

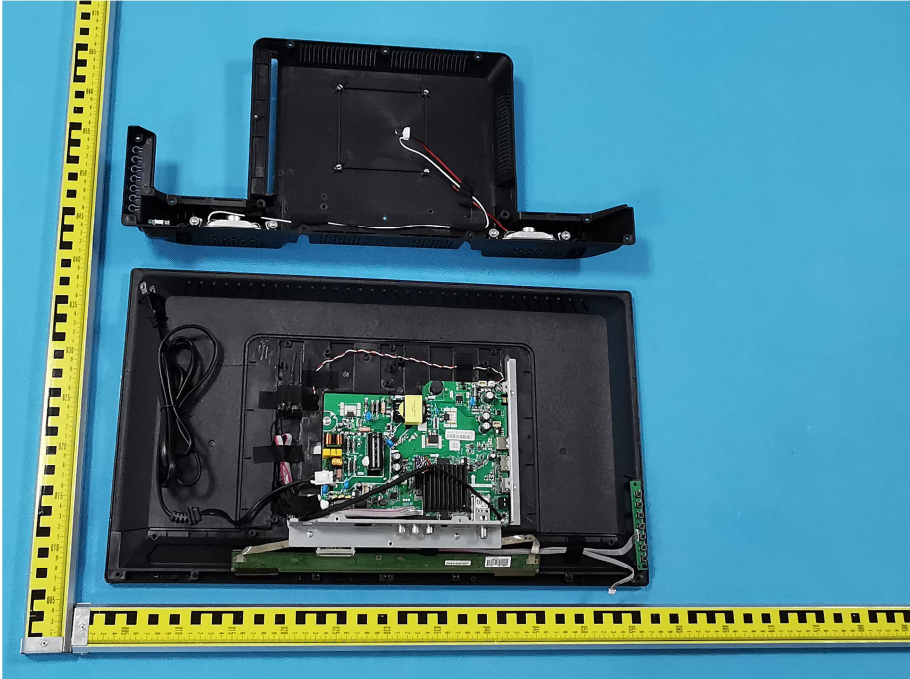

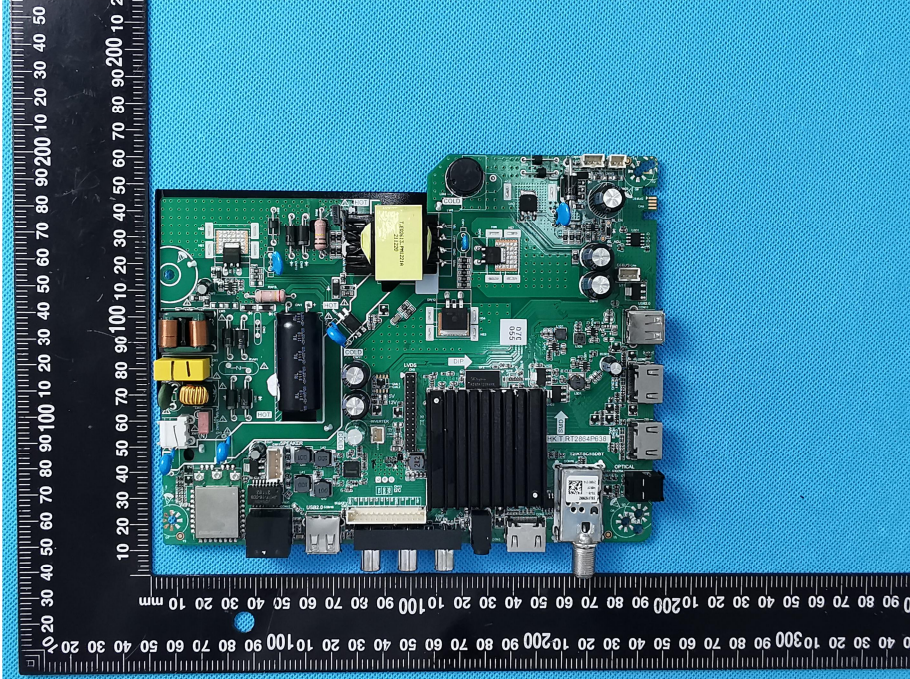

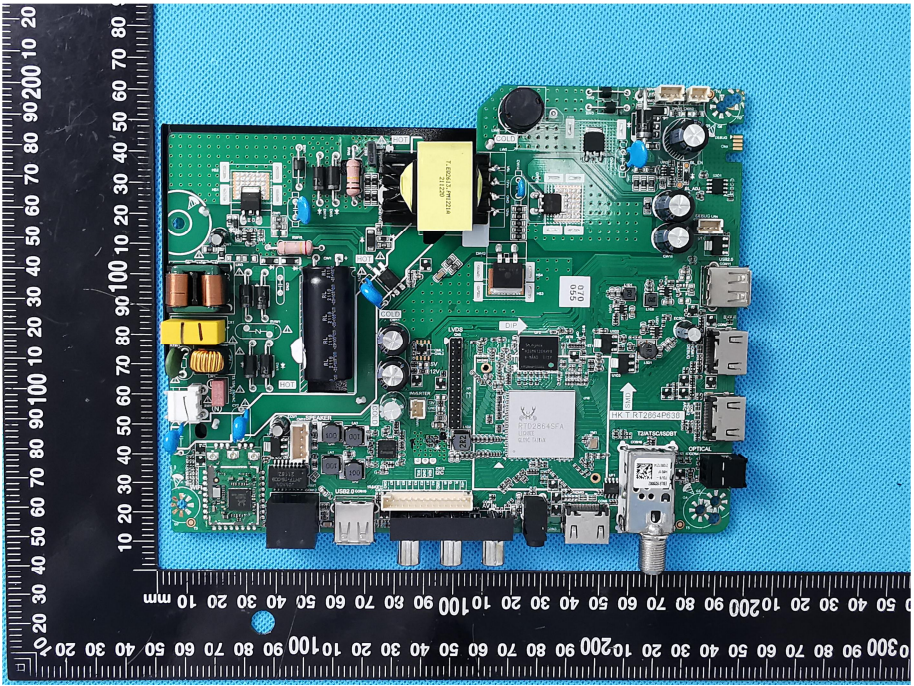

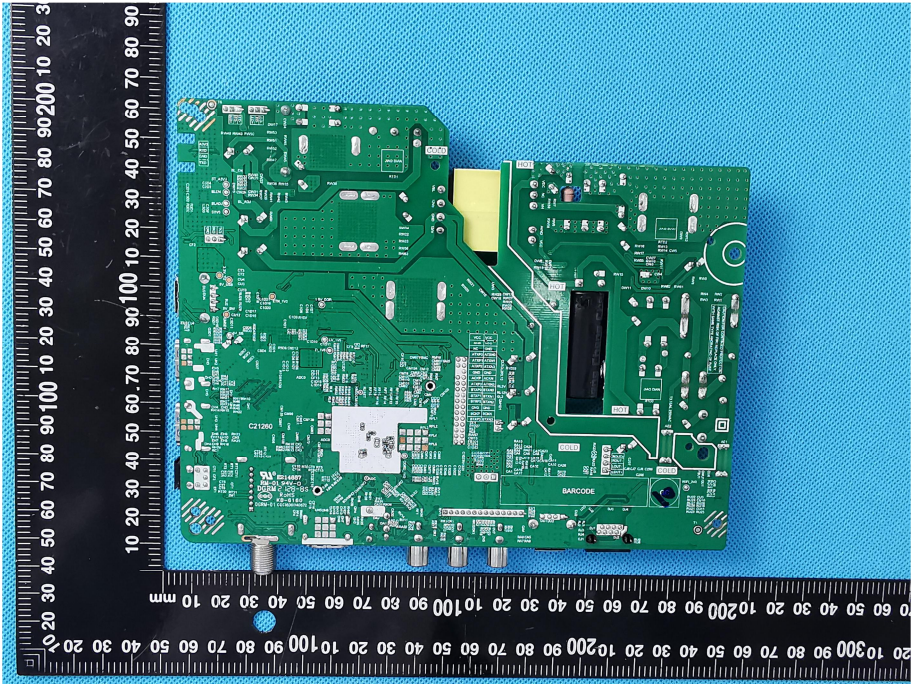

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p><b>EUT Housing and Board View 1</b></p>	 A photograph showing the internal components of an EUT (End User Terminal) housing. The top part shows the black plastic housing with a mounting bracket. The bottom part shows the green printed circuit board (PCB) populated with various electronic components, including a central processor, memory modules, and connectors. A yellow and black measuring tape is placed horizontally and vertically around the components for scale.
<p><b>Solder Board-Component View 1</b></p>	 A close-up photograph of the green PCB components. The board is densely packed with various electronic components, including integrated circuits, capacitors, and connectors. A black ruler with white markings is placed vertically and horizontally around the board to provide a scale in millimeters.

<p style="text-align: center;"><b>Solder Board-Component View 2</b></p>	 <p>A photograph of a green printed circuit board (PCB) populated with various electronic components. The board is oriented vertically and is placed on a blue textured surface. A black ruler with white markings is positioned to the left of the board, showing measurements in millimeters from 0 to 100. The board features a central microcontroller, several integrated circuits, capacitors, and connectors. A yellow component is visible near the top. The board is densely packed with components, and the solder joints are clearly visible.</p>
<p style="text-align: center;"><b>Solder Board-Component View 3</b></p>	 <p>A photograph of the same green PCB from a different perspective, showing the underside. The board is oriented vertically and is placed on a blue textured surface. A black ruler with white markings is positioned to the left of the board, showing measurements in millimeters from 0 to 100. The underside of the board shows the reverse side of the components, including the microcontroller and various passive components. A barcode is visible on the bottom edge of the board. The board is densely packed with components, and the solder joints are clearly visible.</p>
