

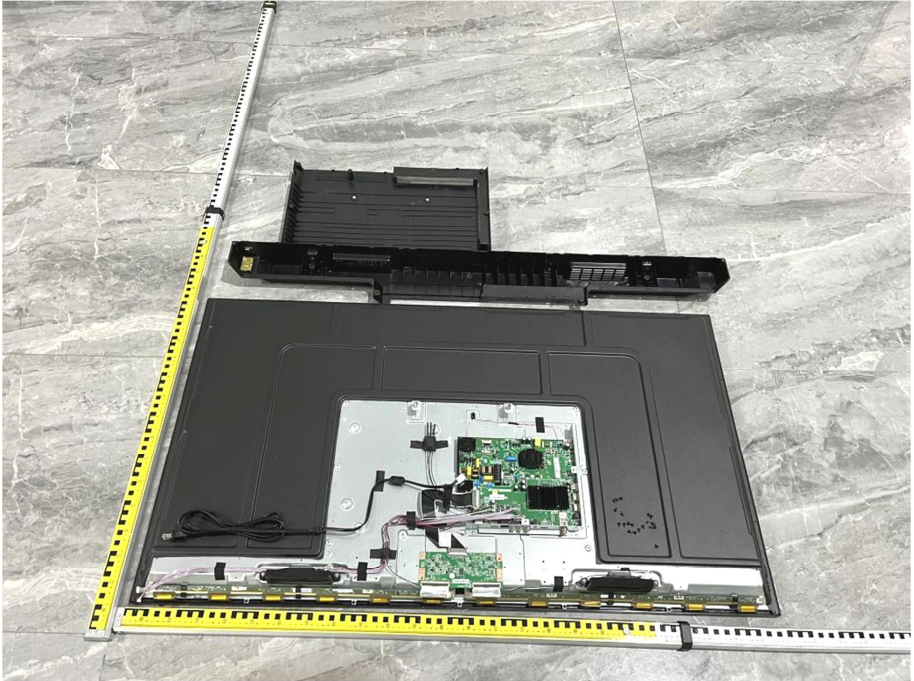

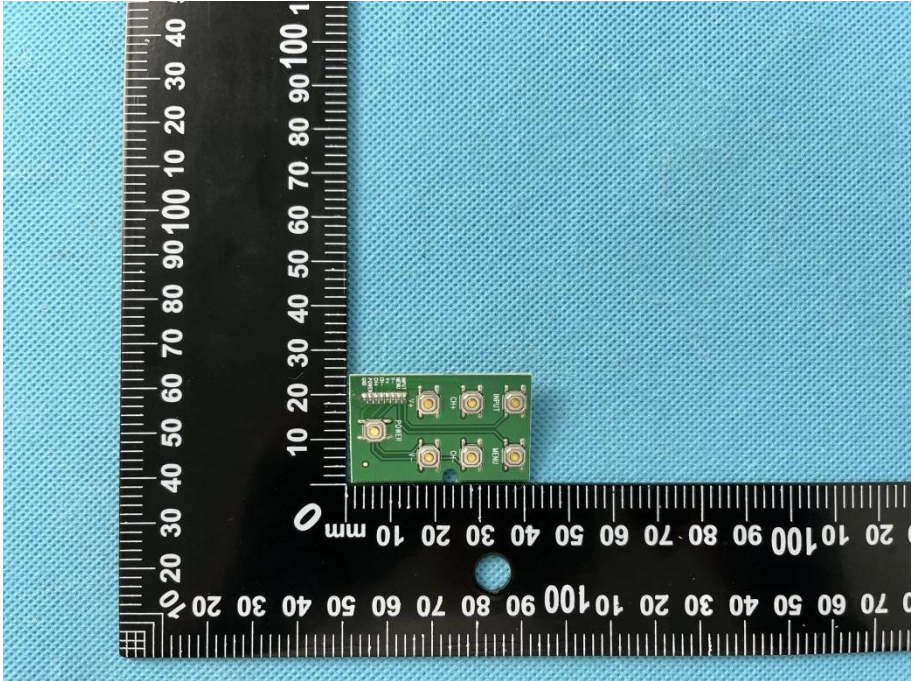

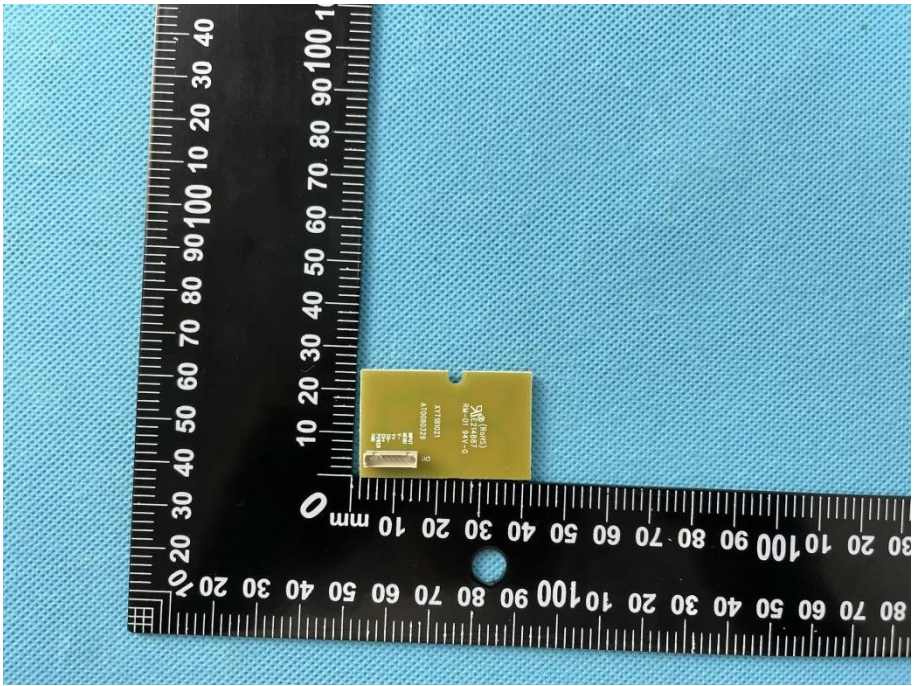

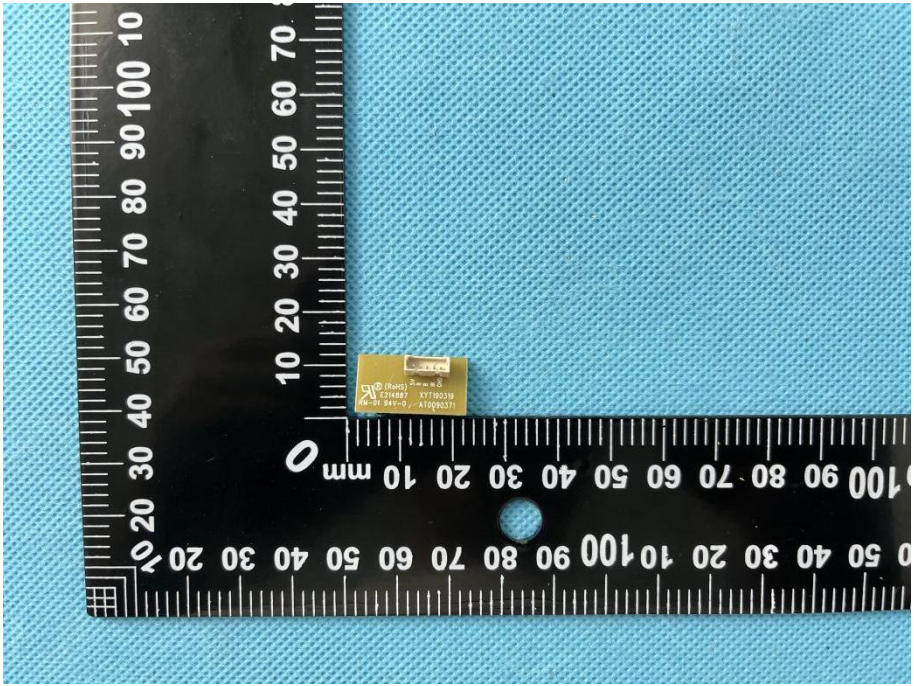

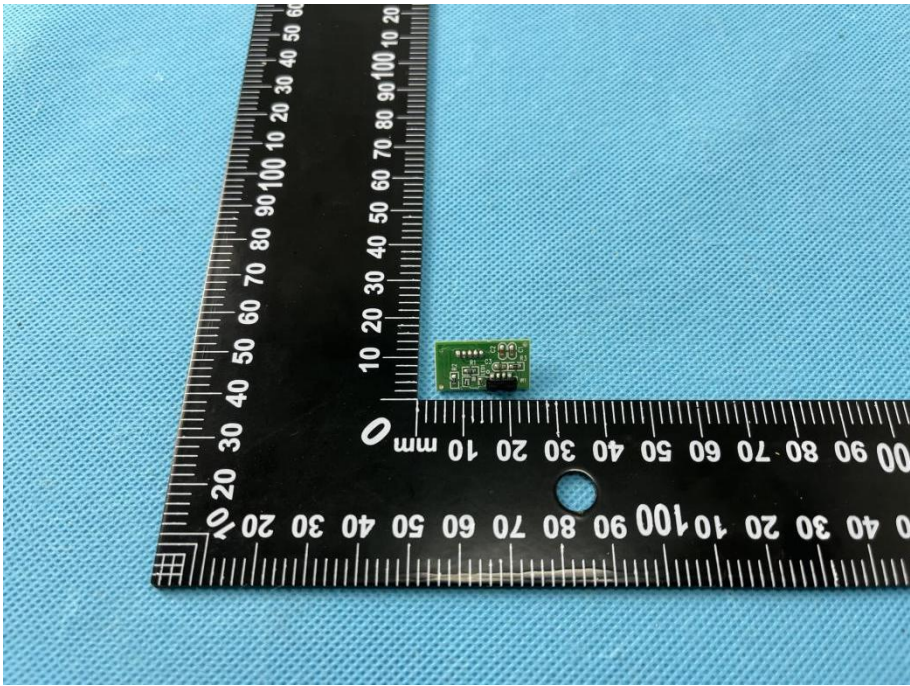

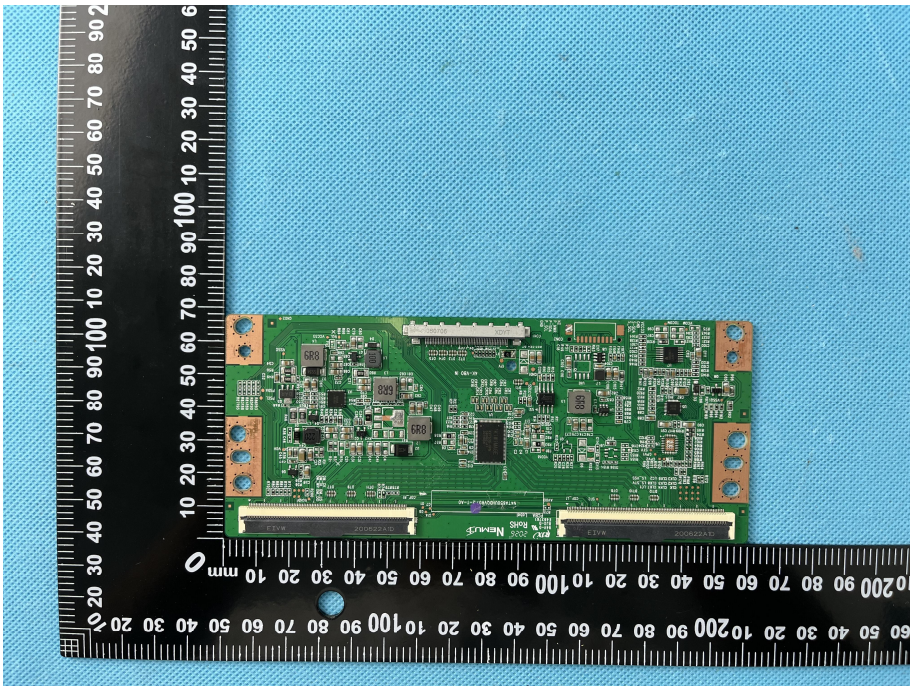

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p><b>EUT Housing and Board View 1</b></p>	 A photograph showing the internal components of an EUT (End User Terminal) housing. The housing is black and rectangular, with a central opening where a green printed circuit board (PCB) is mounted. The PCB is populated with various electronic components, including a microcontroller, memory chips, and connectors. A yellow and black striped caution tape is applied to the edges of the housing. The entire assembly is placed on a light-colored, textured surface.
<p><b>Solder Board-Component View 1</b></p>	 A close-up photograph of a small green PCB component, likely a microcontroller or memory chip, mounted on a larger green PCB. The component is soldered to the board. A black ruler with white markings is placed next to the component for scale. