Subject	Submission materials for Permissive change on XOH-GSM001

A permissive change is being submitted for XOH-GSM001 to cover the portable specific host configuration. This transmitter module is part of the zlink [Gen1 Gateway] device and will be portable (using body worn holster). The original approval for the module only provided coverage for mobile use.

(1) How the equipment bearing the modified identification differs from the original equipment.

Response: The G24 module bearing the modified identification does not differ from the original equipment.

(2) Whether the original test results continue to be representative of and applicable to the equipment bearing the changed identification.

Response: The original test results continue to be representative of and applicable to the equipment bearing the changed identification. Additional (new) test results for SAR testing have been provided.

A handwritten signature in black ink, appearing to read "Brett Landrum", with a long horizontal line extending to the right.
