

RF circuit description

XMR201607EC25V_ provides an RF antenna PAD for customer's antenna connection. The RF trace in host PCB connected to the module RF antenna pad should be micro-strip line or other types of RF trace, whose characteristic impedance should be close to 50Ω. EC25-V, EC25-V(MINIPCIE) comes with grounding pads which are next to the antenna pad in order to give a better grounding.
