1. About ONYX

BOOX is presented by Onyx International, which has a group of professionals who dedicate themselves in designing state-of-the-art reading terminal. The beauty of the BOOX is embodied in both its simplicity and its power. As we are going to show you, BOOX is an open and flexible platform for both consumers and content providers.

BOOX is powered by a 16-level grayscale e-ink screen that looks and feels like paper. Passive lighting and diffuse surface relax your eyes and reduce eye strain. By the hand-writing system, you can take notes while reading and sketch up ideas that happen to emerge. BOOX takes full advantage of new-generation e-ink screens: extremely low power consumption without reflection and backlight. Each full charge can sustain a few weeks' reading. By reducing paper consumption while providing a realistic paper-like reading experience, digital content helps to protect the environment without sacrificing convenience or life style.

For content partners, we also provide support for custom formats and digital rights management solutions. All of our viewers have standard features such as layout management, font

Copyright © 2017 Onyx International. All rights reserved.

adjustment, full text search, zooming, and page flow.

For a next-generation information device, connectivity is essential. The user can connect to the Internet by build-in Wi-Fi, 3G module or other add-on modules to download new content or surf the web. Customized for the e-ink screen, WebKit, the same software engine as some powerful desktop browsers such as Safari and Chrome, is the web browser of BOOX.

BOOX gives you a new reading experience.

Copyright © 2017 Onyx International. All rights reserved.

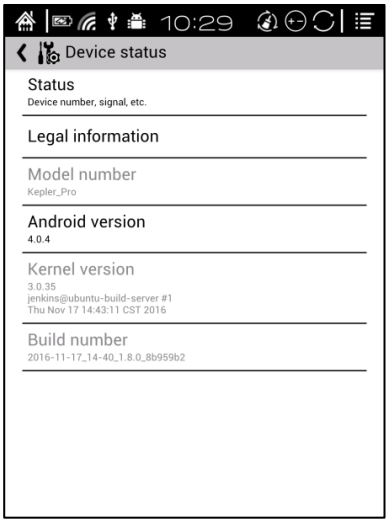
10.5 About

More information about the devices are listed here, including system update, notification, battery usage, legal info, model, firmware version etc. ;



Copyright © 2017 Onyx International. All rights reserved.

11. FAQ

11.1 How to turn the device on/off

- When the device is off, press power button for 3-5 seconds to turn the device on;
- When the device is on, press power button for 3-5 seconds to turn the device off;
- When the device is on, pop up menu, then choose "Shut Off" to turn the device off

11.2 How to charge

- ✓ Recharge the device by connecting it with PC by USB cable;
- ✓ Recharge the device by connecting with power adapter(5V=1A, optional accessories);
- ✓ Indicator light is on when the device is charging. The light will be off after battery is fully charged;
- ✓ It takes around 3 hours to fully charge the device;

11.3 How to transfer data

- ✓ Transfer data by connecting the device with PC via USB cable ;
- ✓ Transfer data by third-party sync apps between PC and the

Copyright © 2017 Onyx International. All rights reserved.

device via WiFi;

- ✓ Download data or read online by browsing via WiFi;
- ✓ Download data or read online by log-in of reading apps from third party via WiFi;

11.4 How to install dictionary

The device supports dictionary formats of stardict\bg\mdict. Users can download the dictionary packages online, copy to folder "Root Directory\dicts\dictionary" . Dictionary is available to use after that when users are reading;

11.5 How to add fonts

Users can download fonts online, then copy the fonts to the folder/adobe/resources/fonts; Users can select the installed fonts when reading, but the fonts are only available for some book formats opened by Oreader. Neo Reader 2.0 does not support this function.

11.6 How to update locally

a. Download firmware update.zip from our official web

Copyright © 2017 Onyx International. All rights reserved.

b. Copy the firmware to MicroSD card. The device will detect the firmware automatically after MicroSD card is inserted into the device
c. Follow the instruction to update the device
d. When update is successful, the device will restart automatically
e. Remove MicroSD card

Note: Please connect the device with power source or PC to make sure of enough power for update ;

11.7 *Update by OTA

Users can update the firmware online via OTA (Setting\About\System update). Please connect WiFi when updating the device by OTA;

Federal Communications Commission (FCC) Interference Statement
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generate, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

RF exposure warning

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
The equipment must not be co-located or operating in conjunction with any other antenna or transmitter.
