Chapter 7 Q&A

Chapter 1 Preface

1-1 Introduction

GT-95 Care communicator enable you to know where your cared ones are all the times. User friendly, easy to management.

- Easy to use. Suitable for kids and elders
- Compact size. Fashion look.
- Regular report function. You always know
- Voice guide, tracking and setting can be done through both calling and SMS
- POI reference report (SMS); Position indicated by Map(MMS)
- SOS function, calls and SMS will all be triggered when emergency to protect your cared ones

1-2 Notice

1-2-1 GPS position error

All GPS has some position error, the reference positions indicated by GT-95 are for your reference only, may also have errors.

The reference positions types :

- 1.Real time position : When GPS under good signal.
- 2.Last recorded position : When GPS in bad signal, the last recorded position information will be send under request.

1-2-2 Emergency contacts

Please set the emergency contacts according to priority when first use.

After setting, GT-95 will send an SMS to emergency contacts to double confirm.

1-2-3 SMS/MMS report delay

SMS/MMS report may delay during grand holidays (Christmas, New year etc.) caused by data overflow in carrier sides.

1-2-4 Password management

GT-95 is designed to be use to connect you with your cared ones. In order to protect user privacy, a password is required in setting related movement.

◎Default Password◎

The default password of GT-95 is 『0000』, Please change the password once you get the device.

◎Changing your password regularly◎

1-2-5 Maintenance

Your GT-95 contains sensitive electronic components that should be handled carefully. Obey the following directions to meet guarantee requirements.

- Keep the device dry. Rain drops, humidity and all sorts of liquids may be a cause of corrosion of electricity chains. If the device got wet, take out the battery and let the device get fully dry, then handle to your local dealer.
- Do not use or keep the device in dusty and dirty places. Its moving and electronic parts may be damaged.
- Keep the device out of high temperatures.
- Do not try opening the device except as specified in this User Manual.
- Do not throw, knock or shake the device, by handling it this way you may break internal circuit boards.
- Use supplied or approved batteries and accessories only when it needs to be changed
- The chargers must be used indoors only.

1-2-6 FOR YOUR SAFETY

For your safety consideration, please follow all usage restrictions to wireless equipment. Pay special attention to read the following situation. In disregarding them you may face danger or trespassing of existing laws.

- **SWITCH OFF IN THE MEANS OF TRANSPORT**

Follow all restrictions. Wireless equipment may cause disturbances in air traffic.

- **SWITCH OFF IN HOSPITALS**

Follow all restrictions. You might need to switch off when being in the vicinity of any medical equipment.

- **SWITCH OFF WHEN FUELING**

Do not use the device in petrol stations. Do not use it in the vicinity of fuels or chemicals.

1-2-7 Special Notice

- GT-95 is designed to connect you with your cared ones, the company assume no liability or responsibility for any behaviors violate other individuals' privacy.
- All rights reserved. Information in this document is subject to change without notice.
- All the locations and emergency information provided by GT-95 is for your reference, there may be delays caused by telecom carrier at certain circumstance. Our company is exemption from liability to security of person and property.
- Don't subscribe to any value added service in consider for your rate.

1-3 Safety and Product Information

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

FCC RF Radiation Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment must be installed and operated in accordance with provided instructions and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1.5 cm from the body. Use of other enhancements may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the device at the ear, position the handset a minimum of 1.5 cm from your body when the device is switched on.

Note: SAR standard Value: 1.6 W/Kg, Maximal Measure: 0.691 W/kg

Chapter 2 Features and Specifications

2-1、Features

- Voice communication
- Geo fence function
- Regular report function
- Previous settings inquiry function (with authorized No.)
- Position report (SMS with reference POI, MMS with Map)
- Power on/Power off notification
- Voice monitor function (with authorized No.)
- SOS function
- Voice guide function
- Access control
- Inquiring, setting through SMS
- Configuration changing Notification
- Low battery alerts

2-2、Specification

GPS receiver	High Sensitivity GPS module
GPS antenna	Built-in Active Antenna
GSM frequencies	GSM 900/1800/1900 MHz or 850/1900 MHz
G-Sensor	Built-in 3-Axis G-sensor
Voice calls	Yes
Vibrating alerts	Yes
Geo fence function	Yes
Data transfer	SMS, MMS or GPRS
Connect to a PC	USB
Configuration	SMS, Voice call or USB
Internal Memory	Micro SD card
Buttons	7
LED indicators	4 (SOS, Power, GSM, GPS)
Battery	3.7V, 650mAh Lithium
Dimensions(mm)	65 x 43 x 19
Weight	< 60g
Standby time (GPS off, GSM on)	72hrs
Working time (GPS always on, GSM on)	12hrs
Period report (GSM on, GPS on/off)	48hrs
Recommended operating temperature	0℃-50℃

2-3、Keys and Indicators

Chapter 3 Start-up

3-1、Inserting SIM card and battery

All SIM cards must be kept in a safe place. You may request your SIM card supplier to provide SIM card and information about the use of SIM card-related services. The supplier may be a service supplier, a network operator or another seller. The SIM card must be inserted in the way as set below.

