RE: ATCB008285 – Original Equipment & Single Certification Applications (model EV3-LPST)
FCC ID: XND-SLX-1 & IC 8519A-SLX1 for Evigia Systems, Inc.

The following is in response to the comments made on the above referenced application.

1. Section 2.2 of the FCC labeling guidelines contained in the attachment to this email states that when a device is larger than the palm of a person's hand, the compliance statement required by Section 15.19(a)(3) of the FCC Rules must be on the device rather than in the user manual. ATCB typically likes to see a device larger than 8 by 10 cm before we require this statement to be on the device. Unfortunately I cannot determine the size of this device. The external photos, the test report and the user manual exhibits did not contain any information on the dimensions of this device. Please provide evidence that this device is smaller than 8 by 10 cm. If this device is larger than 8 by 10 cm, please provide an amended equipment label showing the placement of the 15.19(a)(3) statement on the device itself.

The device is 6cm x 7cm x 2cm. Our apologies for not including this information in the test report.
