RE: according to KDB 484596 D01 **Referencing Test Data across Separate Equipment Authorization Application**

For Industrial Booster

CAP L 17E/17E/23/23 FCC ID: XS5-CAPL17E23

Certified under FCC Rule Part 27

Frequency Range: 2350-2360 MHz

Equipment Class: Part 20 Industrial Booster (CMRS)

Granted on July 06, 2017 by Phoenix Testlab GmbH

We apply for the new

CAP L 17E/19/23/25 FCC ID: XS5-CAPL17E192325

by similarity to the 23 Band, the reuse of the report

ECL-EMC-TR-17-143-V02.00_Andrew_ION-E CAPL_2300MHz_FCC.pdf

from the above listed FCC approval, for a separate equipment authorization.

To whom it may concern:

We, ANDREW Wireless Systems GmbH declare similarity between both **23** paths by reason of:

- Same Line Up
- Same Assembly
- Same Tuning

We, the applicant take full responsibility that the test data represents compliance for the new FCC ID: XS5-CAPL17E192325. Radiated Emission measurements were performed uncomplained.

Best Regards / Mit freundlichen Grüßen

Andrew Wireless Systems GmbH
