Product Equality declaration Letter

We, Withings declare that difference between FCC ID: XNAWBS13 / XNAWBS12 are as below.

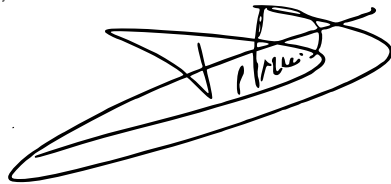

Minor change of non-RF function as below

1. Adding filter capacitor to improve performance of RS.
2. Optimize position of switching power supply components to improve efficiency.
3. Change LCD panel and remove relative unnecessary components.

Change of Bluetooth/Wifi function as below

1. Change RF impedance adaptation components for Bluetooth but characteristic is same while improving efficiency.
2. Layout is modified to improve grounding and reduce harmonic noise of Bluetooth carrier wave. This allows the use of higher Bluetooth output power.
3. WiFi layout improvements. Improved ground plane connections, removed traces from L2 & L3 from under transceiver, moved to L6 to improve EMI performance and reduce noise on RF transmit and receive signals. There is no change in output power.

Size of PCBA is not change
