**RE: Certification Application**

Model: NINA-W131, NINA-W132  
FCC ID:XPYNINAW13  
IC: 8595A-NINAW13

**Declaration of Limitation of Operating Channel**

To Whom It May Concern:

This device can act either as a slave/client device under the control of a master, or as a master device in Ad Hoc Mode and/or Hot Spot Mode.

Ad Hoc mode is supported in both modes but limited to operate on the frequencies declared below.

The operating channels in 802.11 b/g/and 20 MHz n-mode for the device marketed to the US/Canada are firmware limited to channel 1 ~ 12 (2412 ~ 2467 MHz).

The operating channels in 40 MHz n-mode 802.11 n(40) for the device marketed to the US/Canada are firmware limited to channel 3 ~ 10 (2422 ~ 2457 MHz). When the module is installed into the end-product by u-blox AG the end-user has no possibility to select any other operating channels.

If you have any questions, please feel free to contact me.

Thank you.

Yours Sincerely,

---

Olof Viklund  
Senior Engineer, u-blox
