

Label and Packaging, Product, VERASENSE for Zimmer Biomet Persona Family

DESCRIPTION

- This document specifies the information that is printed on to the Product Label and packaging assembly requirements for the following family.
VERASENSE for Zimmer Biomet Persona

PRODUCT LABEL NOTES

- Create label from: LB-1029 “VERASENSE Label Set Template”
- Record all required information on Device History Record (DHR).
- Print all required information directly onto Label Set blank using laser printer and black ink.
- Print each field per the Field-Description table below. Per the Print column, print either the exact text show, or the information as described.
- Items 8 and 10-12 are repeated on the three peel-off stickers.
- All printed text is to be legible with unaided eye. Printed text shall not overlap.
- Items 5 is GS1-128 single concatenated type one dimensional barcode and human readable printed below barcode as described below:
 - Generation of GS1-128 barcode may be accomplished by several validated software methods, such as specialized software, Excel add-in, or online software.
 - Information encoded into Barcode is particular to an individual sensor following programming and calibration.
 - Encode the following data per the example below (The values on the table for reference only. For the GTIN reference Table #2 and all other use the actual values from work order /route detailed in the table below in the order and formats shown.) Only the values are encoded, not the descriptor in the first column.

Descriptor	Value
GS1 Application Identifier (AI) for Global Trade Identification Number (GTIN)	01
GTIN (must be in a 14 digit format)	00816818021234
GS1 AI for Date of Manufacture	11
Date of Manufacture (six numeric characters)	YYMMDD
GS1 AI for Expiration Date	17
Use by Date (six numeric characters)	YYMMDD
GS1 AI for Lot number	10
Mfg Lot Number (maximum 20 alphanumeric characters)	1234567
GS1 AI for Serial Number	21
Serial Number (maximum 20 alphanumeric characters)	9876543210

- The data is encoded as a single text string of the format below:

010081681802123411YYMMDD17YYMMDD101234567219876543210

NOTE: For clarity, the numbers representing the AI and numbers representing the date element are shown in bold in the example above.

- Barcodes symbol sizes

Label and Packaging, Product, VERASENSE for Zimmer Biomet Persona Family

Item	X-dimension			Minimum Symbol Height for Given X mm (inches)			Quiet Zone		Minimum Quality Specification
	Minimum	Target	Maximum	For Minimum X-dimension	For Target X-dimension	For Maximum X-dimension	Left, Right	Above, Below	
5	0.170 (0.0067")	0.495 (0.0195")	0.495 (0.0195")	12.70 (0.500")	12.70 (0.500")	12.70 (0.500")	10X	2X	1.5 /06/660
34	0.170 (0.0067")	0.495 (0.0195")	0.495 (0.0195")	4.76 (0.1875")	4.76 (0.1875")	4.76 (0.1875")	10X	2X	1.5 /06/660

- Human readable format is printed below the barcode in the following format:
(01) 00816818021234 (11) YYMMDD (17) YYMMDD (10) 1234567 (21) 9876543210
- Items 18 and 30 are undefined fields to be used by the Contract Manufacturer for internal tracking (e.g. alpha-numeric, 1D barcode, etc...). Print must fit within the specified space.
- Item 13, 22, 32, 41, and 44 contain the document number and revision.
- The specification for the Bluetooth® symbol is as described below:
 - Print the symbol with the size requirements shown below, including the required white space around the figure.
 - Use the highest possible resolution, not going below 16x16 pixels

Label and Packaging, Product, VERASENSE for Zimmer Biomet Persona Family

Product Label field Descriptions:

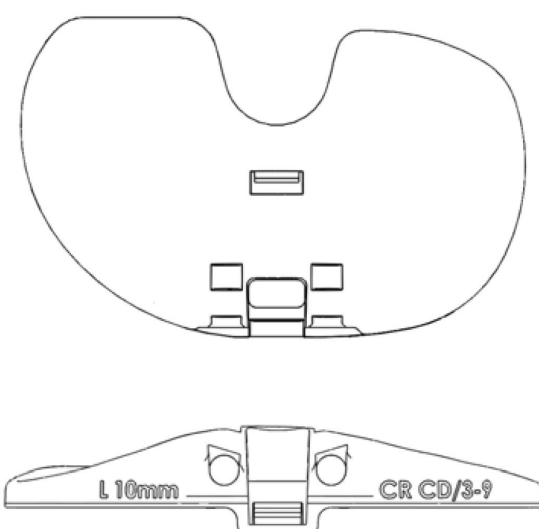

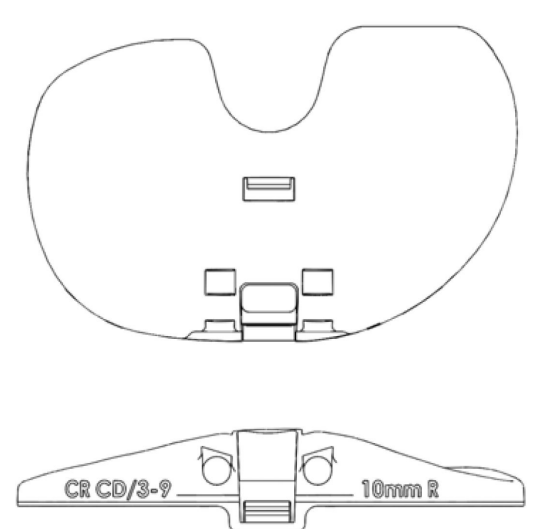

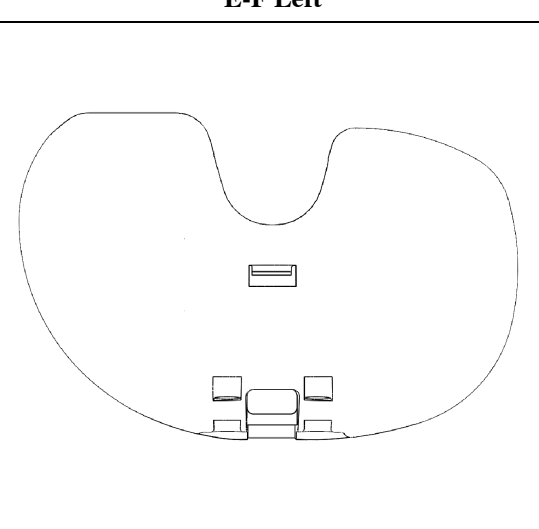

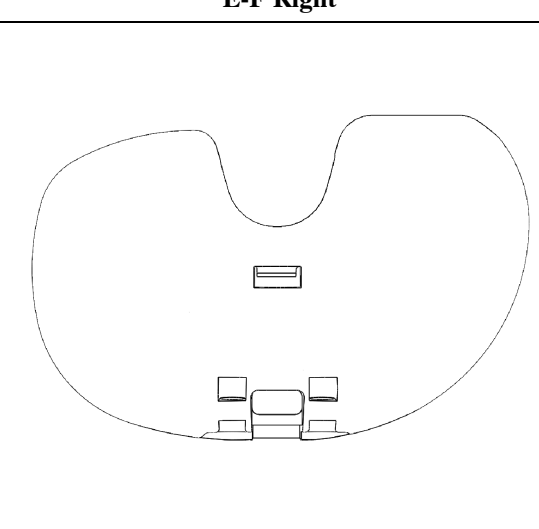

Item #	Field	Description	Font Size pts (Arial)	Print
1		Print image. See Table 1- Select image based on work order	NA	Fill all available space
2		Sizes accommodated. Table 2.	BOLD 9	Text
3		Programmed Device Model ID Number	BOLD 10	Text
4		Manufacturing Lot Number	BOLD 10	Info
5, 34		1D Bar-Code and Human Readable Interpretation. Select appropriate GTIN per work order.	7	Bar Code and human readable
6		Device Expiration Date = Manufactured date plus fourteen months in YYYY-MM-DD format.	BOLD 10	Info
7		Manufacturing Date (date that FTS is preformed, obtained from the DHR) in YYYY-MM-DD format.	BOLD 10	Info
8		See table 2. Select the appropriate description per work order.	BOLD 7	Text
9, 28	Side	See table 2. Select the appropriate side per work order.	BOLD 20	Text
10, 36, 39, 43		Manufacturing Lot Number	BOLD 7	Info
11, 33, 38		Programmed Device Model ID Number	BOLD 7	Info
12, 31, 37		See table 2. Select the appropriate description per work order	BOLD 7	Info
13, 22, 32, 41, 44		Document number and revision	6	Text
14, 29	Type	See table 2. Select the appropriate type per work order.	BOLD 20	
15, 27	Size	See table 2. Select the appropriate size per work order.	BOLD 20	Text
16		See table 2. Select the appropriate description per work order.	BOLD 19	Text
17		Programmed Device Model ID Number	BOLD 9	Text
18, 30, 47, 48		Contract Manufacturer's Internal Tracking Identifier (Optional)	NA	Bar Code
19		See table 2. Select the appropriate description per work order.	BOLD 10	Text
23		Manufacturing Lot Number	BOLD 9	Text
24		See table 2. Select the appropriate description per work order.	BOLD 9	Text
20		FCC ID XNL-ORTHOSNSR7	7	Text
25		Device Expiration Date = Manufactured date plus fourteen months in YYYY-MM-DD format.	BOLD 9	Text
26		See table 2. Select the appropriate description per work order.	BOLD 9	Text
40, 45		Device Expiration Date = Manufactured date plus fourteen months in YYYY-MM-DD format.	BOLD 7	Text
42		Shim assembly drawing number as defined per the applicable BOM for the build.	BOLD 7	Text
46		Print Bluetooth® symbol as specified in the product label notes.	NA	Symbol

Table 1 DEVICE Images

Item # 1	
C-D Left	C-D Right
