User Notes

In order to avoid the consuming of battery for the first-time use of this album, there is a plastic paper of insulation which separates the battery on the cover of control remote of the packing box; please pull the plastic paper down before using. The method of installing and changing the battery: it needs to change the battery when the album is used for a long time or the remote control is not sensitive or the distance of remote control is very close. The press-key of remote control should be placed down and pull out the battery slot of remote control to take out the waste battery; use the “CR2025-3V” new battery of the same size with the “+” electrode up to put in the battery slot and then close the battery slot.

Preparations before using

After unpacking, please check carefully whether the accessories are complete as the pictures showing below:

Please read the User Manual carefully to get the operating methods and notes before using the frame.

Pay attention

- Only working in the defined range of AC/DC power supply. AC adapter inputs 100-240V~50/60Hz and outputs DC of 9V, 1.5A. Do not use power adapter which does not meet the requirement. If not using the album for a long time, please cut off the AC power of the adapter to ensure safety.
- While plugging into or pulling out of the power socket, the plug should be grasped firmly and the power cord shall not be pulled.
- Place the product on a flat and stable surface and pull out the rear stand, the power should not be turned on until the product has been supported stably. Do not put the album on rugged surface which is easy to be vibrated while using it.
- Avoid direct sunlight as well as using under the sunshine, do not use in environment with high temperature nor beside the radiator or heater. Neither using in bathroom nor natatorium under humid temperature. Prevent rain or water drops entering into the album.
- If moving the product from environment of outdoor low temperature to the indoor high temperature, or in case the difference in temperature is tremendous, please wait for 30 to 60 minutes before turning on the product.
- Since the LCD is made from brittle glasses, it is prohibited to knock the display with sharp objects or hand, do not flap nor fling the album while using, in order to prevent breaking the album or personal hurt.
- Do not wipe the display surface with dry cloth or objects including chemical detergent. The display surface could only be wiped lightly by soft cloth.

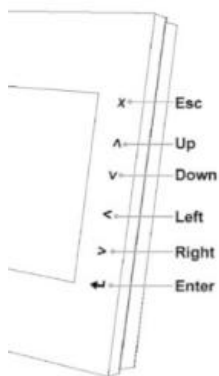

Product Specification

- LCD Display: 8-Inch LCD screen (800 X 600 pixels)
- Communications: Internal 802.11b/g (WEP64, WEP128, WPA1, WPA2)
- Interface: MMC/SD/MS card slot; USB 2.0 client port
- Memory Size: On-board FLASH memory 256M
- Remote Control for PC-less easy setup
- Touch Border design for easy navigation
- DVD quality video play
- Frame with its own email address, Email video clips to the frame
- Acceleration feature to get photo to frame from social networks and photo sharing sites in minutes
- Simply the best end-to-end platform to share photos and short videos with family and friends far away
- iPhone direct to frame enabled
- Weight: 3.0Lbs

Appearance Reference

On board buttons

- Esc button: Go back to the upper menu

- Enter button: It functions as the OK button under the menu and the settings
- Volume button: It can adjust the volume when playing videos.
- Mute button: Press it to turn down the sound and then turn up the sound when playing video.

Frame set up

■ Before set-up

Please have the following items ready before you begin the setup of your Connected Wi-Fi Digital Frame:

- Your Connected Wi-Fi Digital Frame, along with the power supply, USB cable.
- Internet connected Wi-Fi network with known SSID (network name), authentication type and the corresponding encryption key (WEP) or Pre-Shared Key, PSK (WPA), if encryption is implemented.

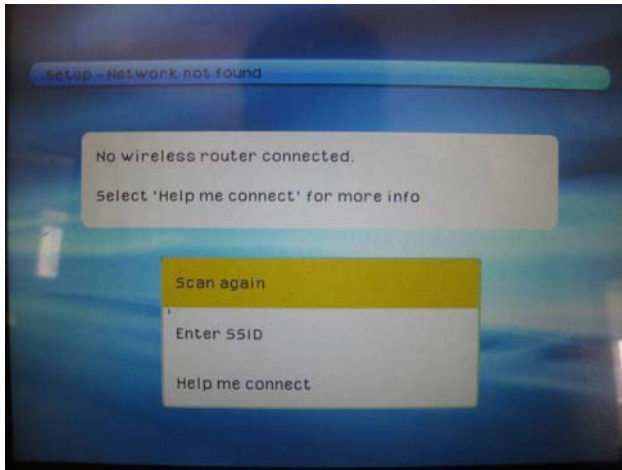

■ STEP1:

Power up your connected Wi-Fi Digital Frame by plugging in the power cord. The below message will appear on the frame indicating that the frame is searching for an available Wi-Fi signal.

