-Series Radio Module

The following information is being provided per the requirements of 15.212 regarding modular approval of Part 15 devices. This transceiver is a complete RF module with an integral reference oscillator. External connectors are provided for power and data communication.

The following numbered items correspond to similarly numbered paragraphs in 15.212.

1. The module has integral RF shielding.
2. All external data inputs are buffered.
3. There is voltage regulator on board that powers the radio transceiver.
4. An integral antenna or external antenna with a "unique" antenna coupler is used with this module. This is in accordance with Part 15.203.
5. The module was tested in a stand-alone configuration and found to be compliant with Part 15 regulations.
6. An FCC ID label is affixed to each unit at the time of manufacture. Information is also clearly presented in the Integration Guide about labeling requirements for the final assembly.
7. This unit is compliant with Part 15.247. Installation and other requirements are presented in the user guide to allow the unit to be correctly installed.
8. The unit is compliant with the RF exposure requirements of Parts 15.247 and 2.1091.

Sincerely,

A handwritten signature in black ink, appearing to read "Justin Bessette".
