

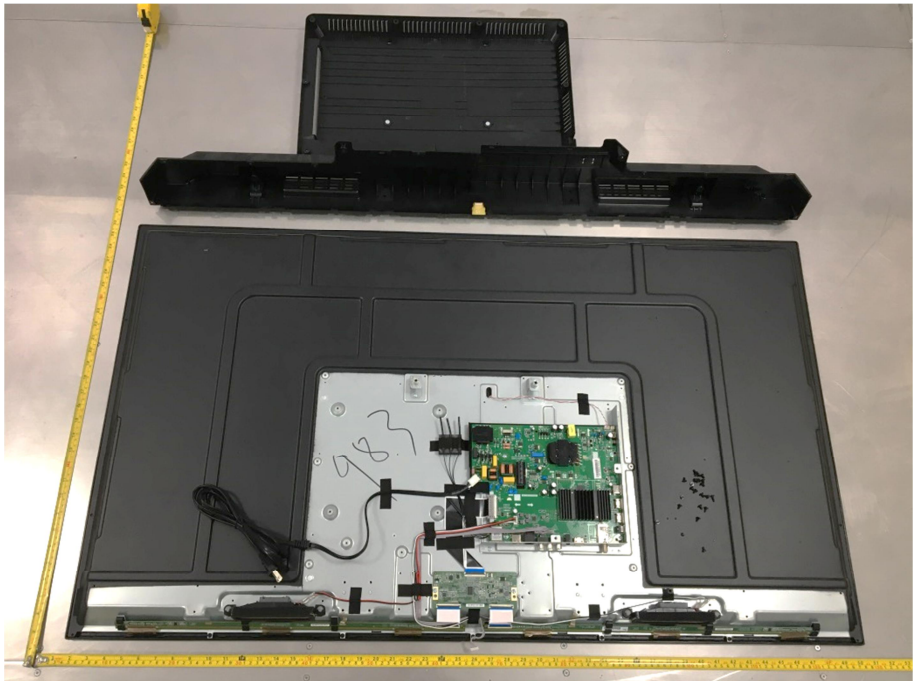

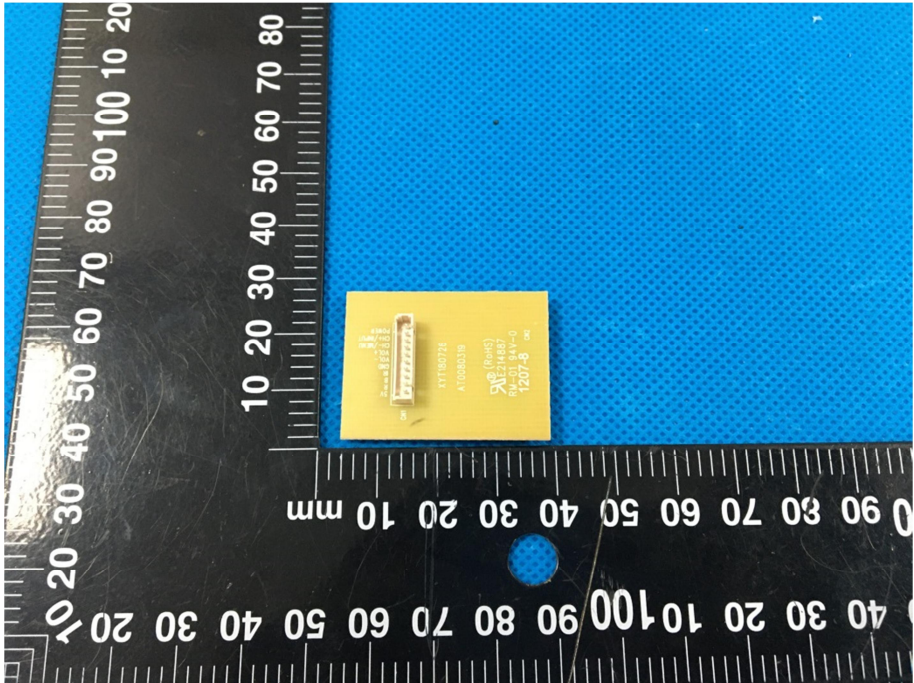

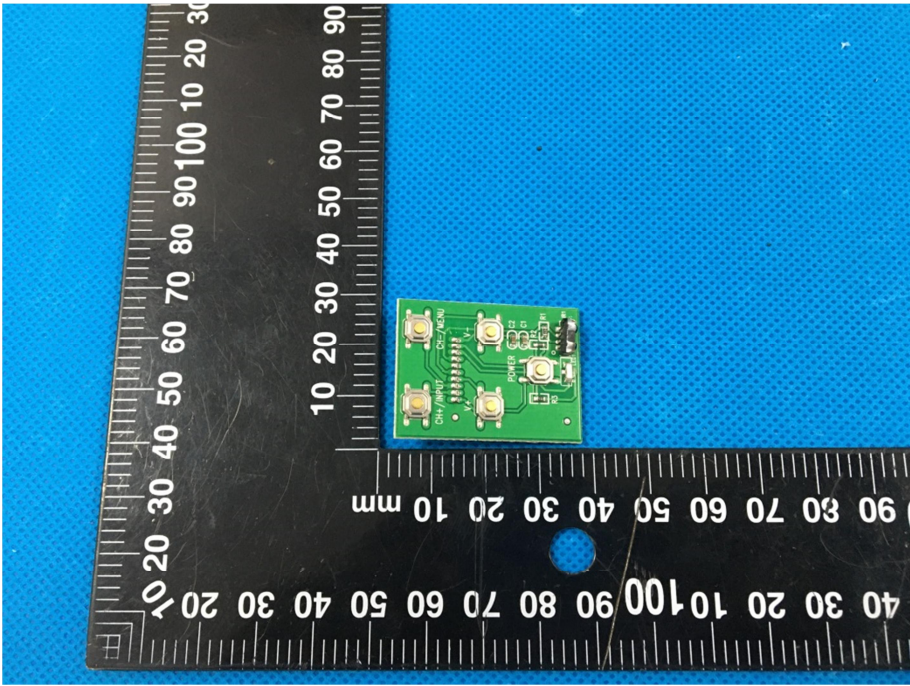

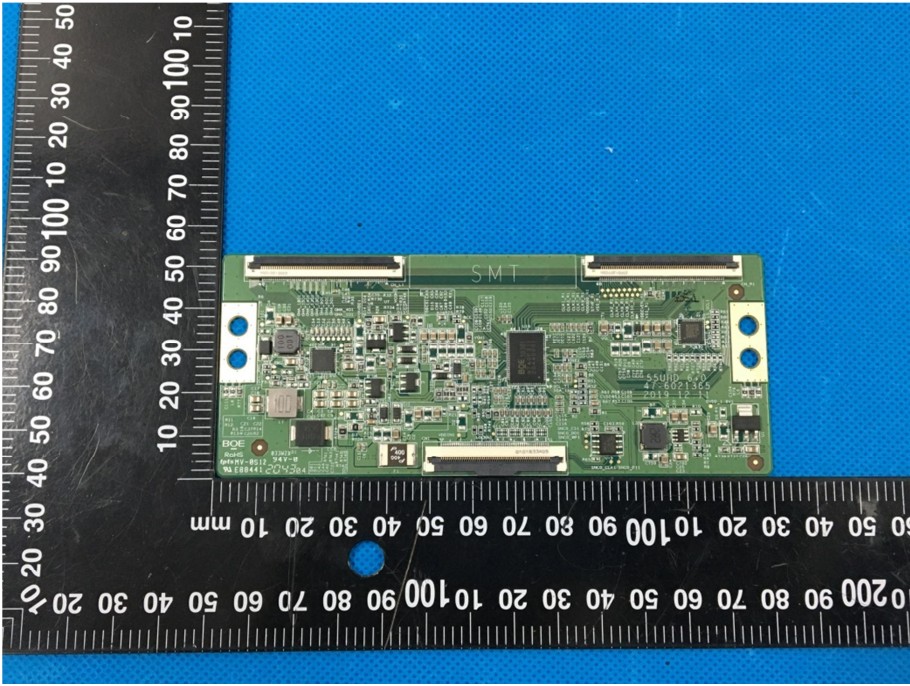

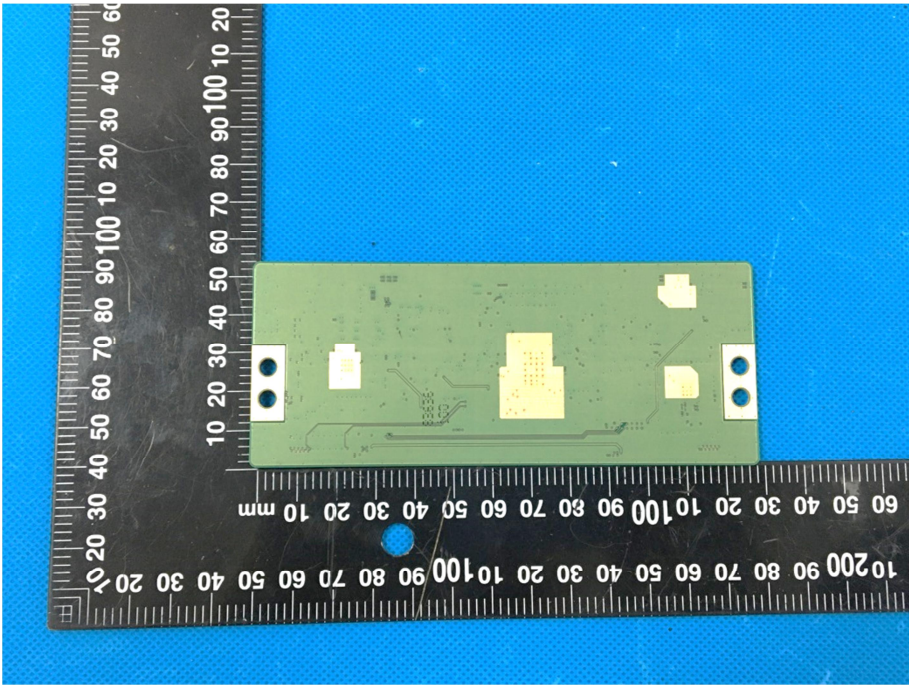

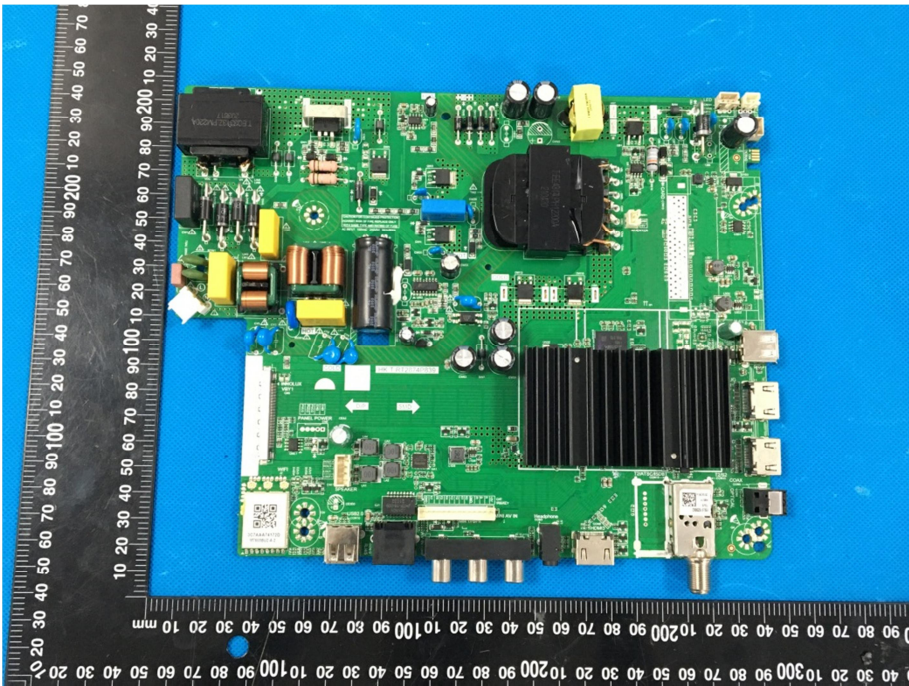

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p><b>EUT Housing and Board View 1</b></p>	 A photograph showing the internal components of an EUT (End User Terminal) housing. The housing is a dark grey plastic frame. Inside, a green printed circuit board (PCB) is visible, populated with various electronic components including a microcontroller, capacitors, and connectors. A yellow measuring tape is placed vertically on the left side and horizontally at the bottom of the housing to provide scale. The background is a plain, light-colored surface.
<p><b>Solder Board-Component View 1</b></p>	 A close-up photograph of a yellow component, likely a microcontroller or memory chip, soldered onto a blue PCB. The component is rectangular with a gold-colored top surface. It is positioned