2.2 Installation Guide

User can drill the holes according to the mounting diagram. Use the 4 wall mount, screws to mount the bracket to the wall.

User also could mount the terminal by choosing your "shortest" users and have them stand in front of the device.

Hold the terminal on the wall that employee can comfortably center their face in the LCD display window.

Use the 2 bracket screws on the bottom of the bracket. Align the terminal with the pairs on the mounting-plate and secure the two together with the 2 Philips head screws. Be careful not to pinch the AC cord. When finished, plug the Power Adapter into the AC wall outlet.
Use the 2 Terminal Bracket Screws on the bottom of the terminal bracket.

2.4 Power up terminal

Select a proper language when the terminal boot first time. The terminal will provide several language options for customers:

- English
- Spainish
- Portuguese
- Turkish
- **-------**

2. Operating Guide

3.1 Admin. Management

➢ **Admin. Management Main Menu**

- If no admin. in system, then press **<MENU>** to enter the main menu.
- If there has enrolled admin. in system, then press **<MENU>** to enter admin. verifying process. While the verification is correct, then the system enter to the main menu.
- Press **<↑/↓>**to move selection to **<Set Admin>**, and press **<OK>** to enter into admin. menu.

ℹ️ Press 1-7 digital buttons on the keypad to enter the corresponding functions directly.

➢ **Set Admin.**

- There are total 8 admin. accounts. A **<Null Admin.>** sign will display for unset admin. accounts. Choose a **<Null>** account to register an admin.

- Input Admin. ID: Input an ID for admin. If the ID is in the database, then the terminal displays admin.'s name.

⚠️ Admin ID uses natural sequence numbers.
Admin.ID can't be duplicated and start with "0".
- Input Admin. Name: Press **<MENU>** to switch character inputting mode between **<Upper Case>, <Lower Case>** and **<Digital>.**

➢ Admin. Types

Admin. Types ① Super Admin. ② Nomal Admin	**Menu** ① Admin.Management ② User Management ③ Data Management ④ USB Management ⑤ System Settings ⑥ System Info. ⑦ Auto Test

● Super Admin. can operate all functions and normal administrators.

⚠ The first administrator must be super admin and can't be deleted in system.

Admin. Types ① Super Admin. ② Nomal Admin	**Menu** ① User Management ② Data Management ③ USB Management ④ System Info. ⑤ Auto Test

● Normal Admin. can operate User/Data/USB Management function, check system info. and auto test function.

Verify Method
① ID and Pin
② ID and Face
③ Card and Face
④ Card

● Verification modes:
✤ **ID and Pin:** Use ID and password sequentially as a verification method.
✤ **ID and Face:** Use ID and face sequentially as a verification method.
✤ **Card and Face:** Use card and face sequentially as a verification method.
✤ **Card:** Use card as a verification method.

Save
ID:1
Name:james

Add as a User?
Cancel[ESC] | Confirm[OK]

● Add as an User: Press **[OK]** to make the admin. as an user. If don't, please check **[ESC].**

User Privilege
① Access & Attendance
② Attendance
● If add as an user, please select the user privilege mode:
✤ **Access & Attendance:** The terminal is used for access control and time attendance with relay output.
✤ **Attendance:** The terminal is only used for time attendance without relay output.

● User Photo: Press **[OK]** to capture a photo for the user. If don't, please check **[ESC].**

➤ Admin Verification

● After set an admin. account, then press **<MENU>** to activate admin verification process.

● Input admin. ID (or using registered RFID card)

● Input corresponding password or using face verification, according to the mode during admin registration, after verification is successful, then the system enter to the main menu.

➤ Modify & Delete Admin account
● Select a registered admin. account to modify or delete this account.

● Modify admin. name

● Change verification mode:

● Modify password

● Re-enroll face template

● Re-register RFID card

⚠ Delete the certain admin. account: If only one registered admin. account with in the system, then it will be banned to delete.

3.2 User Management

➢ **User Management Main Menu**

User Management

3.4 USB Management

➢ USB Management Main Menu

USB Management
1. Export Management
2. Import Management
3. Update Wallpaper
4. Update Prompt Audio
5. Upgrade Firmware

⚠ Don't remove USB Disk while data transferring.

ℹ Try other USB Disk, if the terminal doesn't recognize it.

➢ Export Management

Exp. Management
1. Exp. Admin.
2. Exp. Part Users
3. Exp. All Users
4. Exp. All Records
5. Exp. Admin. Log
6. Exp. Security Photo
7. Exp. Config. File

● Exp. Admin.: Export all admin. data into a file which named as "MANAGER.TXT"

Exp. User

Input ID

123

ESC Cancel OK Confirm

● Exp. Part Users: Export part user's data into a file which named "USER.TXT"

Exp. Management
1. Exp. Admin.
2. Exp. Part Users
3. Exp. All Users
4. Exp. All Records
5. Exp. Admin. Log
6. Exp. Security Photo
7. Exp. Config. File

● Exp. All Users: Export data of all users.

ℹ Data is stored into a "USERALL.TXT" file.

Exp. Management
1. Exp. Admin.
2. Exp. Part Users
3. Exp. All Users
4. Exp. All Records
5. Exp. Admin. Log
6. Exp. Security Photo
7. Exp. Config. File

● Exp. All Records: Export all user records into a file, which named as "TIME+SN".TXT.