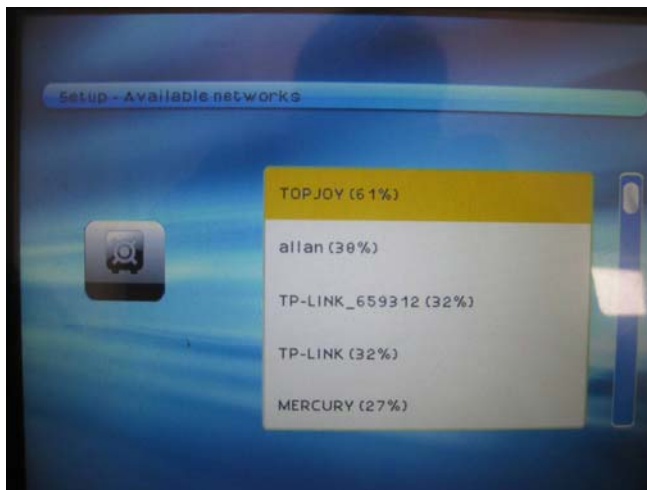

■ **STEP2:**

If your frame cannot locate a Wi-Fi signal, it will show a message indicating that no Wi-Fi network is connected. Please press the **Enter** button on your Remote Control with **Scan again**.

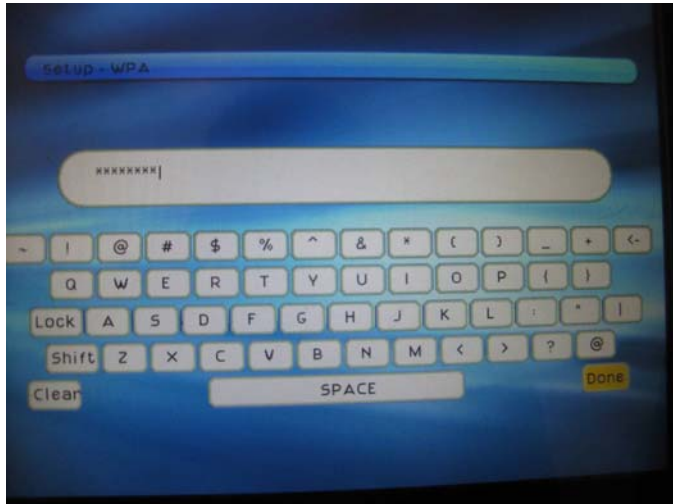

■ **STEP3:**

The frame will scan for any available Wi-Fi networks automatically. Press to highlight your specified Wi-Fi network, and then press **Enter**:

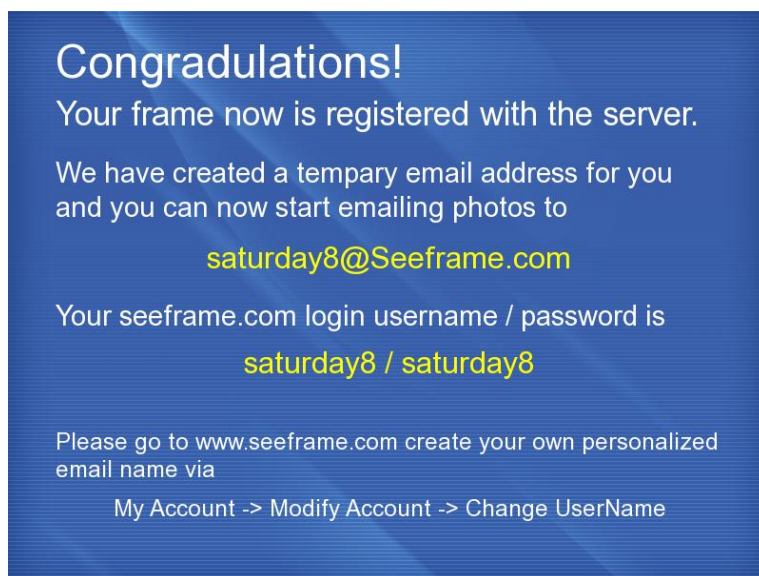

■ Step4:

Please enter your password by pressing the virtual keyboard buttons displayed on the screen by pressing to highlight your entries and then press **Enter**.

■ Step5:

Once the Wireless Network has been completed, the following message will be displayed on the frame:

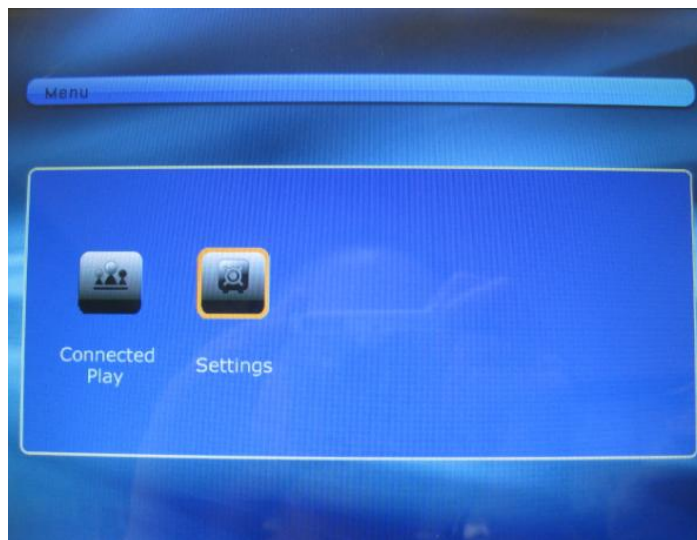

You have now completed the set-up process and are ready to start enjoying your Connected Wi-Fi Digital Frame.

FCC warning statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum 20 cm between the radiator and your body. This transmitter must not be collocated or operating in conjunction with any other antenna or transmitter unless authorized to do so by the FCC.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