NOTE: The SIM card should be password free, otherwise it will fail to function in GT-95.

Note: Before removing the cover, switch off the device and disconnect it from the charger or PC. The device must be always kept and used with a cover and screwed tightly.

3-2、Charging the battery

Before you can use the GT-95, you must fully charge the battery. By connecting the device to one of the USB connectors of a PC or by using the charger available in the set, it is possible to charge the internal battery of your GT-95. For the first time, it is advised to charge the battery using the charger (not via PC) for about 8 hours.

Chapter 4 Setting your GT-95

4-1、Start the PC software

Power off your GT-95 before connects with your computer. The removal disk will show up in your computer. Find the file named TrackTool.

Double click the icon  to run the tracktool.

Important Notice: *The files in the T-card are very important for your usage of GT-95, please back up the files in T-card once you start use in case it deleted or damaged when use improperly.*

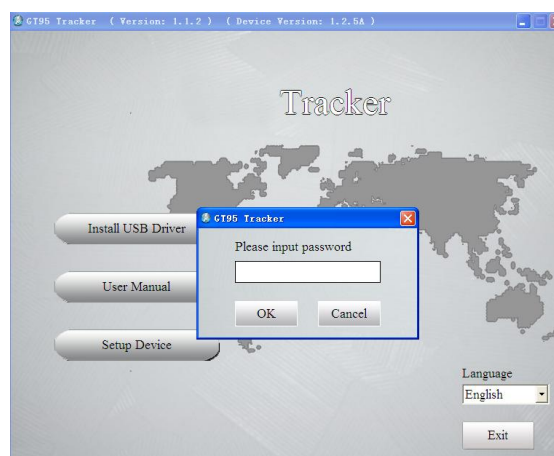

4-2、Install USB driver

Click the Install PC software button to install PC software according instruction if needed.

4-3、Personal Setting

Click the Setup Device button to enter setup mode. Access Password will be required.

The default password of GT-95 is 『 0000 』

The personal setting interface is as blow.

User name: User of GT-95

SOS message: Message for emergency use can be set here. When SOS button be triggered, a SMS with pre-set content here+location information will be sent to emergency contacts.

Language: The language of voice guiding system can be set here.

Time Zone: Setting Time Zone here.

Password: In order to protect privacy, password is required when changing settings though both PC and authorized mobile.

The default password 『0000』 can be changed here.

Shutdown: The machine can be shut down directly or to be shut down with permission of authorized Mobile.

Distance Unit: Distance Unit can be set here.

MMS setting: Please contact your local carrier for MMS setting related information.

For your operation convenience, you can add related MMS setting in this telecom company list by adding setting information to file X:/TrackTool/MMS.

The format should be is as below:

[Name of your Telecom Company]

APN=

IP=

PORT=

URL=

USERID=

PASSWORD=

Please special attention to MMS Setting, MMS can't work normally without correct setting.
The Mobile should also support MMS function; otherwise it can not get the MMS sent by GT-95.

4-4、Phone Setting

The phone setting interface is as below:

Personal	Phone	Geo Fence	Report	Service Center	Exit
01			11		
02			12		
03			13		
04			14		
05			15		
06			16		
07			17		
08			18		
09			19		
10			20		

☐ Allow All Phone Number

Save Cancel

In order to protect privacy, you can choose **20 phone number** to be authorized number which can accessible to GT-95. (You can also choose to **Allow All Phone Number**. Those not listed can only call in, and GT-95 can pick up as normal phone.)

The **No. 1, 2, 3** are **speed dial No.s** which indicated as emergency contacts. Please set these **3 No.** according to the priority.

4-5、Geo fence Setting

GT-95 supports 4 sets of Geo fence.

- Geo fences 1&2 are “regular” Geo fences (eg. “home”, “school”), fill in related longitude, latitude in Geo Fence setting interface to set or open Map to set.

NOTE:

In Some countries, the longitude, latitude information of a place indicated in Google map is not accurate, may have big error from actual location. The information in Google Earth is more accurate. Therefore, when setting the Geo fence please also consult Google Earth. (Google Map is the product of Google.)

Different bound can be set by choosing between different **Radius**.

Both in and out of the fence will be report to emergency contacts.

(Geo fences 1& 2 can only be set through PC. Enable and Disable both by PC and authorized mobile.)

- Gen fence 3 are causal one, which suitable to use in park/outside/playground. Out of Geo fence 3 will be reported.

(Geo fence 3 can only be set and canceled through authorized mobile by SMS or call.)

