## Quectel Wireless Solutions Company Limited

Building 5, Shanghai Business Park Phase III (Area B), No.1016

Tianlin Road, Minhang District, Shanghai, China 200233

## Request for Modular/Limited Modular Approval

 Date: May 31, 2022

 Subject: Manufacturer's Declaration for
 □ - Modular Approval
 □ - Split Modular Approval

 □ - Limited Modular Approval
 □ - Limited Split Modular Approval

Confidentiality Request for: XMR2022EM120KGL

	Modular Approval Requirement	Require	ement Met
module does not ha installed in order for intended to prevent in the device into wh	itter must have its own RF shielding. This is intended to ensure that the ve to rely upon the shielding provided by the device into which it is all modular transmitter emissions to comply with FCC limits. It is also coupling between the RF circuitry of the module and any wires or circuits ich the module is installed. Such coupling may result in non-compliant sical crystal and tuning capacitors may be located external to the shielded	⊠ - YES	□ - NO(*
	– The module contains a metal shield which covers all RF components to possible to an antenna connector.	nts and circu	itry. The
provided) to ensure	itter must have <b>buffered modulation/data inputs</b> (if such inputs are that the module will comply with FCC requirements under conditions of s or over-modulation. 15.212(a)(1)(ii)	🛛 - YES	□ - NO(*
Details: <example provided with the a</example 	<ul> <li>Data to the modulation circuit is buffered as described in the operapplication&gt;</li> </ul>	ational descr	iption
3. The modular transmintended to ensure t	itter must have its own power supply regulation on the module. This is hat the module will comply with FCC requirements regardless of the supplying circuitry in the device into which the module is installed.	🛛 - YES	□ - NO(*
Details: <example this application&gt;</example 	– The module contains its own power supply regulation. Please refe	er to schema	tic filed with
requirements of must either be perm connections betwee installation" provisio	itter must comply with the antenna and transmission system §§ 15.203, 15.204(b), 15.204(c), 15.212(a), and 2.929(b). The antenna anently attached or employ a "unique" antenna coupler (at all n the module and the antenna, including the cable). The "professional n of § 15.203 is not applicable to modules but can apply to limited under paragraph 15.212(b). 15.212(a)(1)(iv)	🛛 - YES	□ - NO(*
	<ul> <li>The module connects to its antenna using an UFL connector which r. A list of antennas tested and approved with this device may be for application&gt;</li> </ul>		
not be inside another is capable of comply eventually installed. with the AC line con data input/output lin marketed with the m typical of actual use is no coupling betwee peripherals, or supp	itter must be tested in a stand-alone configuration, i.e., the module must or device during testing. This is intended to demonstrate that the module ving with Part 15 emission limits regardless of the device into which it is Unless the transmitter module will be battery powered, it must comply ducted requirements found in Section 15.207. AC or DC power lines and es connected to the module must not contain ferrites, unless they will be rodule (see Section 15.27(a)). The length of these lines shall be length or, if that length is unknown, at least 10 centimeters to insure that there een the case of the module and supporting equipment. Any accessories, ort equipment connected to the module during testing shall be unmodified ilable (see Section 15.31(i)). 15.212(a)(1)(v)	⊠ - YES	□ - NO(*

	Modular Approval Requirement	Require	ment Met
6.	The modular transmitter must be labeled with its own FCC ID number, or use an electron display (see KDB Publication 784748). If using a permanently affixed label with its own FCC ID number, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XMR2022EM120KGL" or "Contains FCC ID: XMR2022EM120KGL" Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization.	⊠ - YES	□ - NO(*)
7.	15.212(a)(1)(vi) <b>Details:</b> <example a="" as="" exhibit="" filed<br="" in="" is="" label="" labeling="" module="" on="" shown="" the="" there="" –="">Host specific labeling instructions are shown in the installation manual .filed with this applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee. A copy of these instructions must be included in the application for equipment authorization. For example, there are very strict operational and timing requirements that must be met before a transmitter is authorized for operation under Section 15.231. For instance, data transmission is prohibited, except for operation under Section 15.231(e), in which case there are separate field strength level and timing requirements. Compliance with these requirements must be assured. 15.212(a)(1)(vii) <b>Details:</b> <example 15c="" complies="" fcc="" instructions<="" module="" part="" requirements.="" td="" the="" with="" –=""><td>Deplication.&gt;</td><td>□ - NO(*)</td></example></example>	Deplication.>	□ - NO(*)
8.	are provided in the installation manual filed with this application.> The modular transmitter must comply with any applicable RF exposure requirements. For example, FCC Rules in Sections 2.1091, 2.1093 and specific Sections of Part 15, including 15.319(i), 15.407(f), 15.253(f) and 15.255(g), require that Unlicensed PCS, UNII and millimeter wave devices perform routine environmental evaluation for RF Exposure to demonstrate compliance. In addition, spread spectrum transmitters operating under Section 15.247 are required to address RF Exposure compliance in accordance with Section 15.247(b)(4). Modular transmitters approved under other Sections of Part 15, when necessary, may also need to address certain RF Exposure concerns, typically by providing specific installation and operating instructions for users, installers and other interested parties to ensure compliance. 15.212(a)(1)(viii)	⊠ - YES	□ - NO(*)
	Details: < The module meets RF exposure in mobile configuration.>		

Limited Module Description – When Applicable \* If a module does NOT meet one or more of the above 8 requirements, the applicant may request Limited Modular Approval (LMA). This Limited Modular Approval (LMA) is applied with the understanding that the applicant will demonstrate and will retain control over the final installation of the device, such that compliance of the end product is always assured. The operating condition(s) for the LMA; the module is only approved for use when installed in devices produced by grantee. A description regarding how control of the end product, into which the module will be installed, will be maintained by the applicant/manufacturer, such that full compliance of the end product is always ensured should be provided here.
