Federal Communications Commission

25 November 2021

SUBJECT: Permissive change application

To whom it may concern

Mimomax MWL-TORNADO-*GC* digital transceiver has been previously certified to FCC part 101 with FCC ID: XMK-MMXTRNB003. The product was certified for supporting bandwidths up to 50 kHz.

The current purpose is to apply for class 2 permissive changes based on the existing certified product by showing compliance for the 75 kHz bandwidth to Code of Federal Regulations (CFR) 47 Part 101 – Fixed Microwave Services.

The updated product has shown compliance to FCC part 101 in the test report supplied by EMC Technologies, NZ.

The updated product has no hardware difference compared to the certified product.

Yours sincerely

A handwritten signature in black ink, appearing to be "P. Reid". The signature is written in a cursive style with a long horizontal stroke at the end.
