The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements. The radio portion of this module is shielded, please see exhibition external photos. The modular transmitter must have buffered modulation/data inputs (if such inputs.	
transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements. The modular transmitter must have buffered modulation/data inputs (if such inputs. shielded, please see exhibition external photos. The module has buffer modulation/data inputs.	
shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements. The modular transmitter must have buffered modulation/data inputs (if such inputs. photos. The module has buffer modulation/data inputs.	
tuning capacitors may be located external to the shielded radio elements. The modular transmitter must have buffered modulation/data inputs (if such inputs. The module has buffer modulation/data inputs.	
The modular transmitter must have buffered modulation/data inputs (if such inputs. The module has buffer modulation/data inputs. Y	
buffered modulation/data inputs (if such inputs.	
inputs are provided) to ensure that the	
inputs are provided) to ensure that the	
module will comply with Part 15	
requirements under conditions of	
excessive data rates or over-modulation.	
The modular transmitter must have its The module has its own power supply Y	
own power supply regulation. regulation. Please see the schem.pdf	
The modular transmitter must comply The requirements of antenna connector Y	
with the antenna and transmission and spurious emission have been	
system requirements of Sections 15.203, fulfilled. Please refer to the Test Report	
15.204(b) and 15.204(c). The antenna exhibition.	
must either be permanently attached or employ a "unique" antenna coupler (at	
all connections between the module and	
the antenna, including the cable). The	
"professional installation" provision of	
Section 15.203 is not applicable to	
modules but can apply to limited	
modular approvals under paragraph (b)	
of this section.	
5 The modular transmitter must be tested Please refer to the Setup Photo Y	
in a stand-alone configuration, <i>i.e.</i> , the exhibition for the stand-alone test	
module must not be inside another configuration.	
device during testing for compliance	
with Part 15 requirements. Unless the	
transmitter module will be battery	
powered, it must comply with the AC	
line conducted requirements found in	
Section 15.207. AC or DC power lines	
and data input/output lines connected to	
the module must not contain ferrites,	
unless they will be marketed with the module (see Section 15.27(a)). The	
length of these lines shall be the length	
typical of actual use or, if that length is	
unknown, at least 10 centimeters to	
insure that there is no coupling between	
the case of the module and supporting	

	equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available		
6	(see Section 15.31(i)). The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the	The Module will be labeled with its own FCC ID, and the instruction on the labeling rule of the end product has been stated in the User Manual of this module. Please refer to the Label and User Manual exhibition.	Y
	electronic display. A copy of these instructions must be included in the application for equipment authorization.		
7	The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.	The required FCC rule has been fulfilled and all the instructions for maintaining compliance have been clearly stated in the User Manual.	Y
