

## AC750W Series Difference Description

On behalf of UTT Technologies Co., Ltd., here is the model difference for applying CE (EMC + LVD) and FCC ID certification of AC750W Series:

1. Model N512W, N515W, N518W, N520W and N842W delete the 5GHz wireless circuit comparing to AC750W. And these 5 models have also modified the PVC front label and bottom label. The other circuit and key components are the same as AC750W. And this difference won't affect the safety and EMC result.
2. The circuit and key components of Model AC750W, AC751W, AC1200W, AC1750W and AC1751W are the same as AC750W. These 5 models have only modified the PVC front label and bottom label. The difference won't affect the safety and EMC result.
3. Model ER512, ER518, ER520, ER2000, ER810, ER811, ER821, ER841, WX20S, WX80S, WX800S, WX100 and WX200 delete the 2.4GHz and 5GHz wireless circuit, modify the PVC front label and bottom label. The other circuit and key components are the same as AC750W and the difference won't affect the safety and EMC result.

Best Regard
