

## Statement of compliance to SAR

Equipment	: Power Amplifier
Type/Model	: Fighter 10, Fighter 12
Applicant	<ul> <li>Fender Musical Instruments</li> <li>17600 N. Perimeter Drive Suite 100, Scottsdale, Arizona,</li> <li>85255, United States</li> </ul>

## According to KDB 447498, if [the max output power / min test separation distance]\* $[\sqrt{f(GHz)}] \leq 3.0$ , it can follow the test exclusion procedure.

As we can see from the test report 170401455SHA-001: The maximum P = 0.08dBm = 1.019mW

The test exclusion limit =  $[1.019/5]*[\sqrt{2.402}] = 0.32 \le 3.0$ 

It is found the result is lower than the test exclusion limit. Therefore, the EUT complies the requirement of 15.247(I) without test.
