SUBJECT: Test Frequencies Selection. (FCC ID: XMK-MMXTRNB005)

To whom it may concern

The selected frequencies, transmit of 806.00625MHz, 815.0000MHz, 823.9875Mhz, 851.00625MHz, 860.0000MHz and 868.9875MHz on which testing was carried out were chosen so as to be representative of a licensed frequency within the band allocations specified in 47CFR Part 90(b)(c). The selected frequencies are believed to be representative of the performance of the radio across the frequency range that certification is being sought. This decision was made based upon pretesting that showed that the performance of the radio is constant/identical across the operating range of the MiMOMax transceiver model type MWL-TORNADO-\*E A/B/C\*.

Yours sincerely

**Signatory:**

A handwritten signature in black ink, appearing to read 'Doug McConnell'. The signature is fluid and cursive, with the first name 'Doug' being more prominent.
