To: Whom it May Concern

Regarding: Industrial Scientific Corporation Model Ventis Pro 5 Device Cell Band Configuration

The Ventis Pro 5 personal gas monitor is designed to allow remote monitoring of personnel status with the use of a CAT M1 cell modem by reporting to a cloud based monitoring service.

The device is configured at the factory to a specific cellular provider and associated cell bands as represented by attached test reports. These parameters are fixed in the device and not able to be reset or changed by the user.

Please contact me with any questions.

Sincerely,

Bob Kuzmich