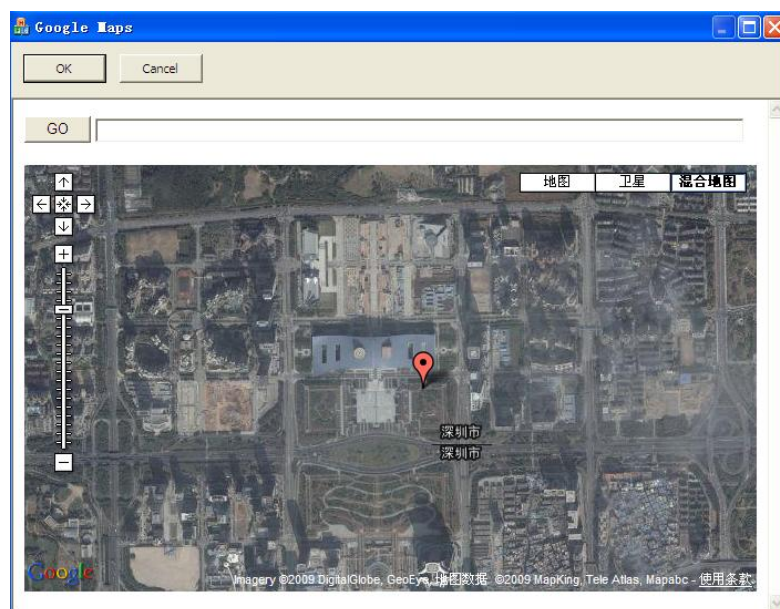

- Gen fence 4 is for parking, double click Power button to Start/Cancel. Out of Geo fence 4 will be reported every 1 minute through SMS.

(Geo fence 4 can be set and canceled through authorized mobile by SMS or call.)

The screenshot shows the 'Geo Fence' application window with a menu bar containing 'Personal', 'Phone', 'Geo Fence', 'Report', 'Service Center', and 'Exit'. The 'Geo Fence' tab is active. It displays settings for two fences:

- 1st Geo Fence:** Longitude (E, 0° 0' 0.00"), Latitude (N, 0° 0' 0.00"), Radius (500 meters), and an 'Enable' checkbox.
- 2nd Geo Fence:** Longitude (E, 0° 0' 0.00"), Latitude (N, 0° 0' 0.00"), Radius (500 meters), and an 'Enable' checkbox.

Each fence section has an 'Open Map' button. At the bottom are 'Save' and 'Cancel' buttons.

Call	7#	Monitoring	After dial , press"7#" to start monitoring function, the micro phone

			of GT-95 will be started
	9#	Voice call	After dial, press "9#" switch to voice call function, ringtone or Vibrating alert to inform user of GT-95, press any key except SOS and power to pick up

Chapter 7 Q&A

1 · Why I can't turn on GT-95? Why the LED indicator of GSM is always in red, and can't turn in green?

A: Please check your SIM card, if it is properly installed. Some SIM cards from operators need to unlock before using them. Use a cell-phone to manage un-lock the pin-code, save the configuration. And then put it back to GT-95 and the SIM card should work this time.

2 · Why I didn't get my MMS report after inquiring?

A : 1. Please make sure that the SIM card used in GT-95 registered the MMS service.
2. Please make sure that the MMS setting in your GT-95 is compatible with the setting of your operator.
3. Please make sure that your mobile support the MMS function.
4. The data transmission may fail When GT-95 or your mobile are in poor signal areas.

3 · Why the GPS can't be fixed, as the GPS Led indictor is always shining in red, not in blue?

A : 1. Please make sure GT-95 is in open area °
2. It takes around 70s for GT-95 to fix position when cold start in an open environment.
3. when start 8-10 hours later after last use, move to out door the position GT-95 can fix in about 30-40s.
4. GT-95 can't fix the position when inside house.

4 · Why 4 LED lights blinking all the time?

A : 1. Please check the T-card under the battery, if it is properly installed (The T-card is special designed for GT-95, please keep it safe).
2. Plsease re-install the T-card or handle the machine to local distributor.

5 · When GT-95 indoor, how can I know the position of GT-95?

A: When GT-95 can't fix position when indoor. But GT-95 will save the last fixed position outdoor which is outside of the building and report when request.

6 · Why I kept getting the in/out Geo Fence alerts?

A : When start Geo fence is set indoor or besides window, as the GPS signal is not stable, the position drifting sometimes. Enlarge the radius of the Geo Fence and avoid use in poor signal area.

7 · How to prolong the using hours of GT-95?

A : GT-95 has built in G-sensor, GPS will be turned off when GT-95 is still to enter power saving mode. Avoiding use in poor signal areas(GSM/GPS), as searching for signals consume lots energy.

8 · Why all LED lights turned red when power on GT-95?

A: For the first use of GT-95, it takes longer time for system configuration. This is normal, and soon the machine will work normally.

9 · Why there is some position error with GT-95

A : All GPS has some position error, especial under and bad weather condition or environment.(indoor, in car, downtown with high buildings).
