**RE: Class II Permissive Change Letter**

For Repeater **CAP H 23/23/25T/25T** **FCC ID: XS5-CAPH2325**

Certified under FCC Rule Part 27 / Equipment Class: Part 20 Industrial Booster (CMRS)

Granted on December 09, 2019, by Phoenix Testlab GmbH

To whom it may concern:

This authorization covers the Class II Permissive Change application for the following changes:

- Hardware change at the Signal Processing Module.
- Different assembly on same raw PCB
- Exchange of the FPGA (Field Programmable Gate Array)
- More powerful FPGA provides an increased signal processing bandwidth
- SW configuration had to be adjusted

This change does not affect the FCC part 27 operation because it refers to the control plane. The RF-specification of the repeater remains untouched, and the RF-performance remains the same. This has been proven by measurements.

Best Regards / Mit freundlichen Grüßen