 <p>The image shows the C-D Left view of the device CR CD/3-9. It features a large, rounded, U-shaped component with a central rectangular slot. Below this is a smaller, more complex assembly with several rectangular protrusions. A side view below shows a long, thin component with two circular features and the text "L 10mm" on the left and "CR CD/3-9" on the right.</p>	 <p>The image shows the C-D Right view of the device CR CD/3-9. It is a mirror image of the left view. A side view below shows a long, thin component with two circular features and the text "CR CD/3-9" on the left and "10mm R" on the right.</p>
E-F Left	E-F Right
 <p>The image shows the E-F Left view of the device CR EF/3-11. It features a large, rounded, U-shaped component with a central rectangular slot. Below this is a smaller, more complex assembly with several rectangular protrusions. A side view below shows a long, thin component with two circular features and the text "L 10mm" on the left and "CR EF/3-11" on the right.</p>	 <p>The image shows the E-F Right view of the device CR EF/3-11. It is a mirror image of the left view. A side view below shows a long, thin component with two circular features and the text "CR EF/3-11" on the left and "10mm R" on the right.</p>

Label and Packaging, Product, VERASENSE for Zimmer Biomet Persona Family

PACKAGING ASSEMBLY NOTES

- See separate Bill of Materials, VERASENSE for Zimmer Biomet Persona BOM-1014 for Item description.
- Refer to Contract Manufacturer's Quality System for:
 - Part Inspection requirements
 - Functional testing requirements
 - Part handling and cleanliness
 - Packaging and Labeling
 - Traceability and Documentation requirements
- Contract Manufacturer's Quality System shall meet or exceed the requirements per the Quality Agreement established with the Contract Manufacturer.
- Contract Manufacturer's internal Tracking & Identification labels are permissible on all components per the following:
 - Labels are permitted on: Box, Envelope, Bags, IFU and Addendum, Product Label, and on the outer Pouch of the Pouched Sensor and Pouched Shim-Set.
 - Labels are not permitted on any Inner Pouch, or on any VERASENSE or Shim surfaces.
 - Labels must be permanent, and printed with indelible ink. Maximum label size is 1.0" x 0.5".
 - Labels should be located near a corner, or in an innocuous location, and not obscure any other marking or lettering.