ℹ For example, TIME063.TXT, "063" is the last 3 bits of SN of the terminal.

Exp. Management ① Exp. Admin. ② Exp. Part Users ③ Exp. All Users ④ Exp. All Records ⑤ Exp. Admin. Log ⑥ Exp. Security Photo ⑦ Exp. Config. File	● Exp. Admin. Log: Export all admin operating logs. ⓘ Data is stored into a "LOG.TXT" file.

● Exp. Security photos: Set a time duration of exporting security photos

ⓘ Security photos are saved in <security> folder

● Exp. Config. File: Export terminal configuration file into a file, which named as "sys.dat".

> **Import Management**

- ● Import admin
  Import all administrators data from MANAGER.TXT file on an USB Disk into the terminal.
- ● Import Part Users
  Import all users data from USER.TXT file on an USB Disk into the terminal.
- ● Import All Users
  Import all users data from USERALL.TXT file on an USB Disk into the terminal.
- ● Import User List
  Import all ID and name information of users from USERLIST.TXT file on an USB Disk into the terminal.

ⓘ It is a shortcut way to add user ID and name for a terminal before registration process. The contents of USERLIST.TXT file are list of <ID>+<TAB Key> + <Name>.

⚠ The range of user ID is from 1-99,999,999,999,999.

- ● Import work code
  Import all work code data from WORKCODE.TXT file on a USB Disk into the terminal.

ℹ The contents of WORKCODE.TXT file are list of <ID> + <TAB Key> + <Work Code>.

⚠ The range of work code ID is from 1-99,999,999.

● Import work status
  Import all work status data from WORKSTATUS.TXT file on a USB Disk into the terminal.

ℹ The contents of STATUS.TXT file are list of <ID> + <TAB Key> + <Work Status>.

⚠ The range of work status ID is from 1-255.

● Import Config. File
  Import terminal configuration file from sys.dat file on a USB Disk into the terminal.

➢ **Set Wallpaper**

USB Management
1 Export Management
2 Import Management
3 Update Wallpaper
4 Update Prompt Audio
5 Upgrade Firmware

● Update the new wallpaper on a terminal.
⚠ 240 * 320pix BMP/JPG file, and named to <idlepicture.bmp> or <idlepicture.jpg>.

➢ **Set Prompt Audio**

USB Management
1 Export Management
2 Import Management
3 Update Wallpaper
4 Update Prompt Audio
5 Upgrade Firmware

● Update Successful and Failed prompt audio on a terminal.
⚠ PCM, 16000Hz, 16bit, stereo wave file, and named to <granted.wav> and <deny.wav>
ℹ Keep audio length less than 1 second.

➢ **Firmware Upgrade**

USB Management
1 Export Management
2 Import Management
3 Update Wallpaper
4 Update Prompt Audio
5 Upgrade Firmware

● Upgrade a new firmware for a terminal.
⚠ Firmware files are <F910.BIN> and <F910.TXT>

Mask: 255.255.255.0
Gate: 192.168.0.1
MAC: 4C:08:58:6C:30:44
SN:
Firmware:2.910.189
Algorithm: 3.1

● Product info: IP Address/Mask Number/Gate/MAC/SN/Firmware version/Algorithm.

3. 7 Auto Test

Auto Test
1 Test All
2 Test LCD
3 Test Keyboard
4 Check Detection
5 Check Speaker
6 Check Camera
7 Check Card
8 Test Network
9 Test USB port

- Test All: Test all below hardware automatically
  Press **<OK>** if it is working normal
  Press **<ESC>** if it is working abnormal.
A list of status will be displayed after all testing.

Check LCD

- Check LCD: Display Red, Green and Blue on the screen

ESC Abnorma OK Normal

Check Keyboard

Press Key 1

1

- Check Keyboard: Follow the screen message to check all keys.

Adjust Dashed Box

Focus on Lens

- Check Detection.

**Check Speaker**

- Check Speaker.

ESC Abnorma OK Normal

- Check Camera.
- Check RFID Cards.

- Check Network.

- Check USB Disk.

3. Appendix

Appendix1. Product Specification

- **User capacity**
  - 2,000 users for face related verification method;
  - 10,000 users for other verification methods including card, card and photo, ID and Pin
- **Record capacity**
  - Data Capacity:200,000
  - Security Photo: 200,000
- **Verification methods**
  - Face
  - Card and Face
  - Card or Face
  - Card
  - Card and Photo
  - ID and Pin
- **Languages:**
  - English
  - Spanish
  - Portuguese
  - Turkish
- **Recognition algorithm**
  - V2.6 or V3.1
- **Display**: 3.5 inch TFT
- **Keypad**: 4 * 4 touch keypad
- **RFID card**: Proximity card or Mifare card (Optional)
- **Communication**
  - TCP/IP
- **Power:** 12V DC, 1.5A
- **Environment Light**: 0-20000Lux
- **Working Temperature**: 0℃-40℃
- **Working Humidity**: 20% - 80%

Appendix2. Caution

● **Installation Environment**

Terminal should install inside of the room, and make sure the installation place far with the window/door/light more than 2 meters.
Outside of the room   Sunlight directly shines on the   Sunlight slanted shines on the

terminal through the window.   terminal through the window.

Warning

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator& your body.