on a blue PCB with a fine grid pattern. A black ruler with white markings is placed below the component to provide scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The component is approximately 15 mm wide and 10 mm high. The background is a dark, textured surface.

<p style="text-align: center;"><b>Solder Board-Component View 2</b></p>	 <p>A photograph showing a small green printed circuit board (PCB) component. The board is populated with several surface-mount components, including what appears to be a microcontroller or logic chip, several capacitors, and a power MOSFET. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows the component is approximately 15 mm wide and 10 mm high.</p>
<p style="text-align: center;"><b>Solder Board-Component View 3</b></p>	 <p>A photograph showing a larger green PCB component, likely a power supply board. It features a complex layout of components, including a large central chip, multiple capacitors, and several connectors. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows the component is approximately 100 mm wide and 40 mm high.</p>

<p style="text-align: center;"><b>Solder Board-Component View 4</b></p>	 A photograph of a green printed circuit board (PCB) component, likely a solder mask or prepreg, laid flat on a blue surface. The board is rectangular and features several yellow adhesive pads and two circular mounting holes. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mm mark at the bottom. The board's length is approximately 100 mm, and its width is approximately 60 mm.
<p style="text-align: center;"><b>Solder Board-Component View 5</b></p>	 A photograph of a green printed circuit board (PCB) component, likely a solder mask or prepreg, laid flat on a blue surface. The board is rectangular and features a complex arrangement of components, including a large black heat sink, various capacitors, resistors, and integrated circuits. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mm mark at the bottom. The board's length is approximately 100 mm, and its width is approximately 60 mm.