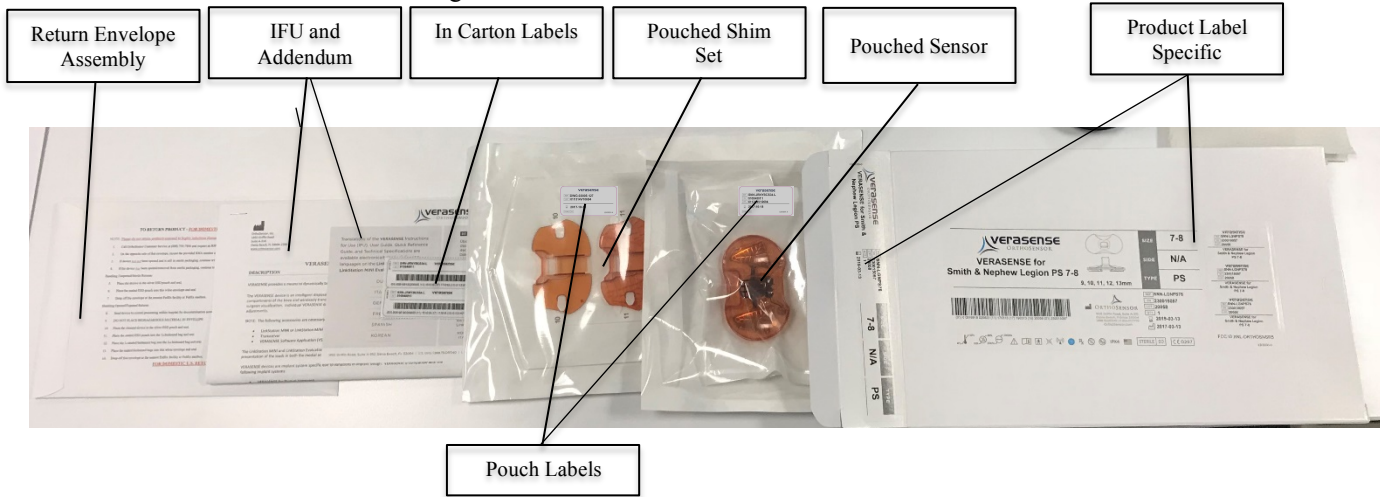

PACKAGING ASSEMBLY PROCEDURES

1. Assemble per the following instructions. Refer to the figures below.
2. Separate the In-Carton labels and the Pouch Labels from the Box Labels.
3. Place the top Pouch Labels from  symbol on the Pouched Sensor and the bottom Pouch Label on the Pouched Shim-Set.
4. With the box oriented as shown below, place contents into box in the order shown below: Return Envelope on bottom, followed by Instructions-for-Use, Translation Addendum, In-Carton Labels, Pouched Shim-Set, and the Pouched Sensor on top.
 1. Insert Pouched Shim-Set and Pouched Sensor clear side up, and the factory sealed end going into the box first.
 2. Do not bend, wrinkle or distort pouches when inserting into product box.
5. Affix Product and End Flap Labels as shown below. Label Barcode IDs shall be traceable to the Device Model ID number.
6. Affix other stickers as shown.

REVISION HISTORY

Rev	Description	Date
0	Initial Release for engineering build.	12/09/16
1	Barcodes symbol sizes table updated. Updated example figure to include current revision.	2/3/2017
2	Addition of size E/F and device images to Table 1. Removed instructions for addition of “Caution Not Sterile” and “Not for Human Use” stickers. Product label template updated, including addition of Pouch and In-Carton labels. Changed expiration date to three months from manufacturing date.	11/6/17
3	Optional manufacturing tracking identifier was added to inner pouch labels. Added description for manufacturing date Item 7, Product Label Field Descriptions.	12/20/17
4	Font size in row 2 and 26 were updated in the Product Label Field Descriptions table.	2/5/2018
5	Expiration date updated to fourteen months from manufacturing date.	02/22/18