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component is approximately 10 mm long and 5 mm wide. The background is a blue textured surface.

<p style="text-align: center;"><b>Solder Board-Component View 2</b></p>	 <p>A photograph showing a small, rectangular, gold-colored component mounted on a blue textured board. The component is positioned near a black L-shaped ruler with white markings in millimeters. The ruler is placed on the board to provide scale. The component has some text printed on it, including 'ECONOMY SOLDER' and 'WALTEK (CHINA)'. The background is a light blue textured surface.</p>
<p style="text-align: center;"><b>Solder Board-Component View 3</b></p>	 <p>A photograph showing a small, rectangular, gold-colored component mounted on a blue textured board. The component is positioned near a black L-shaped ruler with white markings in millimeters. The ruler is placed on the board to provide scale. The component has some text printed on it, including 'ECONOMY SOLDER' and 'WALTEK (CHINA)'. The background is a light blue textured surface.</p>

<p style="text-align: center;"><b>Solder Board-Component View 4</b></p>	 A close-up photograph of a small, rectangular green PCB component. The component is positioned on a blue textured surface. A black ruler with white markings is placed below the component for scale. The ruler shows measurements in millimeters, with the component's length being approximately 10 mm. The component has several small components and pads on its surface.
<p style="text-align: center;"><b>Solder Board-Component View 5</b></p>	 A photograph of a larger green PCB component. The component is positioned on a blue textured surface. A black ruler with white markings is placed below the component for scale. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm. The component has various components, including a large black chip, and several gold-plated connectors on its edges.
